SECRETARY OF STATE

The Honorable Ken Hechler
Secretary of State
State of West Virginia
State Capitol
Charleston, West Virginia

Dear Mr. Hechler:

On January 4, 1991, this department submitted the minimum prevailing wages to be paid on public improvement construction projects for the year 1991.

Please be advised that due to a typographical error, we have erroneously transposed the commercial and residential rates for the classification of Plumber/Fitter in Mason County. The correct rate should read as follows: Commercial \$18.45; Residential \$13.84.

Therefore, we are requesting that the rates your department has previously certified be immediately corrected to reflect the changes.

Sincerely,

A handwritten signature in cursive script, appearing to read "Roy M. Smith".

CONSTRUCTION RATES

WEST VIRGINIA DEPARTMENT OF LABOR
Chapter 21-5A
Series 15
1991

Definitions have been adopted as follows:

(1) Highway Construction

Highway construction work is defined as all work ordinarily included in highway construction projects. It includes highway tunnels and bridges, highway and street grading, paving and drainage, culverts, manholes, water and other utility pipelines (when included in the contract), sidewalks (when included in the contract), retaining walls, underpasses and overpasses (when included in a highway contract), highway viaducts, clover leaf structures, curbs and sidewalks, seeding and landscaping, clearing (when included in the contract), guard rails and fences, and including the erection, dismantling, operation, maintenance and repair of all equipment, vehicles and other facilities used in connection with or serving the aforementioned work.

(2) Heavy Construction

Heavy Construction and railroad construction is defined as constructing, substantially in its entirety, any fixed structures, improvements or modification thereof, addition or repair thereto, including any structure or operation which is an incidental part of the contract thereof (not including Building and Highway Construction), including, without limitation, railroad and street railway construction projects, sewers and water mains, retaining walls, viaducts, drainage projects, flood control projects, reclamation projects, airports, athletic fields, reservoirs, water supply projects, water power developments, hydro-electric developments, transmission lines, duct lines, pipe lines, locks, dams, dikes, levees, revetments, channels, channel cutoffs, intakes, dredging projects, jetties, breakwaters, docks, harbors, roads, bridges, parking lots, sidewalks, building construction sites, industrial plant sites, sewage disposal and water treatment plants, excavation and disposal of earth and rock, including the assembly, operation, maintenance and repair of all equipment, vehicles and other facilities used in connection with and serving the aforementioned works and services.

(3) Building Construction

Building trades rates and conditions shall apply to any building which may be required in the construction, renovation or demolition of any work included where such buildings are customarily constructed under building trades conditions.

WEST VIRGINIA DEPARTMENT OF LABOR
Chapter 21-5A
Series 15
1991

COVERAGE OF SPECIFIC CLASSES OF WORK IS DEFINED AS FOLLOWS;

A. As an item of construction:

- (1) Preliminary survey work: Since this work merely affects construction without being a part of it, such work is not generally covered.
- (2) Survey work immediately prior to and during actual construction: When surveying is performed immediately prior to and during actual construction, in direct support of construction crews, such surveying is construction work within the meaning of the prevailing Wage Law. Normally, surveyors are considered professional employees and not subject to prevailing wage rates. However, when survey crew members perform work in another classification, then they shall be paid the rate as predetermined for the classification in which they are working.

B. Exploratory Drilling:

- (1) Where the drilling was for the purpose of obtaining core borings to be used in engineering studies and planning, the word "works" refers to improvements, such as buildings, canals or roads, rather than to refer to progress or activity. Consequently, mere digging would not appear to be within the term because it relates to an activity as distinguished from a product or improvement.
- (2) Where the soil samples are taken prior to or during construction for the construction contractor, for the purpose of setting foundations, the Commissioner of Labor has held that contracts for such work are considered covered by the Prevailing Wage Law if they may be fairly characterized as being directly related and incidental to, or an integral part of, the actual construction process.

AND

HIGHWAY

CONSTRUCTION RATES

1991

WEST VIRGINIA DEPARTMENT OF LABOR
Chapter 21-5A
Series 15
1991

Definitions have been adopted as follows:

(1) Highway Construction

Highway construction work is defined as all work ordinarily included in highway construction projects. It includes highway tunnels and bridges, highway and street grading, paving and drainage, culverts, manholes, water and other utility pipelines (when included in the contract), sidewalks (when included in the contract), retaining walls, underpasses and overpasses (when included in a highway contract), highway viaducts, clover leaf structures, curbs and sidewalks, seeding and landscaping, clearing (when included in the contract), guard rails and fences, and including the erection, dismantling, operation, maintenance and repair of all equipment, vehicles and other facilities used in connection with or serving the aforementioned work.

(2) Heavy Construction

Heavy Construction and railroad construction is defined as constructing, substantially in its entirety, any fixed structures, improvements or modification thereof, addition or repair thereto, including any structure or operation which is an incidental part of the contract thereof (not including Building and Highway Construction), including, without limitation, railroad and street railway construction projects, sewers and water mains, retaining walls, viaducts, drainage projects, flood control projects, reclamation projects, airports, athletic fields, reservoirs, water supply projects, water power developments, hydro-electric developments, transmission lines, duct lines, pipe lines, locks, dams, dikes, levees, revetments, channels, channel cutoffs, intakes, dredging projects, jetties, breakwaters, docks, harbors, roads, bridges, parking lots, sidewalks, building construction sites, industrial plant sites, sewage disposal and water treatment plants, excavation and disposal of earth and rock, including the assembly, operation, maintenance and repair of all equipment, vehicles and other facilities used in connection with and serving the aforementioned works and services.

(3) Building Construction

Building trades rates and conditions shall apply to any building which may be required in the construction, renovation or demolition of any work included where such buildings are customarily constructed under building trades conditions.

WEST VIRGINIA DEPARTMENT OF LABOR
Chapter 21-5A
Series 15
1991

COVERAGE OF SPECIFIC CLASSES OF WORK IS DEFINED AS FOLLOWS;

A. As an item of construction:

(1) Preliminary survey work: Since this work merely affects construction without being a part of it, such work is not generally covered.

(2) Survey work immediately prior to and during actual construction: When surveying is performed immediately prior to and during actual construction, in direct support of construction crews, such surveying is construction work within the meaning of the Prevailing Wage Law. Normally, surveyors are considered professional employees and not subject to prevailing wage rates. However, when survey crew members perform work in another classification, then they shall be paid the rate as predetermined for the classification in which they are working.

B. Exploratory Drilling:

(1) Where the drilling was for the purpose of obtaining core borings to be used in engineering studies and planning, the word "works" refers to improvements, such as buildings, canals or roads, rather than to refer to progress or activity. Consequently, mere digging would not appear to be within the term because it relates to an activity as distinguished from a product or improvement.

(2) Where the soil samples are taken prior to or during construction for the construction contractor, for the purpose of setting foundations, the Commissioner of Labor has held that contracts for such work are considered covered by the Prevailing Wage Law if they may be fairly characterized as being directly related and incidental to, or an integral part of, the actual construction process.
