B. Summary of Comments:

Two Comments Received:

1. Chuck Huss, Consultant, Bioptic Driving

a. Suggested language to improve 3.5.b by inserting the word "and" before the word "the".

Response: DMV accepted suggestion and incorporated suggestion in Agency Approved rule.

b. Suggested striking the upper limit of the allowed bioptic scope of power of 4X and replacing the 4X limit with a substitute standard that the lens offers no less than a 6 degree telescopic field of view.

Response: DMV declines this amendment as it expands eligibility to the program beyond the initial proposed criteria. The rule can be amended in the future if further research and experience with the program indicate that candidates for the program that require higher power bioptic lenses can safely operate a motor vehicle.

c. Suggested a more relaxed standard of 20/60 in place of the proposed 20/40 standard for vision after correction with a bioptic lens.

Response: DMV declines this amendment as it expands the eligibility for the program. DMV and the Division of Rehabilitative Services agree that the 20/40 standard is critical because of the loss of field of vision in persons using bioptic lenses. Mr. Huss conceded that a prior bioptic lens low vision pilot program used the 20/40 standard.

2. Michael R. Balgord, President, National Interlock Systems, Inc.

a. Advised that Positive Identification enhancement for program violators would add some cost to the program participant.

Response: DMV is committed to using the best technology possible to deter drunk driving and understands that the enhancement will add an additional cost to the program participant. No change to rule is suggested by commentor.

C. Changes made as a result of comment:

1. Incorporated Chuck Huss suggestion #1.

D. Agency Changes:

1. Several changes made in Section 3 and Section 9 clarifying how the agency currently handles cases involving reexamination of drivers for medical reasons or driving ability or knowledge reasons.
2. Clarification of agency procedures in Section 5 dealing with how the agency handles driving while suspended or revoked reports from the Courts.
3. Correction of typing error in describing the different criteria based on offenses with a .15 BAC or greater (aggravated DUI) for eligibility for the interlock program.
4. Several punctuation errors corrected.

Hi Steve,

Please accept my following comments regarding DMV's proposed promulgated rules re HB 4139.

- 1) In your last sentence under 3.5.b. page 6 of Legislative Rule 91-5, should there be the word "and" or other word after the comma and before the word "the"?
- 2) Under 3.5.d.1., page 6 I would like to propose that this statement be re-written to read "An applicant must have 20/40, or better, distance visual acuity in the better functioning eye using a bioptic telescopic device, that presents no less than a 6.0 degree telescopic field of view at optical infinity and is prescribed by a licensed optometrist or ophthalmologist".

As shared earlier this week with DRS administrative officials, one of the main reasons for restricting the power of the telescopic unit to 4X or less for bioptic drivers in years' past was that former low vision patients could not achieve a magnified field of view greater than 6 degrees with any type of telescopic lens unit greater than 4X, available on the market at that time.

Telescopes mounted in a bioptic position and offering a six degree field of view or more was what Dr. Randy Jose, O.D. (a highly recognized low vision specialist, now retired) indicated was needed to spot objects or forms effectively from their environmental background. I still agree with that statement.

However there are new prescription bioptic lens systems on the market now that present magnification levels greater than 4X and have magnified fields of view greater than 6 degrees. For example, Designs for Vision, Inc. has both a 5.0 X and 6.0X Expanded Field Prism (EFP) bioptic lens system with fields of view of 8 degrees and 6.5 degrees respectively. Another company called Ocutech, Inc. has a 6.0X Visual Enhancing System (VES) manual focus keplarian type bioptic lens system presenting a magnified field of view of 9.60 degrees. See vendor information below.

- 3) Under 3.5.d.1., page 6, I would also like both WV DMV and DRS officials to consider requiring bioptic applicants to illustrate improved visual acuity of 20/60 versus the more conservative 20/40 visual acuity figure as stated through the telescopic portion of the bioptic; since other in-state applicants or licensees with mild acuity loss (who are not required to participate in the bioptic driver training program) only have to illustrate a visual acuity of 20/60 in the better functioning eye with best standard correction to obtain or maintain restrictive driving privileges.

The latter would be more acceptable to low vision consumers who meet the carrier lens visual acuity and visual field requirements for entrance into our future low vision driving program, but who may have problems achieving a visual acuity of 20/40 through the telescopic portion of their bioptic system. Note the 20/60 requirement through the bioptic is becoming more common place in other states that allow bioptic driving for the reason stated below.

One main reason to endorse the latter more liberal telescopic standard (20/60) is that it would allow clinicians (optometrists or ophthalmologists) to prescribe bioptic lens systems that are weaker in strength and offer larger magnified fields of view; the larger the magnified field of view, the easier it is for the bioptic user to fixate and gather visual information on targets of interest in the magnified field of view.

I can live with the proposed 20/40 telescopic standard, as this was the standard required with our past graduates of our low vision driving program, from 1985 to 1998. But a more equitable standard of 20/60 across the board for all future in-state restricted drivers and those who will be required to use bioptic lens systems (to obtain more detailed information in a timely fashion through the telescopic portion of their bioptic system) makes good common sense to those of us who train these drivers.

In advance, thank you for allowing me to comment on your proposed rules re HB 4139.

Subject: Proposed Rule Changes - Title 91, Series 5

Dear Mr. Dale:

National Interlock has reviewed the proposed rule changes that were posted on July 22, 2008. We noted that the state is making provisions for Positive Identification Equipment (16.2.k and 16.5.g) for those individuals that the Commissioner may require to use such equipment. National Interlock will need to charge additional fees for this type of equipment as it is more costly to manufacture, install, service and generate reports. National Interlock is not contesting the new language found in 16.2.k and 16.5.g, rather we wanted to comment that there will be costs involved, particularly as the fees charged must be approved by the Commissioner as provided for in 16.10.b.

National Interlock has proudly served West Virginia since 2000 and looks forward to continuing its support of the Test and Lock Program as the new statutes and rules are implemented.

Please do not hesitate to contact me with any questions that you may have or if we can be of further assistance.

3.4. Standards for Medical or Vision Review

3.4.a. Medical - The Driver's License Advisory Board shall evaluate each medical case referred to it on an individual basis and make recommendations to the Commissioner for his or her decision.

3.4.b. Vision- The Division shall test each applicant for licensing to determine if the applicant has no serious visual defects and a visual acuity of at least 20/40 in both eyes with or without conventional corrective lenses. For the purposes of this rule, conventional corrective lenses including surgical intraocular transplants and contact lenses are acceptable for meeting the visual acuity requirements. Special equipment or special lens arrangements are not considered conventional for the purposes of this rule. Applicants for licensing who require bioptic type lens arrangements may qualify for a restricted Class G driver's license in accordance with West Virginia Code §17B-2B et seq. and subsection 3.5 of this rule.

1. Applicants who do not meet the minimum visual acuity level or who show serious visual defects shall submit a vision examination form to the Division. The form shall be

completed by an ophthalmologist or optometrist of the applicant's choice who is licensed in the United States. The Division shall approve the applicant as eligible for licensing if the ophthalmologist or optometrist certifies that the applicant's vision:

A. can be corrected with conventional lenses to a visual acuity level of at least 20/60 in one eye;

B. that there is no evidence of disease or rapid deterioration of vision; and

C. that the applicant can, in the opinion of the ophthalmologist or optometrist, safely operate a motor vehicle with appropriate restrictions.

2. The Driver's License Advisory Board may consider any applicant who has been evaluated by an ophthalmologist or optometrist as being able to safely operate a motor vehicle. The Board may consider peripheral vision, depth perception and color recognition in its recommendation to the Commissioner. Additionally, the Commissioner may prescribe a traffic environment vision test be administered to the applicant or licensee by designated employees of the Division.

3.5. Licensing Criteria for Applicants and Licensees with Biotopic Telescopic Devices

3.5.a. This rule applies to applicants and licensees who use biotopic telescopic devices and who wish to obtain or maintain a driver's license in accordance with West Virginia Code §17B-2B et seq.

3.5.b. An ophthalmologist or optometrist licensed in the United States must certify that the applicant's vision can be corrected with the use of a biotopic telescopic device without field expanders to meet the minimum visual acuity and field of vision standards established in this subsection and must certify that the applicant meets the other criteria provided in West Virginia Code §17B-2B-2 (b)(1).

3.5.c. Applicant must present a current certificate of acceptance from the Division of Rehabilitation indicating acceptance into the Low Vision Driving Program and a starting date prior to eligibility to take the knowledge examination.

3.5.d. The minimum standards for vision for persons who require bioptic lenses to operate a motor vehicle are as follows:

1. Visual acuity of 20-40 distance visual acuity or better through a bioptic telescope lens not exceeding a scope of 4X and 20-200 distance visual acuity or better through carrier lens in one eye;

2. Visual field of vision with horizontal vision of 120 degrees or better and vertical vision of 70 degrees or better which may be met with the use of one or both eyes, and

3. Color vision sufficient to distinguish the traffic light colors red, green and yellow and the colors of turn signals and brake lights;

3.5.e. The Division shall impose and remove an applicant or licensee's Low Vision Driver Training Program restrictions based on the Division of Rehabilitation Services individualized evaluation of each applicant.

3.5.f. The Division may take action in the form of a warning, modification of restriction, suspension for a fixed term, or revocation against any Class G licensee based on :

1. The Division determining that the licensee was operating a motor vehicle in violation of his or her restrictions by receipt of a crash report, ticket, conviction or any other written notification indicating the operation of a motor vehicle,

2. Failure to have a vision report submitted in a timely manner when required by law or requested by the Division; or

3. Receipt of an crash report indicating the licensee caused a crash that resulted in bodily injury or death, or

4. Determination by the Division of Rehabilitation Services that the licensee no longer meets the minimum requirements to obtain and retain a Class G driver's license.

~~3.5~~ 3.6. Administrative Due Process -Any applicant or licensee may appeal the Commissioner's decision of denial, suspension, restriction or non renewal of driving privileges by requesting a hearing. Any request for hearing shall not stay the original order in accordance with the provisions of West Virginia Legislative Rules, Division of Motor Vehicles, Administrative Due Process, 91 CSR 1. An applicant or licensee who intends to submit new or additional information not previously considered by the Driver's License Advisory Board must first submit the new or additional information to the Division for review and recommendation by the Driver's License Advisory Board before proceeding with a hearing.

~~3.5.a.~~ 3.6.a The scope of the hearing is to provide the applicant or licensee the opportunity to show that the Division erred in its decision based upon its records or other evidence previously submitted by the licensee. Only evidence previously submitted by the licensee under the provisions of subsection 3.2 or 3.3 of this rule may be considered at the hearing.

~~3.5.b.~~ 3.6.b. After the hearing and consideration of all the testimony and evidence in the case, the Commissioner shall within seventy (70) calendar days, make and enter an order affirming, rescinding, or modifying his or her earlier order. If an order is not issued within seventy (70) calendar days, the licensee may file a motion with the Commissioner to compel issuance of a decision.

§91-5-4. Reinstatement of Suspended Registration.

4.1. Procedures - The Division shall destroy any license plate received in accordance with any of the provisions of the West Virginia Motor Vehicle Safety Responsibility Law, Chapter

17D of the Code. Accordingly, upon reinstatement of any registration within the registration period, the registrant shall make application for a duplicate or substitute registration or license plate upon the form prescribed for that purpose and remit the fee required by W. Va. Code §17A-10-11.

§91-5-5. Agency Action Upon Receiving Notice of Driving While License is Suspended or Revoked

5.1. Pursuant to W. Va. Code §17B-4-3(c), the Division shall, upon receipt of a second or subsequent conviction for a violation within the last five years for driving while suspended under the provisions of W. Va. Code §17B-4-3(a) or similar municipal ordinance, ~~extend the period of the suspension for an additional~~ shall suspend for a period of one year ninety days. This period of revocation shall begin ~~on the date that the licensee would have otherwise been eligible for reinstatement of his or her license~~ ten (10) days from entry of the conviction on the records of the Division. The determination that the conviction is the second or subsequent conviction shall be based on the records of the Division.

5.2. Pursuant to W. Va. Code §17B-4-3(c), the Division shall, upon receipt of a conviction for driving while his or her license is revoked for a driving under the influence related offense under the provisions of W. Va. Code §17B-4-3(b) or similar municipal ordinance, ~~extend the period of revocation for an additional~~ shall suspend for a period of one year six months. This period of suspension shall begin ~~on the date that the licensee would have otherwise been eligible for reinstatement of his or her license~~ ten (10) days from entry of the conviction on the records of the Division. The determination that the conviction is for driving while the licensee's privilege to operate a motor vehicle while revoked for a driving under the influence related offense shall be based on the records of the Division.

In accordance with the provisions of W. Va. Code §48-15-301(e), the Division does not have jurisdiction to modify, remand, reverse or stay a court order to take action against a license. 15.6. Driving While Suspended or in Violation of Restriction-

Proof of compliance shall not mean Court documents which do not contain the signature of the Circuit Court judge or family law master, unsigned notice from the Child Support Division, copies of certified checks, personal checks, money orders or personal representation.
