

State Tax Department
of West Virginia

Charleston 25305

ARCH A. MOORE, JR.
GOVERNOR

MICHAEL E. CARYL
COMMISSIONER

April 30, 1987

Honorable Ken Hechler
Secretary of State
State Capitol, Suite 157-K
Charleston, West Virginia 25305

Dear Mr. Hechler:

On March 13, 1984, we filed in the State Register two copies of promulgated legislative rules regarding the appraisal of property for periodic statewide reappraisals for ad valorem property tax purposes. These regulations are cited as W. Va. Leg. Reg. 11-1A, Series 1A (effective April 12, 1984). These regulations were filed pursuant to the authority of West Virginia Code § 64-2-11(a)(11) which was added by Committee Substitute for Senate Bill No. 425 which took effect on March 10, 1984.

The above regulations required that on or before April 30 of each year, certain information be filed in the State Register relating to certain factors to be considered in the valuation of oil and natural gas properties. More specifically, the subject matter of the attachments and its relationship to the promulgated regulations may be described as follows:

I. Oil Producing Property Report - Multiplier Variables.

1. For use in the valuation of producing oil properties as defined in § 11.05(d)(1), page 34 of the regulations.
2. This information is provided pursuant to regulations set forth in § 11.05(b), on pages 33 and 34.

FILED
1987 MAY -4 PM 3:16
SECRETARY OF STATE

Honorable Ken Hechler
Page Two
April 30, 1987

II. Natural Gas Producing Property Report -
Multiplier Variables.

1. For use in the valuation of producing natural gas properties as defined in § 11.06(d)(1), page 56 of the regulations.
2. This information is provided pursuant to regulations set forth in § 11.06(b), on pages 55 and 56.

III. Assigned Oil and Natural Gas Reserves Report.

1. For use in the valuation of assigned oil and natural gas reserve properties as defined in § 11.05(d)(2), on page 34, and § 11.06(d)(2), on page 56 of the regulations.
2. This information is provided pursuant to regulations set forth in § 11.05(b), on pages 33 and 34, and § 11.06(b), on pages 55 and 56.

The State Tax Department will accept written public comments on these reports until May 30, 1987, and will consider these reports and the public comments when it issues the final reports. These final reports will be issued on or before July 1, 1987.

We note that under the regulations cited [§ 11.05(b), 11.05(g), 11.06(b), 11.06(g)], the Tax Commissioner is required to annually conduct a review of oil and natural gas agreements transacted prior to the appraisal date. These reports include transactional information for the years 1984, 1985, 1986 and 1987. This additional lease data is being filed to inform the property owners that upon implementation of the reappraisal updates in values which reflect more recent transactions will be considered.

Very truly yours,

Michael E. Caryl
State Tax Commissioner

MEC/sbs

- III. Assigned Oil and Natural Gas Reserve Report
- IV. Exhibits I and II
- V. Oil and Gas Sales and Lease Report

I. Oil Producing Property Report - Multiplier Variables

In compliance with W. Va. Leg. Reg. 11-1A, Series 1A § 11.05(b), page 33 (1984), this report contains the multiplier variables which are to be considered for the valuation of the oil reserves for oil producing property.

Multiplier

The multiplier serves to combine mathematically the effects of the average daily production rate, average industry market price of oil, average industry well operating expense, working and royalty interest, flush and settled production, average production decline rate and a capitalization rate. This multiplier will not be constant for all oil producing properties. The multipliers are to be used for oil producing properties.

Separate multipliers are derived for each of the following twelve (12) categories:

1. Working interest in settled production for average daily production between 0 and .750 barrels per day of oil.
2. Working interest in settled production for average daily production of between .751 and 2.000 barrels per day.
3. Working interest in settled production for average daily production of more than 2.000 barrels per day.
4. Working interest in flush production for average daily production of between 0 and .750 barrels per day.

5. Working interest in flush production for average daily production of between .751 and 2.000 barrels per day.
6. Working interest in flush production for average daily production of over 2.000 barrels per day.
7. Royalty interest in settled production for average daily production between 0 and .750 barrels per day.
8. Royalty interest in settled production for average daily production between .751 and 2.000 barrels per day.
9. Royalty interest in settled production for average daily production in excess of 2.000 barrels per day.
10. Royalty interest in flush production for average daily production between 0 and .750 barrels per day.
11. Royalty interest in flush production of average daily production of between .751 and 2.000 barrels per day.
12. Royalty interest in flush production for average daily production of 2.000 barrels per day.

The components on which the multipliers are based are listed below, accompanied by an explanation of their derivation.

(A) Deemed Average Daily Production Rate - This value is predetermined in the regulations (§ 11.05(e)(7)) as follows:

<u>Classification</u>	<u>Deemed ADP Rate</u>
(a) .0 - .750 ADP	.750 ADP
(b) .751 - 2.000 ADP	1.500 ADP
(c) 2.000+	4.000 ADP

(B) Average Industry Market Price - This component is determined through a review of the price paid per barrel for West Virginia crude oil by the primary purchasers of West Virginia crude oil on July 1, 1987. In conjunction with the regulations, (see § 11.05(e)(4), this gross price is to be adjusted for Federal Windfall Profits tax and West Virginia Business and Occupation Tax. The preliminary results of the review of these questionnaires is that \$15.00 per barrel is the average gross industry market price for oil.

(C) Average Industry Well Operating Expense - This component is determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and natural gas producers and associations in West Virginia. (Sample questionnaire is attached as Exhibit I.) Information was requested regarding the average annual operating expenses for a "typical" West Virginia oil well given July 1, 1987 economic conditions. The preliminary results of the review of these questionnaires to be used in the development of the multipliers are as follows:

<u>Category</u>	<u>Average Industry Well Operating Expense</u>
0-.750	\$3,300/year
.750-2.000	\$4,400/year
2.001 +	\$5,800/year
Flush Wells	\$6,400/year

(D) Capitalization Rate - The capitalization rate is developed as a summation of its three components: discount, recapture, and property tax.

(1) Discount rate - In estimating the discount component, consideration was given to three (3) generally accepted approaches. These are: (1) Market comparison, (2) Summation technique, and (3) Bands of investment.

Data used in developing these discount approaches is accomplished by giving attention to the following items:

-- Research and review of willing-buyer, willing-seller sales of oil and gas operations that have taken place in West Virginia.

-- Review of the Federal Reserve Statistical Release for the period July, 1983 to July, 1986, with special attention given to the auction rates for 90-day Treasury Bills, 6-month Treasury Bills and 1-year Treasury Bills.

-- Review of a questionnaire sent to West Virginia lending institutions which were identified as having been involved in offering financial services to mineral

industries in West Virginia and/or the Appalachian area. (Sample questionnaire is attached as Exhibit II.) The questionnaire included responses for the following topics:

- Interest rates and factors involved in financing active operations for various types of mineral properties including oil and gas for 1984, 1985, and 1986.
- Interest rates involved in financial acquisition of various types of mineral reserve properties for 1984, 1985, and 1986.
- Equity-capital requirements for financing active operations and for acquisition of reserves.
- Allowances for second-mortgage possibilities for equity-capital requirements.
- Management charges.

In determining the discount rate, the summation approach was found to be the only applicable method. The market comparison approach was not used because there was an insufficient number of producing oil and natural gas property sales to statistically support conclusions for typical return of and return on investments. The bands of investment technique was not used because the information received from questionnaires concerning equity capital requirements was insufficient to support typical financing conclusions.

The summation technique is composed of four subcomponents, as discussed below.

(a) Safe Rate - 90-day Treasury Bills [For further discussions of the determination of the Safe Rate, see W. Va. Leg. Reg. 11-1A, Series 1A § 11.05(e)(6)(A), page 41 (1984).]

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.123%	10.184%	7.088%
August	9.400	10.510	7.163
September	9.130	10.405	7.078
October	8.714	9.872	7.190
November	8.830	8.665	7.203
December	9.003	8.096	7.060
January	8.914	7.775	7.045
February	9.113	8.218	7.025
March	9.505	8.565	6.540
April	9.678	7.970	5.993
May	9.960	7.488	6.145
June	9.938	7.008	6.166

Fiscal Year Average -	(83-84)	=	9.27%
	(84-85)	=	8.75%
	(85-86)	=	6.81%

Although a three-year period for 90-day Treasury Bills was reviewed, only the most recent fiscal year data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent fiscal year data and with the valuation formula's use of one year of production information.

(b) Risk Rate - interest differential between loan rates and 90-day Treasury Bills. [For further

discussions of the determination of the Risk Rate,
 see W. Va. Leg. Reg. 11-1A, Series 1A
 § 11.05(e)(6)(A), page 41 (1984).]

	<u>1984</u>	<u>1985</u>	<u>1986</u>
(1)	12%	11.5%	9.5%
(2)	15%	13%	12.5%
(3)	Prime + 2.5%	Prime + 2.25%	Prime + 2.25%
(4)	11% to 15%	9.5% to 13%	8.5% to 12%
(5)	Prime + 2%	Prime + 2%	Prime + 2%
(6)	14%	13.25%	--
(7)	14%	13%	12.5%
(8)	12%	12.5%	10.5%
(9)	15%	15%	14%
(10)	15% to 16%	12% to 13%	10% to 12%
(11)	13%	12%	11%
(12)	13% to 18%	13% to 18%	10% to 18%
(13)	14%	14%	14%
(14)	10.5% to 12%	8.5% to 11%	7.5% to 10%
(15)	15%	15%	13%
(16)	Prime + 1% - 3%	Prime + 1% - 3%	Prime + 1% - 3%
(17)	13%	12%	11%
(18)	14%	13.5%	13%
(19)	18%	16%	15%
(20)	18%	16%	15%
(21)	10.5% to 12%	8.5% to 11%	7.5% to 10%
(22)	12%	11%	10%
(23)	13.25%	12%	Prime + 1% - 3%
(24)	13%	13%	12%
(25)	--	Chase + 2.5%	Chase + 1.5%
(26)	14%	12%	10.25%
(27)	--	12%	10.5%
(28)	14%	14%	14%
(29)	13.5%	11.75%	Prime + 2%
(30)	12%	11%	9.5%
(31)	14%	11%	10.5%

Although a three-year period of loan rates and prime rates was reviewed, only the most recent annual data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent annual data, and with the valuation formula's use of one-year production information.

(c) Non-Liquidity Rate - interest differential between 90-day Treasury Bill rates and 6-month or one-year Treasury Bill rates which reflect time necessary to sell active properties. [For further discussions of the determination of the Non-Liquidity Rate, see W. Va. Leg. Reg. 11-1A, Series 1A § 11.05(e)(6)(A), page 40 (1984).]

6-month Treasury Bills

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.29%	10.58%	7.16%
August	9.53	10.65	7.35
September	9.19	10.51	7.27
October	8.90	10.05	7.32
November	8.89	8.99	7.26
December	9.14	8.36	7.09
January	9.06	8.03	7.13
February	9.13	8.34	7.08
March	9.58	8.92	6.60
April	9.83	8.31	6.07
May	10.31	7.75	6.16
June	10.55	7.16	6.28

Fiscal Year Average - (83-84) = 9.450%
 (84-85) = 8.971%
 (85-86) = 6.898%

1-Year Treasury Bills

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.36%	10.99%	7.09%
August	9.77	10.79	7.60
September	9.64	10.84	7.36
October	9.13	10.32	7.42
November	9.03	9.45	7.33
December	9.16	8.38	7.06
January	9.04	8.39	7.31
February	9.24	8.46	7.19
March	9.68	9.24	6.61
April	9.86	8.44	5.94
May	10.64	7.94	6.17
June	10.92	7.18	6.59

Fiscal Year Average - (83-84) = 9.623%
 (84-85) = 9.202%
 (85-86) = 6.973%

Although a three-year period for 6-month and 1-year Treasury Bills was reviewed, only the most recent fiscal year data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent fiscal year data, and with the valuation formula's use of one-year production information.

(d) Management Rate - charges for management of investment portfolios (from questionnaire).

Rates: (1) 5% of gross income

(2) \$5/\$1,000 of principal

(2) Recapture Rate - The standard mid-year life present worth of one table (compound interest premise) has a built-in factor for recapture. Inclusion of a recapture component in the capitalization rate is therefore not appropriate.

(3) Property Tax Rate - The property tax component will be derived by multiplying the assessment rate by the statewide average of the tax rates on Class III property. (§ 11.05(e)(3))

Average statewide Class III Levy Rate for properties in West Virginia are:

<u>Year</u>	<u>Levy Rate</u>	X	<u>Assess/App. Rate</u>	=	<u>Property Tax Rate</u>
1985-86	2.45%	X	60%	=	1.470%

(e) Average Industry Production Decline Rate -

This variable will be determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and natural gas producers and associations in West Virginia. (Sample questionnaire is attached as Exhibit I.) Information was requested regarding the expected average production decline rate for a "typical" West Virginia oil well as of July 1, 1987. The preliminary results of the review of these questionnaires to be used in the development of the multipliers are as follows:

<u>Category</u>	<u>Settled Average Industry Production Decline Rate</u>
0.-.750	5.0% per year
.751-2.000	6.5% per year
2.000 +	9.0% per year

<u>Category</u>	<u>Flush Average Industry Production Decline Rate</u>
Year 1	34% per year
Year 2	20% per year

(f) Percentage Interest in the Oil - The ownership of the oil is usually divided as a result of a lease or other arrangement. To determine the correct apportionment of ownership in the oil, a study of leases throughout the State of West

Virginia was conducted. The actual lease book, page numbers, lessors, lessees and royalty interest are included in the assigned oil and natural gas reserve report. The Tax Department is of the opinion that the typical lease arrangement allocates the ownership of the oil and gas to be produced as follows:

Royalty Interest = 1/8

Working Interest = 7/8

(g) Multipliers - The multipliers will result from an income analysis performed for each category using the variables discussed in this report, as modified by a preponderance of public comment on the same.

II. Natural Gas Property Report - Multiplier Variables

In compliance with W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(b), page 55 (1984), this report contains the multiplier variables which are to be used for the valuation of the natural gas reserves for natural gas producing property.

Multiplier

The multiplier serves to combine mathematically the effects of the average production rate, average industry market price of natural gas, average industry well operating expense, working and royalty interest, flush and settled production, average production decline rate and a capitalization rate. This multiplier will not be constant for all natural gas producing properties. The multipliers are to be used for natural gas producing properties.

Separate multipliers are derived for each of the following four (4) categories:

1. Working interest in settled production
2. Working interest in flush production
3. Royalty interest in settled production
4. Royalty interest in flush production

The components on which the multipliers are based are listed below, accompanied by an explanation of their derivation.

(A) Average Production Rate - This value is determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and gas producers and associations in West

Virginia. (Sample questionnaire is attached as Exhibit I.) Information was requested concerning the average annual production of a "typical" West Virginia gas well given July 1, 1987 economic conditions. The preliminary results of the review of these questionnaires is that 8600 MCFs is the average production rate for year one of the economic analysis.

(B) Average Industry Market Price - This component is determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and gas producers and associations in West Virginia. (Sample questionnaire is enclosed.) Information was requested concerning the average market price received for natural gas at the well head. The preliminary results of the review of these questionnaires to be used in the development of the multipliers is that \$2.23 per MCF is the average industry market price for gas.

(C) Average Industry Well Operating Expense - This component is determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and natural gas producers and associations in West Virginia. (Sample questionnaire is attached to Exhibit I.) Information was requested regarding the average annual operating expenses for a "typical" West Virginia natural gas well given July 1, 1987 economic conditions. The preliminary results of

the review of these questionnaires to be used in the development of the multipliers is that \$3,400 per year shall be the average industry well operating expenses.

(D) Capitalization Rate - The capitalization rate is developed as a summation of its three components: discount, recapture, and property tax.

(1) Discount rate - In estimating the discount component, consideration was given to three (3) generally accepted approaches. These are: (1) Market comparison, (2) Summation technique, and (3) Bands of investment.

Data used in developing these discount approaches was accomplished by giving attention to the following items:

-- Research and review of willing-buyer, willing-seller sales of oil and gas operations that have taken place in West Virginia.

-- Review of the Federal Reserve Statistical Release for the period July, 1983 to July, 1986, with special attention given to the auction rates for 90-day Treasury Bills, 6-month Treasury Bills and 1-year Treasury Bills.

-- Review of a questionnaire sent to West Virginia lending institutions which were identified as having been involved in offering financial services to mineral industries in West Virginia and/or the Appalachian area. (Sample questionnaire is attached as Exhibit

II.) The questionnaire included responses for the following topics:

- Interest rates and factors involved in financing active operations for various types of mineral properties including oil and gas for 1984, 1985, and 1986.
- Interest rates involved in financial acquisition of various types of mineral reserve properties for 1984, 1985, and 1986.
- Equity-capital requirements for financing active operations and for acquisition of reserves.
- Allowances for second-mortgage possibilities for equity-capital requirements.
- Management charges.

In determining the discount rate, the summation approach was found to be the only applicable method. The market comparison approach was not used because there was an insufficient number of producing oil and natural gas property sales to statistically support conclusions for typical return of and return on investments. The bands of investment technique was not used because the information received from questionnaires concerning equity capital requirements was insufficient to support typical financing conclusions.

The summation technique is composed of four subcomponents, as discussed below.

(a) Safe Rate - 90-day Treasury Bills [For further discussions of the determination of the Safe Rate, see W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(e)(7)(A), page 63 (1984).]

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.123%	10.184%	7.088%
August	9.400	10.510	7.163
September	9.130	10.405	7.078
October	8.714	9.872	7.190
November	8.830	8.665	7.203
December	9.003	8.096	7.060
January	8.914	7.775	7.045
February	9.113	8.218	7.025
March	9.505	8.565	6.540
April	9.678	7.970	5.993
May	9.960	7.488	6.145
June	9.938	7.008	6.166

Fiscal Year Average -	(83-84)	=	9.27%
	(84-85)	=	8.75%
	(85-86)	=	6.81%

Although a three-year period for 90-day Treasury Bills was reviewed, only the most recent fiscal year data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent fiscal year data, and with the valuation formula's use of one-year production information.

(b) Risk Rate - interest differential between loan rates and 90-day Treasury Bills. [For further discussions of the determination of the Risk Rate, see W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(e)(7)(A), page 63 (1984).]

	<u>1984</u>	<u>1985</u>	<u>1986</u>
(1)	12%	11.5%	9.5%
(2)	15%	13%	12.5%
(3)	Prime + 2.5%	Prime + 2.25%	Prime + 2.25%
(4)	11% to 15%	9.5% to 13%	8.5% to 12%
(5)	Prime + 2%	Prime + 2%	Prime + 2%
(6)	14%	13.25%	--
(7)	14%	13%	12.5%
(8)	12%	12.5%	10.5%
(9)	15%	15%	14%
(10)	15% to 16%	12% to 13%	10% to 12%
(11)	13%	12%	11%
(12)	13% to 18%	13% to 18%	10% to 18%
(13)	14%	14%	14%
(14)	10.5% to 12%	8.5% to 11%	7.5% to 10%
(15)	15%	15%	13%
(16)	Prime + 1% - 3%	Prime + 1% - 3%	Prime + 1% - 3%
(17)	13%	12%	11%
(18)	14%	13.5%	13%
(19)	18%	16%	15%
(20)	18%	16%	15%
(21)	10.5% to 12%	8.5% to 11%	7.5% to 10%
(22)	12%	11%	10%
(23)	13.25%	12%	Prime + 1% - 3%
(24)	13%	13%	12%
(25)	--	Chase + 2.5%	Chase + 1.5%
(26)	14%	12%	10.25%
(27)	--	12%	10.5%
(28)	14%	14%	14%
(29)	13.5%	11.75%	Prime + 2%
(30)	12%	11%	9.5%
(31)	14%	11%	10.5%

Prime Rates (Range of Rates)

January 1984 - December 1984 - 15.5% to 20.5%
January 1985 - December 1985 - 11.5% to 16.5%
January 1986 - December 1986 - 10.5% to 11.25%

Although a three-year period of loan rates and prime rates was reviewed, only the most recent annual data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent annual data, and with the valuation formula's use of one-year production information.

(c) Non-Liquidity Rate - interest differential between 90-day Treasury Bill rates and 6-month or one-year Treasury Bill rates which reflect time necessary to sell active properties. (For further discussions of the determination of the Non-Liquidity Rate, see W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(e)(7)(A), page 62 (1984).]

6-month Treasury Bills

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.29%	10.58%	7.16%
August	9.53	10.65	7.35
September	9.19	10.51	7.27
October	8.90	10.05	7.32
November	8.89	8.99	7.26
December	9.14	8.36	7.09
January	9.06	8.03	7.13
February	9.13	8.34	7.08
March	9.58	8.92	6.60
April	9.83	8.31	6.07
May	10.31	7.75	6.16
June	10.55	7.16	6.28

Fiscal Year Average - (83-84) = 9.450%
 (84-85) = 8.971%
 (85-86) = 6.898%

1-Year Treasury Bills

	<u>83-84</u>	<u>84-85</u>	<u>85-86</u>
July	9.36%	10.99%	7.09%
August	9.77	10.79	7.60
September	9.64	10.84	7.36
October	9.13	10.32	7.42
November	9.03	9.45	7.33
December	9.16	8.38	7.06
January	9.04	8.39	7.31
February	9.24	8.46	7.19
March	9.68	9.24	6.61
April	9.86	8.44	5.94
May	10.64	7.94	6.17
June	10.92	7.18	6.59

Fiscal Year Average - (83-84) = 9.623%
 (84-85) = 9.202%
 (85-86) = 6.973%

Although a three-year period for 6-month and 1-year Treasury Bills was reviewed, only the most recent fiscal year data will be used. This is done so that the capitalization rate components will be consistent with the other variables which are based on the most recent fiscal year data, and with the valuation formula's use of one-year production information.

(d) Management Rate - charges for management of investment portfolios (from questionnaire).

Rates: (1) 5% of gross income

(2) \$5/\$1000 of principal

(2) Recapture Rate - The standard mid-year life present worth of one table (compound interest premise) has a built-in factor for recapture. Inclusion of a recapture component in the capitalization rate is therefore not appropriate.

(3) Property Tax Rate - The property tax component will be derived by multiplying the assessment rate by the statewide average of the tax rates on Class III property. (\$ 11.06(e)(3)).

Average statewide Class III Levy Rate for properties in West Virginia are:

<u>Year</u>	<u>Levy Rate</u>	X	<u>Assess/App. Rate</u>	=	<u>Property Tax Rate</u>
1985-86	2.45%	X	60%	=	1.470%

(e) Average Industry Production Decline Rate -

This variable is determined through a review of responses to a questionnaire distributed by the West Virginia Tax Department to 116 oil and natural gas producers and associations in West Virginia. (Sample questionnaire is attached as Exhibit I.) Information was requested regarding the expected average production decline rate for a "typical" West Virginia oil well as of July 1, 1987. The preliminary results of the review of these questionnaires to be used in the development of the multipliers is that six percent (6%) per year is the average industry production decline rate for settled production. For flush production, the average industry production decline rate is thirty-three percent (33%) for year one and nineteen percent (19%) for year two.

(f) Percentage Interest in the Natural Gas - The ownership of the natural gas is usually divided as a result of a lease or other arrangement. To determine the correct apportionment of ownership in the natural gas, a study of leases throughout the State of West Virginia was conducted. The actual lease book, page numbers, lessors, lessees and royalty interest are included in the assigned

oil and natural gas reserve report. This report concludes that the typical lease arrangement allocates the ownership of the oil and gas to be produced as follows:

Royalty Interest = 1/8

Working Interest = 7/8

(g) Multipliers - The multipliers are a result of an income analysis performed for each category using the variables discussed in this report, as modified by a preponderance of public comment on the same.

III. Assigned Oil and Natural Gas Reserve Report

In compliance with the W. Va. Leg. Reg. 11-1A, Series 1A § 11.05(b), page 33 (1984) and W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(b), page 55 (1984), this report contains the information to be used for the valuation of assigned oil and natural gas reserve property. Oil and natural gas reserve property includes properties as defined in W. Va. Leg. Reg. 11-1A, Series 1A § 11.05(d)(2), page 34 (1984) and W. Va. Leg. Reg. 11-1A, Series 1A § 11.06(d)(2), page 56 (1984). Since oil and natural gas rights are almost exclusively owned and leased in tandem, the valuations set forth in this report shall apply to oil and natural gas rights owned conjunctionally. When oil and natural gas rights are owned separately from each other, the valuations set forth in this report shall apply to individual oil rights and individual natural gas rights.

A. Oil and Natural Gas Lease Agreements

A review of recorded oil and natural gas lease agreements was performed in every county. The information is submitted in the enclosed computer printout and includes the following information (when available) for each lease: (1) region (as previously determined), (2) district, (3) deed book, (4) page number, (5) lease date of record, (6) lessor, (7) lessee, (8) acreage, (9) lease term, (10) delay rental (also called lease rate), (11) royalty interest in production, (12) shut-in rental, (13) storage rental.

B. Assigned Oil and Natural Gas Reserve Values

This value for each county is determined by taking the average delay rental (or lease rate) for each county and multiplying it by a multiplier representing the average lease term.

The multiplier is determined by accessing an Inwood mid-year table at the capitalization rate for the average number of years of the lease term for each county. An example calculation follows:

County X

Average delay rental	=	\$ 4.25/acre
Average lease term	=	7 yrs.
Capitalization rate	=	15%
Multiplier	=	4.46
Assigned Oil & Natural Gas		
Reserve Value	=	\$4.25 X 4.46 = \$18.96

Dear Oil and Gas Producer:

This office is presently reviewing the information used in our appraisal of oil and gas properties. Regulations require us to contact associations, officials, and individuals who are knowledgeable with oil and gas operations to secure information pertinent to our procedures. This correspondence fulfills that duty.

Our appraisal of oil and gas producing properties occurs through the use of an income approach. Due to the lack of available resources to perform an income analysis on individual wells, properties, or fields, we have instead constructed a "typical" West Virginia well for a category of production that is utilized on a mass appraisal basis. We appreciate the difficulties in stereotyping an oil or gas well, but seek your knowledge of the oil and gas industry to answer these questions.

We request that you complete the enclosed questionnaire. This method of data collection makes our well profile as scientific as possible with limited resources.

If you have any questions concerning this request, or if you wish additional questionnaires, please contact Scott Burgess at (304) 348-3940. Completed questionnaires should be returned by April 1, 1987 to:

State Tax Department
Property Tax Division
P. O. Drawer 2389
Charleston, West Virginia 25328

Attention: Scott Burgess

Thank you for your time and effort. We anticipate your response.

Very truly yours,

Michael E. Caryl
State Tax Commissioner

QUESTIONNAIRE

NAME: _____ Date: _____

POSITION: _____

ORGANIZATION: _____

OIL PROPERTIES

The following questions are based on a "typical" West Virginia oil well in settled production and given July 1, 1987 economic conditions. The well has a low water-oil ratio and is in primary production.

1. What would be the average annual operating expenses for this well? (Do not include any taxes or depletion costs as part of the operating expenses.)

If the well produced:

.01 to .75 bbls oil per day \$ _____ per year

.76 to 2.0 bbls oil per day \$ _____ per year

greater than 2.0 bbls oil per day \$ _____ per year

2. What would be the expected average production decline rate during the remaining life of this well?

If the well produced:

.01 to .75 bbls oil per day _____ % per year

.76 to 2.0 bbls oil per day _____ % per year

greater than 2.0 bbls oil per day _____ % per year

3. What would be the average market price received for a barrel of oil at the wellhead for this well?

\$ _____

4. How many acres would this well drain over its life if it were a shallow well (less than 6,000 feet or not reaching the Onadanga formation)?

_____ acres

5. If this well was a new well in flush production (first two years of production), what production decline rate would be anticipated for the first two years of production?

1st year _____ % 2nd year _____ %

6. If this well was a new well in flush production, what would be the average annual operating expenses for this well for the first two years?

\$ _____ per year

NATURAL GAS PROPERTIES

The following questions are based on a "typical" West Virginia natural gas well in settled production and given July 1, 1987 economic conditions.

1. What would be the average annual production for this "typical" gas well?

_____ MCF

2. What would be the average annual operating expenses for this gas well? (Do not include any taxes or depletion costs as part of the operating expenses.)

\$ _____ per year

3. What would be the average market price received for gas at the wellhead for this well?

\$ _____ MCF

4. What would be the expected average production decline rate during the remaining life of this well?

_____ % per year

5. How many acres would this well drain over its life if it were a shallow well (less than 6,000 feet or not reaching the Onadanga formation)?

_____ acres

6. If this well was a new well in flush production (first two years of production), what production decline rate would be anticipated for the first two years?

1st year _____ % 2nd year _____ %

TO ALL BANKING INSTITUTIONS AND/OR
SAVINGS AND LOAN ASSOCIATIONS
STATE OF WEST VIRGINIA

Ladies and Gentlemen:

On March 10, 1984, the West Virginia Legislature passed specific rules and regulations which describe the methodology to be used in valuing natural resource properties for ad valorem property tax purposes. In connection with these rules and regulations, the West Virginia Tax Department is required to conduct an annual survey of lending institutions to gain information on the interest rates established on loans for acquisition and/or development of natural resource properties. Therefore, attached please find a questionnaire which has been developed to meet this requirement.

Please note that your prompt and continued assistance in completing this survey is appreciated. Should you have any questions concerning this questionnaire, please contact Mr. Mark Scott Burgess at (304) 348-3940. Also, completed questionnaires should be returned prior to March 1, 1987 to:

West Virginia Tax Department
Property Tax Division
814 Virginia Street, East
Charleston, West Virginia 25301

WEST VIRGINIA TAX DEPARTMENT
NATURAL RESOURCE FINANCING QUESTIONNAIRE
FOR

(Name of Respondent)

1. During the three years (shown below), what range of interest rates did you require on loans to assist companies and/or individuals in financing mineral operations?

Type of Mining Operation	1986	1985	1984
A. Coal	_____ %	_____ %	_____ %
B. Oil/Gas	_____ %	_____ %	_____ %
C. Minor Minerals (Limestone, Shale, Sandstone, etc.)	_____ %	_____ %	_____ %

2. During the three years (shown below), what range of interest rates did you require on loans to assist companies and/or individuals in the acquisition of reserve mineral properties?

Type of Reserve	1986	1985	1984
A. Coal	_____ %	_____ %	_____ %
B. Oil/Gas	_____ %	_____ %	_____ %
C. Minor Minerals	_____ %	_____ %	_____ %

3. In short, describe the components of the above mentioned rates?

4. What kind of equity capital (down payment) did you require for financing mineral mining operations and/or financing acquisition of reserve mineral properties? _____ %

5. What investment management charge(s), if any, do you require on mineral loans (amount or percentage)? _____ %
