### **§110-13Q-3. Overview of the Credits.**

3.1. The tax incentive for developing patents in this State is a credit equal to 20% of the royalties, license fees or other consideration received by the developer of a patent in the taxable year who has an agreement, as defined in Subsection 2.1 of this rule, except as otherwise provided in this section. A new tax credit shall not accrue for any royalties, license fees or other consideration received after December 31, 2016.

3.1.1. A credit is not allowed under Subsection 3.1 or 3.2 of this rule for a patent developed entirely outside this State.

3.1.2. When a patent has been developed through activity in this State under Subsection 3.1., and through activity in one or more other states, any royalties, license fees or other consideration received by the developer of the patent must be multiplied by a fraction, the numerator of which is the direct costs of developing the patent in this State under an agreement, and the denominator of which is the total direct costs of developing the patent. The product of this calculation is to be used when determining the credit allowed under Subsection 3.1 or 3.2 of this rule.

3.1.3. If a person other than a developer of the patent receives a portion of a royalty that would be eligible for a tax credit under Subsection 3.1 or 3.2 of this rule because of a business association, licensing agreement or otherwise, that person may receive the tax credit allowable only as to the portion of royalties that person actually receives;

3.1.4. Unused credit accrued under Subsection 3.1 or 3.2 of this rule may be carried forward until used only for a period of nine consecutive years after the taxable year in which the credit allowed by this section is first available.

3.1.5. A credit is not allowed under Subsection 3.1 or 3.2 of this rule for a patent if it was sold, leased or licensed to a third party prior to January 1, 2011, or before that day if it was reduced to practice for purely commercial purposes by the developer or a person related to the developer, as that term is defined in subsection (b), Section 267 of the Internal Revenue Code of 1986, as amended, and in West Virginia Code §§ 11-21-9 or 11-24-3; and

3.1.6. A credit is not allowed under Subsection 3.1 or 3.2 of this rule beginning with the eleventh taxable year after the patent was first directly used in a manufacturing process or product.

3.1.7. A credit is not allowed under this rule for any activity, investment, assets, or expenditures for which any of the tax credits authorized under West Virginia Code §§ 11-13D-1 et seq., 11-13E-1 et seq., 11-13Q-1 et seq., 11-13R-1 et seq., 11-13S-1 et seq., or 11-13X-1 et seq., have been authorized, taken or allowed.

3.2. For any taxable year in which a person who claimed the credit under Subsection 3.1 of this rule in the previous credit year invests an amount equal to at least 80% of the credit claimed under Subsection 3.1 of this rule for that previous credit year in depreciable property for purposes of developing additional patents, the person claiming the credit may take a credit of 30% of the royalties, license fees or other consideration received by the developer of a patent who has an agreement, as defined in Subsection 2.1 of this rule, and was developed in its entirety after January 1, 2011. This tax credit is available as an alternative to the tax credit in Subsection 3.1 of this rule, and may not accrue jointly. A new tax credit shall not accrue for any royalties, license fees or other consideration received after December 31, 2016.

3.3. The tax credit for use in a manufacturing process or product in this State is a credit equal to 20% of the net profit attributable to a patent, as determined under Subsection 5.1, et seq. of this rule that was developed in this State pursuant to the eligibility criteria for the credit in Subsections 3.1 and 3.2 of this rule, and is used in a manufacturing process or product in this State for the first time after January 1, 2011. A tax credit shall not be allowed for any net profit attributable to a patent received after December 31, 2016.

3.4. For any taxable year in which a person claiming the credit under Subsection 3.3 of this rule invests an amount equal to at least 80% of the credit claimed under Subsection 3.3 of this rule for that taxable year in capital improvements to add product lines to or increase productivity in this State during the next taxable year, the person claiming the credit may take a credit of 30% of the net profit attributable to a patent that was developed in this State pursuant to the eligibility criteria for the credit in Subsections 3.1 and 3.2 of this rule, and is used in a manufacturing process or product in this State for the first time after January 1, 2011. This tax credit is available as an alternative to the tax credit in Subsection 3.1 of this rule, and may not accrue jointly. A new tax credit shall not accrue for any net profit attributable to a patent received after December 31, 2016.

#### **§110-13Q-4. Application of the Credits.**

4.1. This credit may be applied only after all other allowable credits are applied and may in no case reduce the tax owed to below zero.

This credit shall be applied against an eligible taxpayer's Business Franchise Tax liability before any remaining credit may be applied against that taxpayer's Corporation Net Income Tax liability. The credit may only be applied to a Personal Income tax liability if the credit holder is either a sole proprietor or a pass-through entity.

4.2.1. In no event may any remaining credit be applied against both Personal Income Tax liability and Corporation Net Income Tax liability, unless:

4.2.1.1. The taxpayer is a pass-through entity treated as a partnership for federal income tax purposes. In that case, the amount of credit remaining, if any, after

application against the business franchise tax shall flow through to the partners in the same proportion as distributive share flows through to them and the credit shall apply to the liabilities of the partners for West Virginia income taxes.

4.2.2. In no event may the credit applied exceed the eligible taxpayer's liability for business franchise tax and corporation net income tax for the taxable year, or if the eligible taxpayer is a pass-through entity, the taxpayer's liability for business franchise tax and the liabilities of the partners for West Virginia income taxes, for the taxable year.

4.3. Any amount of credit allowed which remains after being applied against eligible taxes for the tax year may be carried forward for a maximum of 9 years following the taxable year in which the credit first accrued to the taxpayer or until no credit remains, whichever comes first.

4.4. If a taxpayer does not claim the credit in the first tax year when it is available to be used, it is forfeited and may not be used in any other tax year. However, the unclaimed credit is not forfeited if it is subsequently claimed for that first year on a timely filed amended return.

4.5. The credit may be claimed only by one taxpayer for a given period of time, and may not be assigned to any other taxpayer. However, when the credit is available to be taken against the personal income tax, the credit may be claimed on the joint income tax return if either or both of them is an eligible taxpayer.

4.6. A credit is not allowed under this rule for consideration received by the developer from a person related to the developer, as defined in subsection (b), Section 267 of the Internal Revenue Code of 1986, as amended for patents developed for direct use in a manufacturing process or product.

5.1. *Net profit attributable to a patent when integrated into an ongoing manufacturing process.* The net profit of a taxpayer that is attributable to a patent when integrated into a current manufacturing process is that amount of West Virginia taxable income that is in excess of the base net profit accrued through the manufacturing process that has an integrated patent eligible for the credit under Subsection 3.1 of this rule.

5.1.1. "Base net profit accrued through the manufacturing process" is equal to that portion of West Virginia taxable income attributable to an ongoing manufacturing process in the year immediately preceding introduction of the patent to the manufacturing process.

5.2. *Net profit attributable to a patent when used in a current product.* The net profit of a taxpayer that is attributable to a patent when used in a current product is that amount of

West Virginia taxable income that is in excess of base net profit accrued through the sale or lease of a product that has an integrated patent eligible for the credit under Subsection 3.1 of this rule.

5.2.1. "Base net profit accrued through the sale or lease of a product" is equal to that portion of West Virginia taxable income attributable to the sale or lease of a product in the year immediately preceding introduction of the patent to the product.

5.3. *Net profit attributable to a patent when used in a new manufacturing process.* The net profit of a taxpayer that is attributable to a patent that is used in a new manufacturing process is equal to the total net profit accrued through the manufacturing process using the patent multiplied by a fraction, the numerator of which is the total cost of using the patent, the denominator of which is the total cost of the manufacturing process.

5.3.1. "Net profit accrued through the manufacturing process" is equal to that portion of West Virginia taxable income directly attributable to the manufacturing process using the patent.

5.3.2. "Total cost of using the patent" is equal to:

5.3.2.1. The total amount of royalties, license fees or other consideration paid for the right to use the patent;

5.4. *Net profit attributable to a patent when used in a new product.* The net profit of a taxpayer that is attributable to a patent that is used in a new product is equal to the total net profit accrued through the sale or lease of a product using the patent multiplied by a fraction, the numerator of which is the total cost of using the patent, the denominator of which is the total cost of producing the product.

5.4.1. "Total cost of using the patent" is equal to:

5.4.1.1. The total amount of royalties, license fees or other consideration paid for the right to use the patent;

5.4.1.2. In the case of the developer of the patent, total cost associated with the development of the patent divided by the 20 year life of the patent; or

5.4.1.3. In the case of any other patent holder, total cost of acquiring the patent divided by the remaining years of 20 year life of the patent.

5.5. Amounts received from, by or between related persons, as defined in subsection (b), Section 267 of the Internal Revenue Code of 1986, as amended, are disallowed when calculating net profit attributable to a patent in subsections 5.1., 5.2, 5.3, and 5.4 of this rule.

## **§110-13Q-6. Uses of credit; transferability.**

6.1. When an eligible taxpayer merges with another entity and the resulting entity remains an eligible taxpayer, but the taxable year of the predecessor eligible taxpayer and the taxable year of the successor eligible taxpayer are different, the amount of credit available to the predecessor is the amount available if the tax years were not different. However, the amount of credit apportioned to the successor is limited to that portion of the predecessor's credit which remains, multiplied by a fraction the numerator of which is the number of days during the same tax year of the successor which coincide with the calendar days remaining in the tax year of the predecessor if it had not merged, and the denominator of which is the number of days remaining in the same tax year of the predecessor if it had not merged. If any of the predecessor's credit which remains cannot be used by the successor in the same tax year, it is forfeited and may not be carried over or carried back to any other tax year.

6.2. A recapture or loss of credit shall not occur merely as a result of a change in the form of conducting the business as long as the successor entity is also an eligible taxpayer, and the successor is entitled to all of the credit for the tax year in which the change occurred.

6.2.1. A change in the form of conducting business is a change in the type of business entity, such as a change from a C corporation to an S corporation or a limited liability company, or from a sole proprietorship to a C or S corporation, limited liability company or partnership.
