§4-1-3. Qualifications for Receiving and Maintaining a License to Practice Chiropractic.

**BRIEF SUMMARY OF PROPOSAL
AND
STATEMENT OF CIRCUMSTANCES REQUIRING THE RULE**

REGULATION OF CHIROPRACTIC PRACTICE 4 CSR 1

FEES 4 CSR 6

The West Virginia Board of Chiropractic proposes amendments to Title 4, Series 1 of the West Virginia Code of State Rules. The proposed amendments are intended to update, clarify, and address problems within the rule so the Board can effectively regulate the practice of chiropractic within the State. The Board has not revised this Rule since 2005. The Board is also seeking to revise its licensing-fee schedule, which has not seen any increase since 1999. These upward fee revisions are necessary for the Board to have sufficient funds to adequately perform its statutorily mandated duties. The Board unanimously approved these proposed amendments.

The highlights of the proposed amendments to the rule, as well as the circumstances requiring these rule changes, are as follows:

- West Virginia is currently one of two states that require a minimum score of 475 on Part IV of the National Board of Chiropractic Examiners national examination; every other state accepts the National Board's passing score of 375. The proposed amendments would revise West Virginia's qualification to the passing score of 375 and make West Virginia's exam passage requirements uniform with the vast majority of states in the country and make West Virginia a more attractive and competitive place for chiropractors to establish a practice.
- The current Rule provides that certain concurrent degree programs satisfy licensure requirements for no reason other than the fact that they are located in the State of West Virginia. The proposed amendments would eliminate this exception and make all applicants subject to the same requirements.
- Presently, the Board requires that doctors of chiropractic attend six hours of specialized continuing education that is only offered in the State of West Virginia. This makes it difficult for chiropractors who have a West Virginia license, but who practice exclusively outside of the State, to maintain their West Virginia license. As a result, some of those chiropractors may decide to surrender their West Virginia licenses to avoid the time and expense of traveling to West Virginia to attend these courses. The proposed amendments would create an exemption for West Virginia-licensed chiropractors who practice exclusively out of state by eliminating the requirement that they attend the six hours of specialized continuing education.
- The proposed amendments to the Rule also address the practice of offering "pre-payment plans." As explained in the proposed amendments, a pre-payment plan is a contract

between a chiropractor and a patient wherein there is an agreement that the chiropractor will perform a set number of treatments for a set price. The Board has identified aspects of pre-payment plans that could be problematic. Some of these aspects have resulted in ethics complaints being filed with the Board. The proposed amendments address those potentially problematic areas and ensure that chiropractors and their patients understand their obligations under these pre-payment plans.

- Finally, the proposed amendments change the fees that apply to the licensure for the practice of chiropractic in the State of West Virginia. This fee schedule has not been amended since 1999. And, as shown in the attached document, West Virginia's chiropractic fee schedule is substantially lower than many comparable and surrounding states. Moreover, those states that have lower or equal fees generally have a much larger population of active licensees. If the Board is not allowed to raise its fee schedule, the Board runs the risk of not having sufficient funds to operate, as explained by a recent legislative audit of the Board. Additionally, the Board proposes creating a separate Rule Series for Fees to make the identification of the fee schedule more accessible and to make future rule changes more efficient.
