		<b>§126-44R-4. Summary of the Content Standards and Objectives</b>		
07/21/13	Stefan Smolski Science Teacher Grafton High School Fairmont, WV	The content standards for forensics are consistent with the majority of text books available for the course. Making the course eligible for the third year of science offers a unique elective and opportunity for students. This also effectively standardizes the course throughout the state. I found it almost identical to the standards developed for my school's course. Eliminating outdated courses is also a great idea.	NA o	The comment supports the addition of the forensics course and the removal of CATS 9 and CATS 10.
