PROVIDE A BRIEF SUMMARY OF THE CONTENT OF THE RULE:

The rule establishes and adopts the ambient air quality standards in West Virginia for carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter, and sulfur dioxide, equivalent to the national primary and secondary ambient air quality standards (NAAQS) established under §109 of the Clean Air Act and promulgated by the United States Environmental Protection Agency under 40 CFR part 50. National primary ambient air quality standards define levels of air quality which the Administrator of the EPA judges are necessary, with an adequate margin of safety, to protect public health. National secondary ambient air quality standards define levels of air quality which the Administrator of the EPA judges necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant. The rule also incorporates by reference the ambient air monitoring reference methods and equivalent methods promulgated by the EPA under 40 CFR part 53. These reference methods are used to determine attainment status with the NAAQS. The purpose of this rule is for West Virginia to retain primacy of its air quality program and remain current with the federal counterpart regulations.

SUMMARIZE IN A CLEAR AND CONCISE MANNER CONTENTS OF CHANGES IN THE RULE AND A STATEMENT OF CIRCUMSTANCES REQUIRING THE RULE:

Summary of changes in the rule:

Revisions to the rule include the annual incorporation by reference (IBR) of 40 CFR parts 50 and 53 promulgated by EPA as of June 1, 2025, by updating the IBR date in section 1.6 and the adoption of standards dates in sections 3.1 and 3.2. The severability language in section 5 was removed to address State Implementation Plan (SIP) approvability concerns. The 2026 IBR updates include the following: (1) Reconsideration of the National Ambient Air Quality Standards for Particulate Matter Correction; (2) Review of the Secondary National Ambient Air Quality Standards for Oxides of Nitrogen, Oxides of Sulfur, and Particulate Matter (3) Ambient Air Monitoring Equivalent and Equivalent Methods; Designation of One New Equivalent Method; (4) Ambient Air Monitoring Reference and Equivalent Methods; Designation of Two New Equivalent Methods; and (5) Reference Measurement Principle and Calibration Procedure for the Measurement of Ozone in the Atmosphere (Chemiluminescence Method) Correction.

Statement of circumstances requiring the rule:

The incorporation by reference updates to this rule allow WV to retain primacy of its air quality programs and remain current with federal counterpart regulations. This rule is exempt from the Regulatory Moratorium of Executive Order 21-21 under condition 2(g), updating state rules to comply with federal law requirements.

Determination of Stringency:

Federal counterparts to the proposed rule are incorporated by reference; therefore, no determination of stringency is required.

Consultation with the Environmental Protection Advisory Council:

The Environmental Protection Advisory Council received a copy of the draft proposed rule April 25, 2025.
