1	June 27, 2025	Anoop Bhasin General Counsel West Virginia Alcohol Beverage Control Administration	<i>On page 12 of the Rule regarding the Alcohol Beverage Control Administration, please edit the second column for all 4 rows to "See various fees in WV Code Ch. 60 or Ch. 11-16, or the agency's website" Please make the edit to all four rows.</i>	Suggestion accepted, conceptually. However, after reviewing the relevant statute, the Department chose to include a list of specific permits and licenses in the Rule instead of using the proposed language. This method is consistent with the approach taken in listing each permit type available from other agencies and the applicable fees. Additionally, it provides clarity and increases transparency by making it easier for applicants to find the information they need without having to search through the Code.
2	July 24, 2025	Matthew Irby State Tax Commissioner West Virginia Tax Division	<i>While the business registration application contemplates all types of businesses, not all business registrations have the same legal requirements. A bond is required for some businesses registrations (such as those businesses also seeking motor fuel, tobacco, and other such permits) and, accordingly, more time is necessary to process those applications than is currently set forth in the Rule.</i> <i>The Rule provides for fast-track processing times, including 1- and 2-hour options, for the processing of business registration applications. Given the short period for fast-track business registrations, we believe additional guidance should be set forth in the Rule. For example, the Rule could address in-office pick up of the registration certificates, when processing times begin, when processing time begin for resubmitted applications after rejection, and the time frame for requests that are received at the end of a business day</i>	Incorporated Suggestions into Language.
