

EXECUTIVE SUMMARY

WEST VIRGINIA DEPARTMENT OF EDUCATION

Policy Number and Title: Policy 2520.4 - 21st Century Social Studies K-12 Content Standards and Objectives for West Virginia

Background: The West Virginia Content Standards and Objectives have performance descriptors for each Standard that describes in narrative format how students demonstrate achievement of the standards. West Virginia has designated five performance levels: distinguished, above mastery, mastery, partial mastery and novice which serve two functions. Instructionally, they give teachers detailed information about the levels of knowledge and skills students may demonstrate in a content area. Performance levels and descriptors are also used to categorize and explain student performance on statewide assessment. The existing performance descriptors need revision and reformatting to make them more succinct and usable for teachers, parents and students. The individuals involved with the changes of this policy are: Carla Williamson, Executive Director of the Office of Instruction; Monica Beane, Assistant Director of the Office of Instruction; Regina Scotchie, Social Studies Coordinator in the Office of Instruction; Patricia Dillon, Coordinator in the Office of Assessment/Accountability; Ann Pauley, Teacher from Mercer County; Leonard Walker, Technology Integration Specialist from Fayette County; Denice Corder, Teacher from Monongalia County; Nancy McCoy, Social Studies Coordinator from Kanawha County Central Office, Lynette Swiger, Teacher from Marion County, Patsy Dicken, Teacher from Marion County.

Proposals: Revisions to Policy 2520.4 are being recommended for:

- Revision of the performance descriptors to provide a narrative format that succinctly indicates levels of achievement and more accurately describes the conceptual understandings students should acquire at each grade level.
- Separation of the text to indicate clusters of concepts and the skills across the continuum.

Impact: The proposed revision of the Content Standards and Objectives for 21st Century Social Studies K-12 Standards, Objectives and Performance Descriptors will provide teachers information about the levels of knowledge and skills the students must acquire and will provide parents an explanation of their child's knowledge and conceptual understanding that should be acquired at each grade level.

TITLE 126
LEGISLATIVE RULE
BOARD OF EDUCATION

FILED
2009 JUN 11 PM 1:14
OFFICE WEST VIRGINIA
SECRETARY OF STATE

SERIES 44D
21st CENTURY SOCIAL STUDIES CONTENT STANDARDS AND OBJECTIVES FOR WEST VIRGINIA SCHOOLS (2520.4)

§126-44D-1. General.

1.1. Scope. – West Virginia Board of Education Policy 2510 provides a definition of a delivery system for, and an assessment and accountability system for, a thorough and efficient education for West Virginia public school students. Policy 2520.4 defines the content standards (or instructional goals) and objectives for the social studies as required by W. Va. 126CSR42 (Policy 2510).

1.2. Authority. – W. Va. Constitution, Article XII, §2, W. Va. Code §18-2-5 and §18-9A-22.

1.3. Filing Date. – ~~March 16, 2007.~~

1.4. Effective Date. – ~~July 1, 2008.~~

1.5. Repeal of former rule. This legislative rule ~~repeals and replaces~~ amends W. Va. 126CSR44D "Social Studies Content Standards and Objectives for West Virginia Schools (2520.4)" filed ~~November 15, 2006~~ March 16, 2007 and effective July 1, 2008.

§126-44D-2. Purpose.

2.1. This policy defines the content standards (or instructional goals) and objectives for the program of study required by Policy 2510 in social studies.

§126-44D-3. Incorporation by Reference.

3.1. A copy of the 21st Century Social Studies Content Standards and Objectives for West Virginia Schools is attached and incorporated by reference into this policy. Copies may be obtained in the Office of the Secretary of State and in the West Virginia Department of Education, Office of Instructional Services.

§126-44D-4. Summary of the Content Standards and Objectives.

4.1. The West Virginia Board of Education has the responsibility for establishing high quality standards pertaining to all educational standards pertaining to all education programs (W. Va. Code §18-9A-22). The content standards and objectives provide a focus for teachers to teach and students to learn those skills and competencies essential for future success in the workplace and further education. The document includes content standards for social studies; an explanation of terms; objectives that reflect a rigorous and challenging curriculum; and performance descriptors.

West Virginia Department of Education

West Virginia Board of Education Policy

2520.04

*21st Century Social Studies Content
Standards and Objectives for West
Virginia Schools*

Steven L. Paine
State Superintendent of Schools

Foreword

A 21st century social studies curriculum is an increasingly important aspect of developing learners prepared for success in the 21st century. Thus, the West Virginia Board of Education and the West Virginia Department of Education are pleased to present Policy 2520.04, 21st Century Social Studies Content Standards and Objectives for West Virginia Schools. The West Virginia Social Studies Standards for 21st Century Learning includes 21st century *content* standards and objectives as well as 21st century standards and objectives for *learning skills* and *technology tools*. This broadened scope of social studies curriculum is built on the firm belief that quality engaging instruction must be built on a curriculum that triangulates rigorous 21st century content, 21st century learning skills and the use of 21st century technology tools.

Committees of educators from across the state convened to revise the content standards and objectives. The overarching goal was to build a rigorous, relevant and challenging social studies curriculum that would prepare students for the 21st century. West Virginia educators, including regular classroom teachers, special education teachers, and teachers representing higher education institutions played a key role in shaping the content standards to align with national standards, rigorous national assessments and research and best practice in the field of social studies education. The contribution of these professionals was critical in creating a policy that is meaningful to classroom teachers and appears in a format that can easily be used and understood.

Policy 2520.04 is organized around the three major components of a standards-based curriculum: learning standards, instructional objectives and performance descriptors. The learning standards are the *broad descriptions* of what *all* students must know and be able to do at the conclusion of the instructional sequence. The accompanying grade-level objectives are specific descriptors of knowledge, skills and attitudes that when mastered will enable the student to attain the standard. The instructional objectives guide instructional *planning* and provide a basis for determining appropriate *assessments, instructional strategies and resources*. The performance descriptors provide the basis for *assessing* overall student competence of grade level standards. The performance descriptors define the five student performance levels ranging from novice to distinguished. With the ultimate goal of “learning for all,” these descriptors allow the teacher, students and parents to judge the *level* of student proficiency in each 21st century learning standard.

In combination, the use of learning standards, instructional objectives and performance descriptors become a comprehensive guide for delivering a rigorous and relevant social studies curriculum to all West Virginia students. These elements, when used to guide the instructional process and when delivered with the creativity and instructional expertise of West Virginia teachers, will become a powerful resource for preparing students to meet the challenges of the 21st century.

Steven L. Paine
State Superintendent of Schools

Explanation of Terms

Content Standards are broad descriptions of what students should know and be able to do in a content area. Content standards describe what students' knowledge and skills should be at the end of a K-12 sequence of study.

Objectives are incremental steps toward accomplishment of content standards. Objectives are listed by grade level and are organized around the content standards. Objectives build across grade levels as students advance in their knowledge and skills.

Performance Descriptors describe in narrative format how students demonstrate achievement of the content standards. Line breaks within the narrative format indicate clusters of concepts and skills. West Virginia has designed five performance levels: distinguished, above mastery, mastery, partial mastery and novice. Performance Descriptors serve two functions. Instructionally, they give teachers more information about the level of knowledge and skills students need to acquire. Performance levels and descriptors are also used to categorize and explain student performance on statewide assessment instruments.

Distinguished: A student at this level has demonstrated exemplary performance. The work shows a distinctive and sophisticated application of knowledge and skills that go beyond course or grade level applications.

Above Mastery: A student at this level has demonstrated effective performance and exceeds the standard. The work shows a thorough and effective application of knowledge and skills.

Mastery: A student at this level has demonstrated adequate knowledge and skills that meet the standard. The work is accurate, complete and fulfills all requirements. The work shows solid academic performance at the course or grade level.

Partial Mastery: A student at this level has demonstrated limited knowledge and skills toward meeting the standard. The work shows basic but inconsistent application of knowledge and skills characterized by errors and/or omissions. Performance needs further development.

Novice: A student at this level has demonstrated minimal fundamental knowledge and skills needed to meet the standard. Performance at this level is fragmented and/or incomplete and needs considerable development.

Numbering of Standards

The number for each content standard is composed of four parts, each part separated by a period:

- the content area code is SS for Social Studies,
- the letter S, for Standard,
- the grade level (exceptions are WV for West Virginia History) and
- the standard number.

Illustration: SS.S.04.1 refers to fourth grade social studies content standard #1.

Numbering of Objectives

The number of each objective is composed of five parts, each part separated by a period:

- the content area code (SS for Social Studies),
- the letter O is for Objective,
- the grade level (an exception is elementary West Virginia History, which uses WV instead of a grade level.),
- the number of the content standard addressed, and
- the objective number.

Illustration: SS.O.06.2.03 refers to a social studies sixth grade objective that addresses standard #2 in social studies, the third objective listed under that standard.

Numbering of Performance Descriptors

The number for each group of three performance descriptors is composed of four parts, each part separated by a period:

- the content area (SS for Social Studies),
- the letters PD are for Performance Descriptors,
- the grade level (See exceptions noted above for grade level under numbering of objectives), and
- the standard number.

Illustration: SS.PD.09.2 refers to social studies performance descriptors for ninth grade, content standard #2.

Unique Electronic Numbers (UENs)

Unique Electronic Numbers (or UENs) are numbers that help to electronically identify, categorize and link specific bits of information. Once Policy 2520.04 is available on the Web, each standard, each objective, and each group of five performance descriptors will have a Unique Electronic Number (UEN) that will always remain the same.

The codes printed in Policy 2520.04 form the basis of the UENs. The only additional set of numbers that will be added to each code to formulate its UEN will be a prefix that indicates the year and month that a particular version of Policy 2520.04 is approved by the State Board of Education.

The prefix for the UENs for each content area in Policy 2520.04 is noted at the top of each page containing standards, objectives and performance descriptors. As sections of 2520.04 are revised, UENs will be changed to reflect the new approval date.

UENs (Unique Electronic Numbers) are unique numbers that facilitate implementation of WV Standards into Electronic formats such as Databases and XML Files. The WV Department of Education encourages everyone who is going to use the WV Content Standards in any kind of electronic distribution, alignment, or software development to use the UENs so that all efforts can be cross-referenced and there is consistency across initiatives.

Illustration: The UEN for fifth grade social studies standard #2 will be "200602.SS.S.05.2".

SOCIAL STUDIES – POLICY 2520.04

Social Studies, as a field of study, embodies the essence of mankind and interconnects the past, present and future. It investigates where people live and how they participate as citizens of the world. It manifests how people change, prosper and live in an increasingly culturally diverse, interconnected world. The Social Studies curriculum enables students to understand the political, geographic, economic and social world. It encourages students to work independently and collaboratively using critical thinking and problem solving skills necessary to develop civic responsibility for the 21st Century.

A multitude of references was considered to support the development of the Social Studies curriculum including the National Standards for History, the National Standards for Social Studies, the National Voluntary Standards for Economics, the National Standards for Civics, and the National Geographic Standards for Life, in addition to the guidelines of NAEP, ACT, SAT, 21st Century Partnership, and various accredited assessment consultants. The foundation of West Virginia's Content Standards and Objectives in Social Studies is to identify what students should know and to guide them in the development of their skills and dispositions. With this philosophy as a guide, members of the Social Studies Curriculum Revision Committee developed six content standards for all West Virginia students. Those students who can problem solve, analyze, synthesize, communicate, collaborate and adapt will be successful in the 21st century. "The illiterate of the 21st century will not be those who cannot read and write, but those who cannot learn, unlearn and relearn." *Alvin Toffler*

West Virginia's vision for education includes the integration of technology and critical thinking skills throughout the curriculum so that all West Virginia students have the opportunity to develop skills that support high achievement. Successful learning environments provide opportunities for students to use educational technology with curricular content in relevant context. West Virginia teachers are responsible for integrating the 21st Century skills and tools into the content standards and objectives.

The Social Studies Content Standards and Objectives establish the foundation of the core disciplines: citizenship, civics/government, economics, geography, history and reading/writing. Each discipline offers a distinct strategy for developing global awareness. Although each content standard provides a very unique perspective of the world, they should not be taught in isolation. Social Studies is by its very nature integrative. The important social issues require insights from across the disciplines. Citizenship, civics/government, economics, geography and history each offer distinct approaches and develop specific skills for examining common subject matter, which can be integrated when addressing a particular issue or event. Below is a brief explanation of the specific importance of each core discipline.

In Plato's words, "The direction in which education starts a man will determine his future life." Social Studies education must begin early to insure that students develop an understanding and appreciation of the United States as a powerful and proud nation. As we stand in the 21st Century, the United States remains an international leader and role model for democracy. Social Studies education provides students with the knowledge and skills necessary to collectively and strategically meet the challenges of the 21st Century.

The five major content strands have defined objectives that explain what the student should now. The objectives move from the literal level of identifying and recognizing information to the more complex skills of analyzing and evaluating. When applying the objectives, all bulleted items must be taught. The abbreviation e.g. indicates examples for teaching the objectives. Furthermore, the teacher is strongly encouraged to review the objectives of the previous grade level to serve as a starting point for review and maintenance in the spiraling curriculum.

Social Studies Content Standards K-12

Standard 1: Citizenship

Citizenship education prepares students to be informed, active and effective citizens who accept their responsibilities, understand their privileges and rights and participate actively in society and government. To be successful participants in society, students must understand how to build social capital (a network of social relationships) that encourages reciprocity and trust, two characteristics of civic virtue and good citizenship. Students must be able to research issues, form reasoned opinions, support their positions and engage in the political process. Students exercise tolerance and empathy, respect the rights of others, and share a concern for the common good while acting responsibly with the interests of the larger community in mind. Students must learn and practice intellectual and participatory skills essential for an involved citizenry. To develop these skills, the curriculum must extend beyond the school to include experiences in the workplace and service in the community.

Standard 2: Civics/Government

Civics directly addresses citizenship education in the context of political systems. Students develop global awareness and study the foundations of various world governments and the strategies they employ to achieve their goals. With respect to the United States, students learn the underlying principles of representative democracy, the constitutional separation of powers and the rule of law. The students learn the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States. Students recognize the need for authority, government and the rights and responsibilities of citizens.

Standard 3: Economics

Economics analyzes the production, allocation, distribution and use of resources. The economic principles include an understanding of scarcity and choice, productivity, markets and prices, supply and demand, competition, role of government, international trade factors and consumer decisions in a global economy. Understanding economic principles, whole economies and the interactions between different types of economies helps students comprehend the exchange of information, capital and products across the globe. Learners investigate economic principles and their application to historical situations. Learners will work cooperatively and individually to analyze how basic economic principles affect their daily lives. Students become financially responsible by examining the consequences of and practicing personal financial decision-making.

Standard 4: Geography

Geography in the 21st Century encompasses physical and human systems and the interactions between them on local and global scales. People interact with the natural world in culturally distinct ways to produce unique places, which change over time. The 21st Century technologies and perspectives of geography provide students with an understanding of the world, and the ability to evaluate information in spatial terms. The geography standard stresses the world of the 21st Century and the role of the U.S. in the global community. Students use geographic perspectives and technology to interpret culture, environment and the connection between them. Students collaborate with one another and work individually using geographic skills and tools to ask geographic questions, acquire the necessary information, organize and analyze the information and answer those geographic questions. Students examine the varying ways in which people interact with their environments and appreciate the diversity and similarities of cultures and places created by those interactions. Study follows the themes of the six essential elements.

Standard 5: History

History organizes events and phenomena in terms of when they occurred and examines where, how and why they took place. Students study how individuals and societies have changed and interacted over time. They gather historical data, examine, analyze and interpret this data, and present their results in a clear, critical manner. They organize events through chronologies and evaluate cause-and-effect relationships among

them. Students analyze how individuals, groups and nations have shaped cultural heritages. Students study origins and evolutions of culture hearths, settlements, civilizations, states, nations, nation-states, governments and economic developments. Through history, students understand the identity and origins of their families, communities, state and nation. Through history, students recognize the influence of world events on the development of the United States and they evaluate the influence of the United States on the world. Understanding the past helps students prepare for the events of the 21st Century.

Standard 6: Reading (SS.S.06)

Skillful content reading strategies are essential tools that provide students with the skills needed to fully understand social studies concepts. Students learn to apply the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness. In so doing, students learn to recognize main ideas and supporting details, to locate basic facts (e.g. names, dates, events), to follow sequence of events, to identify cause and effect, and to draw conclusions. Students learn skills necessary to write and edit organized texts insuring that they understand information and communicate it clearly.

Kindergarten Social Studies Content Standards and Objectives

Kindergarten Social Studies is an introduction to the lives of interesting people in history, time sequence using historic events, geographic direction and economic choices. The Social Studies program continues the formal introduction of the social responsibility and collaboration skills learned in Pre-Kindergarten. Teachers emphasize the importance of following rules, respecting the rights of others, developing self-control, honesty, courage, justice and leadership. The objectives for elementary West Virginia Social Studies may be integrated throughout the K-3 curriculum. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade K Social Studies	
Standard: 1	Citizenship
SS.S.K.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect of symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect for People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions of data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life).

Elementary West Virginia Studies Content Standards and Objectives

Elementary West Virginia Studies explore historic, geographic, economic and civic concepts. These objectives shall be appropriately integrated into the kindergarten—fourth grade curriculum. Teachers introduce students to geographic places and regions. The relationship among geographic settlement patterns, and economic development of West Virginia will be examined in this course. Students participate in a variety of activities enabling them to identify, research and discuss the cultural heritage of the various groups who settled West Virginia. The course content reflects West Virginia's unique characteristics as well as its national and global relationships. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade WV Standard	Social Studies	Performance Descriptors (SS.PD.WV.1)	Above Mastery	Mastery	Partial Mastery	Novice
1 SS.S.WV.1	<p>Citizenship</p> <p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Distinguished</p> <p>Elementary students performing at the distinguished level in citizenship discriminate between civic responsibilities, privileges, and rights and give examples of each. They defend the importance of each category to the state government. They choose a local problem, recommend a solution, and develop a plan to implement the solution. They assess</p>	<p>Elementary students performing at the above mastery level in citizenship categorize examples of civic responsibilities, privileges, and rights. They research local problems, choose one, and propose a solution. They examine areas of volunteerism at local and state levels and defend reasons for being a good citizen.</p>	<p>Elementary students performing at the mastery level in citizenship explain various civic responsibilities, privileges and rights, and defend a position as to why civic responsibility is important. They propose solutions to a local problem and investigate opportunities for volunteering locally. They model behavior that demonstrates good citizenship.</p>	<p>Elementary students performing at the partial mastery level in citizenship give examples for civic responsibilities, privileges, and rights. They discuss why civic responsibility is important. They identify a local problem, define volunteerism. They discuss behavior that demonstrates good citizenship.</p>	<p>Elementary students performing at the novice level in citizenship list examples of civic responsibility. They give an example of volunteering locally. They define good citizenship.</p>

<p>characteristics of citizens and determine which ones demonstrate good citizenship.</p> <p>Elementary students performing at the distinguished level in citizenship:</p> <p>summarize the differences between civic responsibilities, privileges, and rights;</p> <p>choose a local problem and develop a plan to implement a solution;</p> <p>assess characteristics of good citizenship.</p>	<p>Elementary students performing at the above mastery level in citizenship:</p> <p>explain the importance of civic responsibilities, privileges and rights;</p> <p>research local problems, choose one, and propose a solution;</p> <p>defend reasons for being a good citizen.</p>	<p>Elementary students performing at the mastery level in citizenship:</p> <p>categorize and give examples of civic responsibilities, privileges, and rights;</p> <p>propose solutions to a local problem volunteer to help;</p> <p>model behavior that demonstrates good citizenship.</p>	<p>Elementary students performing at the partial mastery level in citizenship:</p> <p>give examples for civic responsibilities, privileges, and rights;</p> <p>identify a local problem define volunteerism;</p> <p>discuss behavior that demonstrates good citizenship.</p>	<p>Elementary students performing at the novice level in citizenship:</p> <p>list examples of civic responsibility;</p> <p>give an example of volunteering locally; and</p> <p>define good citizenship.</p>
<p>Objectives Students will</p>				
SS.O.WV.1.1	explain various civic responsibilities, privileges and rights (e.g., the act of voting as a West Virginia citizen).			
SS.O.WV.1.2	propose solutions and investigate opportunities for public volunteerism concerning a local problem.			
SS.O.WV.1.3	model the behavior that shows how students are citizens of their classroom, community, state, and nation.			
SS.O.WV.1.4	take and defend a position as to why fulfilling one's civic responsibility is important.			
<p>Grade WV Standard: 2 Social Studies Civics/Government</p>				
SS.S.WV.2	<p>Students will</p> <ul style="list-style-type: none"> • examine and analyze the purpose and basic principles of the United States government (Purposes of Government). • outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). • examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). • analyze how the world is organized politically and compare the role and relationship of the United States to other nations to world affairs (United States Government and World Affairs). 			
<p>Performance Descriptors (SS.PD.WV.2)</p>

summarize and defend sources they use to write reports.	research topics of interest and write short summaries.	construct short reports to answer specific questions.	write a paragraph or short answer to specific questions.	verbally give short answers to specific questions.
Objectives	Students will			
SS.O.WV.05.01	reconstruct the economic, social and political history of West Virginia.			
SS.O.WV.05.02	research and describe the cultural life of West Virginia as reflected in folklore and heritage.			
SS.O.WV.05.03	compare and contrast past and present lifestyles of West Virginians.			
SS.O.WV.05.04	use reference sources to construct short reports that answer specific questions about West Virginia.			

First Grade Social Studies Content Standards and Objectives

First grade Social Studies explores the role of the citizen in the schools, family and community. Students learn responsibilities, privileges and rights, patriotic traditions, symbols, functions of money and the connection of the past to the present. Conflict resolution, consumer roles and good safety practices will be introduced. Students recognize geographic features and identify regions. A variety of graphic skills will be incorporated, including graphs, charts and timelines. Economic concepts of basic needs and community occupations will be explored. The objectives for elementary West Virginia Social Studies may be integrated throughout the K-3 curriculum. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 1 Social Studies	
Standard 1	Citizenship
SS.S.01.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life).
Performance Descriptors (SS.PD.1.1)

historical information; and categorize characteristics of the past and compare/contrast contributions of heroic people; and	historical information; and research characteristics of the past and contributions of heroic people; and	and organization of historical data; and	organization of historical data; and	various sources; and
make inferences from cultural differences to support understanding and empathy; and	contrast/compare cultural differences to build understanding and empathy; and	investigate cultural differences to build understanding and empathy; and	understand cultural differences to build understanding and empathy; and	describe cultural differences to build understanding and empathy; and
defend family historical information through three generations using primary sources and make comparisons to present-day living; and	research family historical information through three generations and make comparisons to present-day living; and	collect family historical information through two generations and make comparisons to present-day living; and	collect family historical information through two generations and examine the comparisons to present-day living; and	collect family historical information through two generations; and
compare and contrast different types of families, summarizing by categories the characteristics of each.	compare and contrast different types of families, listing the characteristics of each.	compare and contrast different types of families.	give examples of different types of families.	discuss the different types of families.
Objectives Students will				
SS.O.01.05.01	give examples of ways communities change over time (e.g., landscape, buildings, jobs, population).			
SS.O.01.05.02	collect information to contrast family history through two generations (parents, grandparents) and make comparisons to present-day.			
SS.O.01.05.03	identify characteristics of the past and contributions of heroic people using sources such as stories, folk tales, pictures, poems, songs, legends, holdings and customs, and organize historical data.			
SS.O.01.05.04	investigate cultural differences through celebrations, holidays and family traditions to build empathy and understanding for individuals and groups.			
SS.O.01.05.05	compare and contrast different types of families (e.g., single parent, extended, multi-generational).			

Grade 1	Social Studies
Standard: 6	Reading

SS.S.01.06

Students will

- use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre.
- recognize main ideas and supporting details to locate basic facts (e.g., names, dates, events).
- distinguish relationships among people, ideas, and events.
- recognize cause-effect relationships in content passages.
- outline sequences of events.
- summarize events and ideas. Infer main idea or purpose of content.
- draw generalizations and conclusions about people, ideas, and events.
- write and edit organized texts of various genres to insure that information is clearly understood.

Refer to policy 2520.1 for specific grade level reading and writing objectives.

Second Grade Social Studies Content Standards and Objectives

Second grade Social Studies expands the roles of citizenship. Students learn the functions of government, local folklore, symbols and traditions. The roles and responsibilities of each child as a citizen in a democratic community and nation will be emphasized. They will explore volunteer and service activities, conservation and environmental preservation. The use of conflict resolution will be reinforced. Students will continue to learn about geographic places and regions and participate in map activities. Students will learn the economic concepts of needs/wants, bartering and saving/spending. The objectives for elementary West Virginia Social Studies may be integrated throughout the K-4 curriculum. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Standard: 1	Citizenship	Above Mastery	Mastery
SS.S.02.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Second-grade students performing at the above mastery level in citizenship classify behaviors of compassion and empathy and model responsible behavior in different situations in the school and community. They compare volunteer projects and determine how they will participate in a volunteer service project. They practice conflict resolution and recommend solutions</p>	<p>Second-grade students performing at the mastery level in citizenship examine examples of compassion and empathy in daily life, model personal responsibilities in the classroom, and choose and participate in a volunteer service project. They recognize and practice conflict resolution within the school community</p>
		<p>Second-grade students performing at the mastery level in citizenship describe examples of compassion in daily life and demonstrate personal responsibility in the classroom. They model personal responsibility through participation in a volunteer project. They recognize and give examples of conflict resolution within the school.</p>	<p>Second-grade students performing at the novice level in citizenship recognize examples of compassion in daily life and examples of personal responsibility in the classroom. They participate in a volunteer project. They recognize conflict resolution in a classroom situation.</p>

<p>purpose for conflict resolution and model behavior appropriate to conflict resolution in different situations.</p> <p>Second grade students performing at the distinguished level in citizenship:</p> <p>evaluate different types of values and lead a conflict resolution session:</p> <p>critique the role of a good citizen and create a volunteer project to serve a need: and</p> <p>explain the significance of national celebrations to a society.</p>	<p>for areas of conflict in the school and community.</p> <p>Second grade students performing at the above mastery level in citizenship:</p> <p>demonstrate values and analyze components of conflict resolution:</p> <p>practice good citizenship and defend the volunteer project choice: and</p> <p>differentiate between local, state and national celebrations.</p>	<p>Second grade students performing at the mastery level in citizenship:</p> <p>examine values and practice conflict resolution:</p> <p>model good citizenship and choose to participate in a volunteer project: and</p> <p>participate in national celebrations.</p>	<p>Second grade students performing at the partial mastery level in citizenship:</p> <p>describe values and explain conflict resolution</p> <p>describe good citizenship and list volunteer project choices: and</p> <p>explain reasons to participate in national celebrations.</p>	<p>performing at the mastery level in citizenship:</p> <p>name values and recognize conflict resolution:</p> <p>give examples of good citizenship and name a volunteer project: and</p> <p>name national celebrations.</p>
Objectives				
SS.O.02.01.01	Students will choose and participate in a project of volunteer service.			
SS.O.02.01.02	examine examples of honesty, trustworthiness, compassion and empathy in daily life experiences.			
SS.O.02.01.03	model the personal responsibilities of good citizenship in the classroom (e.g., responsibility, self-control).			
SS.O.02.01.04	be given the opportunity to recite the Pledge of Allegiance and participate in national celebrations.			
SS.O.02.01.05	recognize and practice components of conflict resolution within the school community.			
Grade 2 Social Studies				
Standard: 2 Civics/Government				
SS.S.02.02	Students will			
	<ul style="list-style-type: none"> • examine and analyze the purposes and basic principles of the United States government (Purposes of Government). • outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). • examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, 			

<ul style="list-style-type: none"> state and national levels (United States Government and Politics). analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs). 				
Performance Descriptors (SS.PD.2.2)				
Distinguished	Above Mastery Second-grade students performing at the above mastery level in civics categorize rules and laws and assess their importance. They distinguish between the benefits of order and those of predictability. They illustrate the need for local, state and national levels of government and explain the need for responsible authority figures.	Mastery Second-grade students performing at the mastery level in civics compare and contrast rules and laws, assess their importance, and justify how they provide order and predictability. They explain the need for local, state and national levels of government and recognize the need for responsible authority figures, describing their characteristics.	Partial Mastery Second-grade students performing at the partial mastery level in civics differentiate between rules and laws and recognize that they provide order and predictability. They give examples of needs at the local, state and national levels of government and identify needs for responsible authority figures.	Novice Second-grade students performing at the novice level in civics identify rules and laws. They recognize that there are three levels of government—local, state and national—and identify responsible authority figures.
Second-grade students performing at the distinguished level in civics interpret rules and laws, justifying their importance based on the benefits of order and predictability. Students justify the need for local, state and national levels of government and anticipate the need for responsible authority figures.	Second grade students performing at the above mastery level in civics: evaluate existing rules and laws, imagine the changes that would take place without them; validate the need for three levels of government; and express the need for authority figures and responsible leaders.	Second grade students performing at the mastery level in civics: compare and contrast rules and laws, assess their importance and justify how they provide order; explain the need for three levels of government; and recognize the need for authority figures and responsible leaders.	Second grade students performing at the partial mastery level in civics: differentiate between rules and laws and recognize that they provide order; give examples of needs at the local, state and national levels of government; and identify the characteristics of authority figures and responsible leaders	Second grade students performing at the novice level in civics: identify rules and laws and state that they provide order; recognize that there are three levels of government; and name authority figures and responsible leaders.
Objectives Students will				

SS.O.02.02.01	discuss and explain why different levels of government (local, state, federal) are needed.
SS.O.02.02.02	compare and contrast rules and laws.
SS.O.02.02.03	recognize the need for authority figures and describe the characteristics of responsible leaders.
SS.O.02.02.04	assess the importance of laws/rules and justify how and why they can provide order and predictability.

Grade 2	
Social Studies	
Economics	
SS.S.02.03	<p>Students will</p> <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies).

Performance Descriptors (SS.PD.2.03)			
Distinguished	Above Mastery	Mastery	Partial Mastery
<p>Second-grade students performing at the distinguished level in economics draw conclusions from graphs, charts and tables of economic information. They defend bartering as a means of obtaining goods and services. They predict how the needs in our culture are changing. They compare and contrast occupations, assessing how they have changed. Students establish a future goal and predict how saving can help meet that goal.</p>	<p>Second-grade students performing at the above mastery level in economics analyze the effects of different economic choices. They formulate and communicate ways bartering might be used today. They summarize the reasons that needs in different cultures vary. Students compare occupations today and in the past. They defend why saving money in the bank is important.</p>	<p>Second-grade students performing at the mastery level in economics make economic choices, predict the consequences of those choices and examine bartering as a way to obtain goods/services comparing bartering to present ways of obtaining goods and services. They compare and contrast the needs of people in different cultures and how they meet their needs. They research various occupations and how job opportunities in the community have changed. They explain the role of banks in saving for their future. They construct and interpret graphs, charts and</p>	<p>Second-grade students performing at the novice level in economics identify economic choices and define bartering. They match needs to different cultures. They list occupations in the community. Students recognize banks as places where people have their money. They recognize graphs, charts, and tables.</p>

Second grade students performing at the distinguished level in economics: create situations that require economic choices, predict consequences of alternative choices, evaluate the importance of banks in the choices; evaluate the needs and wants of people, and demonstrate bartering; explain the implications of the changes in various occupations in the community; and create graphs, charts, and tables from new data	Second grade students performing at the above mastery level in economics: explain the outcomes of economic choices, anticipate consequences, analyze the role of banks in saving for the future; categorize the needs and wants of people, and explain bartering; illustrate changes in various occupations in the community; and summarize the data on graphs, charts, and tables.	tables- Second grade students performing at the mastery level in economics: make economic choices, predict consequences of those choices, explain the role of banks in saving for the future; compare and contrast the needs and wants of people, and examine bartering; research various occupations in the community; and construct and interpret graphs, charts, and tables.	Second grade students performing at the partial mastery level in economics: recognize economic choices, explain the consequences, identify the role of banks in saving; list the needs and wants of people, and recognize bartering; research various occupations in the community; and construct and explain graphs, charts, and tables.	Second grade students performing at the novice level in economics: discuss economic choices, recognize the consequences, recall that banks are a place to save money. name needs and wants of people, and identify bartering; research various occupations in the community; and construct and add data to graphs, charts, and tables.
Second grade students performing at the above mastery level in economics: explain the outcomes of economic choices, anticipate consequences, analyze the role of banks in saving for the future; categorize the needs and wants of people, and explain bartering; illustrate changes in various occupations in the community; and summarize the data on graphs, charts, and tables.	Second grade students performing at the mastery level in economics: make economic choices, predict consequences of those choices, explain the role of banks in saving for the future; compare and contrast the needs and wants of people, and examine bartering; research various occupations in the community; and construct and interpret graphs, charts, and tables.	Second grade students performing at the mastery level in economics: make economic choices, predict consequences of those choices, explain the role of banks in saving for the future; compare and contrast the needs and wants of people, and examine bartering; research various occupations in the community; and construct and interpret graphs, charts, and tables.	Second grade students performing at the partial mastery level in economics: recognize economic choices, explain the consequences, identify the role of banks in saving; list the needs and wants of people, and recognize bartering; research various occupations in the community; and construct and explain graphs, charts, and tables.	Second grade students performing at the novice level in economics: discuss economic choices, recognize the consequences, recall that banks are a place to save money. name needs and wants of people, and identify bartering; research various occupations in the community; and construct and add data to graphs, charts, and tables.
Objectives	Students will	Students will	Students will	Students will
SS.O.02.03.01	make economic choices and predict the consequences of those choices.	make economic choices and predict the consequences of those choices.	make economic choices and predict the consequences of those choices.	make economic choices and predict the consequences of those choices.
SS.O.02.03.02	research various occupations and how job opportunities in the community have changed.	research various occupations and how job opportunities in the community have changed.	research various occupations and how job opportunities in the community have changed.	research various occupations and how job opportunities in the community have changed.
SS.O.02.03.03	examine bartering as an alternative method of securing goods/services and compare to present ways of acquiring goods and services.	examine bartering as an alternative method of securing goods/services and compare to present ways of acquiring goods and services.	examine bartering as an alternative method of securing goods/services and compare to present ways of acquiring goods and services.	examine bartering as an alternative method of securing goods/services and compare to present ways of acquiring goods and services.
SS.O.02.03.04	compare and contrast the needs of people in different cultures and show how they meet their needs in different ways.	compare and contrast the needs of people in different cultures and show how they meet their needs in different ways.	compare and contrast the needs of people in different cultures and show how they meet their needs in different ways.	compare and contrast the needs of people in different cultures and show how they meet their needs in different ways.
SS.O.02.03.05	explain the role of banks in saving for the future purchase of goods and services.	explain the role of banks in saving for the future purchase of goods and services.	explain the role of banks in saving for the future purchase of goods and services.	explain the role of banks in saving for the future purchase of goods and services.
SS.O.02.03.06	construct and interpret a variety of graph, charts, and tables.	construct and interpret a variety of graph, charts, and tables.	construct and interpret a variety of graph, charts, and tables.	construct and interpret a variety of graph, charts, and tables.

Grade 2	Social Studies
Standard: 4	Geography
SS.S.02.04	Students will <ul style="list-style-type: none"> interpret and choose maps, globes and other geographic tools to categorize and organize information about personal

<p>directions, people, places, and environments (The World in Spatial Terms).</p> <ul style="list-style-type: none"> examine the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). analyze physical processes that shape the earth's surface and create, sustain and modify the cultural and natural environment (Physical Systems). analyze and illustrate how the earth is shaped by the movement of people and their activities (Human Systems). analyze the interaction of society with the environment (Environment and Society). point out geographic perspective and the tools and assess techniques available for geographic study (Uses of Geography). 	<p>Performance Descriptors (SS.PD.2.04)</p>			
<p>Distinguished</p>	<p>Above Mastery</p>	<p>Mastery</p>	<p>Partial Mastery</p>	<p>Novice</p>
<p>Second grade students performing at the distinguished level in geography can locate West Virginia and bordering states by shapes and relative location on a United States map. They use a map or globe to locate designated areas of the United States and other world regions on a variety of maps and globes. They compare examples of geographic features in different world regions. They construct a class or school map to scale demonstrating knowledge of a compass rose and a map legend with a variety of map symbols. They analyze the need for basic natural resources and how this need has caused communities in the county and state to change.</p>	<p>Second grade students performing at the above mastery level in geography locate West Virginia by shape and relative location on a United States map. They locate other world regions and relate each location to the United States on a world map or globe. They illustrate major geographic features found on maps and globes. They construct a class or school map to scale using a compass rose and a map legend. They give examples and discuss the need for basic natural resources and examine the processes that have caused major communities in the county and state to change.</p>	<p>Second grade students performing at the mastery level in geography recognize West Virginia by shape and relative location and major geographic features on different maps and globes. They demonstrate knowledge of compass rose and map legend and construct a class or school map to scale. Students locate the United States and/or world regions on a map. They give examples of how people use basic natural resources and recognize the processes that have caused communities in county and state to change.</p>	<p>Second grade students performing at the partial mastery level in geography recognize West Virginia and the United States by their shapes. They identify the kinds of geographic features found within the state of West Virginia and the United States. They locate the compass rose and map symbols on a map and draw a simple map of their school. They give an example of how the natural resource of oil is used and identify a change in their community or state and the cause for the change.</p>	<p>Second grade students performing at the novice level in geography recognize West Virginia and the United States as the state and country in which they live. They list kinds of geographic features found within the state of West Virginia. They label the directions on a compass rose and identify common map symbols found on a map. They recognize a change that has occurred in the county or state.</p>

Third Grade Social Studies Content Standards and Objectives

Third grade Social Studies presents a study of the broader community to introduce state and nation. Students explain community changes due to technology, human interaction with the environment and the movement of people. Students practice citizenship in the school and community and study government at local, state and national levels. The basic economic concepts of supply and demand, taxation and budgeting within the context of the community will be introduced. The objectives for elementary West Virginia Social Studies may be integrated throughout the K-4 curriculum. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 3 Social Studies	
Standard: 1	Citizenship
SS.S.03.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life).
Performance Descriptors (SS.PD.03.1)

respect for and protection of minorities.	for and protection of minorities.	respect for and protection of minorities.	and protection of minorities.
Objectives			
SS.O.03.01.01	Students will identify and practice principles of honesty, fairness and justice in experiences at home, school and in the community.		
SS.O.03.01.02	describe and model the personal and civic responsibilities of good citizenship in the classroom, school and community.		
SS.O.03.01.03	explain the significance of patriotic symbols, holidays, celebrations and famous people.		
SS.O.03.01.04	recognize the importance of respect and protection of minorities.		
SS.O.03.01.05	give examples of how people working together can accomplish goals that individuals working alone cannot.		
SS.O.03.01.06	examine the impact that groups can make in a community.		
SS.O.03.01.07	identify examples of concepts of the common good (what is best for the most people).		
SS.O.03.01.08	choose a volunteer program and work independently and cooperatively to accomplish its goals.		

Grade 3	
Social Studies	
Civics/Government	
Standard: 2	Students will
SS.S.03.02	<ul style="list-style-type: none"> examine and analyze the purposes and basic principles of the United States government (Purposes of Government). outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs).

Performance Descriptors (SS.PD.03.2)			
Distinguished	Above Mastery	Mastery	Partial Mastery
Third-grade students performing at the distinguished level in civics predict the importance of government in different settings, produce criteria to evaluate rules and laws, and prioritize the responsibilities of the three levels of government. They validate commonly held principles and beliefs that unite citizens.	Third-grade students performing at the above mastery level in civics defend the importance of government in different settings, analyze criteria to evaluate rules and laws, and categorize the responsibilities of the three levels of government. They examine commonly held principles and beliefs that unite citizens.	Third-grade students performing at the mastery level in civics evaluate the importance of government in different settings, apply criteria to evaluate rules and laws, and identify the responsibilities of the three levels of government. They explain how commonly held principles and beliefs unite citizens.	Third-grade students performing at the partial mastery level in civics recognize the importance of government in different settings, list criteria to evaluate rules and laws, and match responsibilities to the three levels of government. They illustrate how commonly held principles and beliefs unite citizens.
Third grade students	Third grade students	Third grade students	Third grade students
Novice	Novice	Novice	Novice
Third-grade students performing at the novice level in civics describe government in different settings, match criteria to rules and laws, and discuss responsibilities of the three levels of government. They understand that commonly held principles and beliefs unite citizens.			

performing at the distinguished level in civics: debate the importance of government in different settings; develop criteria to evaluate rules and laws; categorize the responsibilities of members of the three levels of government; defend the importance of majority rule in a democracy; and evaluate how commonly held principles and beliefs unite citizens and protect them.	performing at the above mastery level in civics: prioritize the importance of government in different settings; choose and use criteria to evaluate rules and laws; differentiate among the three levels of government and their responsibilities; compare/contrast majority rule and other political systems; and evaluate how commonly held principles and beliefs unite citizens.	performing at the mastery level in civics: evaluate the importance of government in different settings; apply criteria to evaluate rules and laws; identify the three levels of government and their responsibilities; define and give examples of majority rule; and explain how commonly held principles and beliefs unite citizens.	performing at the partial mastery level in civics: give reason for the importance of government in different settings; use a checklist to evaluate rules and laws; match the three levels of government and their responsibilities; define and practice majority rule in the classroom; and list commonly held principles and beliefs that unite citizens.	performing at the novice level in civics: state that government is important; find examples of rules and laws; define the three levels of government; participate in classroom voting to practice majority rule; and state that citizens in the United States share certain beliefs.
Objectives	Students will			
SS.O.03.02.01	evaluate the importance of government in the classroom, school, community and state.			
SS.O.03.02.02	explain that citizens are united by commonly held principles and beliefs.			
SS.O.03.02.03	identify the three levels (local, state, federal) of government and the responsibilities of each level.			
SS.O.03.02.04	define major rule and give examples of that concept in a democracy.			
SS.O.03.02.05	apply criteria in evaluating rules and laws (e.g., strengths and weaknesses, design and purpose, enforcement, bias).			

Grade 3	Social Studies			
Standard 3	Economics			
SS.S.03.03	Students will	<ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). 		

- examine and evaluate the interdependence of global economies (Global Economies).

Performance Descriptors (SS.PD.03.03)

Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
<p>Third grade students performing at the distinguished level in economics organize information from a variety of sources, such as maps, graphs, and tables to choose a product and explain how it affects an individual economically. They summarize factors contributing to supply and demand. They convince others of the importance of using banks.</p>	<p>Third grade students performing at the above mastery level in economics evaluate the correlation between demand for raw materials and products and production and supply. They defend reasons that budgeting can help individuals and the ways in which banks can help people with their budgets. Students evaluate public services that use tax money in terms of the impact on their own lives.</p>	<p>Third grade students performing at the mastery level in economics characterize the concept of scarcity by citing examples, construct and interpret graphs, charts, maps and other data sources to illustrate the use of resources and supply and demand and examine how advertising increases the demand for products. They analyze the need explain why budgeting is important and summarize how banks function for individuals. They compare and contrast various occupations and their economic impact on individuals. They analyze the need for taxation to support public services. They illustrate how a raw material becomes a final product.</p>	<p>Third grade students performing at the partial mastery level in economics give examples of scarce products and products in demand. <p>SS.O.03.05.01</p>	<p>discuss the historical significance of major events, people and their contributions to the United States (e.g., Pilgrims, George Washington, American Revolution, Abe Lincoln, Civil War, Columbus, Native Americans, Rosa Parks, Martin Luther King, Jr.).</p>			
<p>SS.O.03.05.02</p>	<p>research the settlement of a community/region and construct a timeline representing the settlement of a community/region using primary sources (e.g. publications, maps, journals, letters, etc.)</p>			
<p>SS.O.03.05.03</p>	<p>compare and contrast present cultures to the cultures of people of other historical time periods (e.g., source of food, clothing, shelter, products used).</p>			
<p>SS.O.03.05.04</p>	<p>make historical inferences by analyzing artifacts and pictures.</p>			
<p>SS.O.03.05.05</p>	<p>discuss and draw conclusions about current events.</p>			
<p>SS.O.03.05.06</p>	<p>research the lives of famous Americans, customs and traditions using various forms of literature (e.g., presidents, inventors, explorers, civil rights leaders, artists, writers).</p>			
<p>SS.O.03.05.07</p>	<p>explain the importance of respect for diversity in the heritage, culture, ideas and opinions of others.</p>			
<p>SS.O.03.05.08</p>	<p>compare and contrast different stories or accounts about past events, people, places or situations and identify how they contribute to our understanding of the past.</p>			
<p>SS.O.03.05.09</p>	<p>discuss and sequentially organize a series of pictures that reflect historic change (e.g., transportation, technology, agriculture, events in history).</p>			
<p>SS.O.03.05.10</p>	<p>organize information from various reference sources to prepare short reports and presentations.</p>			

<p>Grade 3</p>	<p>Social Studies</p>
<p>Standard: 6</p>	<p>Reading</p>

SS.S.03.06

Students will

- use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre.
- recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events).
- distinguish relationships among people, ideas, and events.
- recognize cause-effect relationships in content passages.
- outline sequences of events.
- summarize events and ideas. Infer main idea or purpose of content.
- draw generalizations and conclusions about people, ideas and events.
- write and edit organized texts of various genres to insure that information is clearly understood.

Refer to policy 2520.1 for specific grade level reading and writing objectives.

Fourth Grade Social Studies Content Standards and Objectives

Fourth grade Social Studies is an introduction to the growth of the United States from exploration and colonization (When The Three Worlds Meet) to the conclusion of the American Revolution. Students will analyze the assimilation of various colonial groups, development of improved technology, major historical figures and events. Students will also learn about the physical geography of North America and its influence upon diverse cultures. Data collection and the essential roles of citizens in the democratic process will be emphasized. Roles of elected officials, economic trade-offs and the need for taxation will be introduced. Students will learn how the economic concepts of competition, advertising, budgeting and taxation impact production and consumption. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 4 Social Studies		Performance Descriptors (SS.PD.04.1)	
Standard: 1	Citizenship	Above Mastery	Mastery
SS.S.04.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Fourth-grade students performing at the above mastery level in citizenship summarize the characteristics or skills needed to be a good citizen within the school and community and to demonstrate leadership within the classroom. They choose and participate in a volunteer program and evaluate personal and group accomplishments</p>	<p>Fourth-grade students performing at the mastery level in citizenship evaluate the responsibilities, privileges and rights of U.S. citizenship and the importance of civic life, giving examples of responsible leadership. They choose a volunteer program, set goals, and work independently and cooperatively to accomplish goals. They discuss the</p>
		<p>Fourth-grade students performing at the partial mastery level in citizenship define civic life and give examples of responsible citizenship. Early American society; and list examples of individual rights in conflicts, and explain peaceful resolutions.	diversity in Early American society; and be exposed to individual rights in conflicts, and examples of peaceful resolutions.
Objectives Students will				
SS.O.04.01.01	Outline various public and private agencies in the community that provide services, explain why you would volunteer to help them, and then give examples of responsible leadership by individuals and groups in your community			
SS.O.04.01.02	Identify and explain the commonly held democratic values, principles, and beliefs expressed in the Declaration of Independence and the significance of patriotic symbols, holidays, celebrations, and famous people.			
SS.O.04.01.03	research forms of diversity in early American society, and give examples of the strengths/contributions of each (e.g., indentured servants, slaves, colonists, plantation owners, Native Americans, merchants).			
SS.O.04.01.04	evaluate the responsibilities, privileges and rights of United States citizenship and the importance of civic life (e.g., voting, jury duty, obeying laws, freedom of speech, worship, paying taxes).			
SS.O.04.01.05	research recent and historical conflicts concerning individual rights at the international, national, and local levels; then explain how those conflicts were resolved and suggest ways for peaceful conflict resolution.			

Grade 4				
Standard. 2				
Civics/Government				
Students will				
SS.S.04.02	<ul style="list-style-type: none"> examine and analyze the purposes and basic principles of the United States government (Purposes of Government). outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs). 			
Performance Descriptors (SS.PD.04.2)

<p>SS.S.04.03</p>	<p>Students will</p> <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies). 			
<p>Performance Descriptors (SS.PD.04.03)</p>				
<p><u>Distinguished</u></p> <p>Fourth-grade students performing at the distinguished level in economics compare and contrast consumers and producers and their economic effect. They develop hypothetical budgets, including trade-offs in simulated situations. Students create criteria for selecting products in order to recommend choices consistent with a budget. They debate factors that shaped the economy and evaluate those which affect the economy today.</p>	<p><u>Above Mastery</u></p> <p>Fourth-grade students performing at the above mastery level in economics research the characteristics of consumers and products. They develop a budget to reflect specific trade-offs and design a budget-based on price comparisons. Students categorize factors that shaped the economy of the early colonies and summarize their relative importance.</p>	<p><u>Mastery</u></p> <p>Fourth-grade students performing at mastery level in economics differentiate between consumers and producers of goods, explain trade-offs or choices and compromises and analyze how media affects consumer choices. They prioritize by importance factors that shaped the economy of the early colonies and the early United States and summarize their effects. They anticipate how competition affects prices and construct and interpret charts for price comparisons.</p>	<p><u>Partial Mastery</u></p> <p>Fourth-grade students performing at the partial mastery level in economics list examples of consumers and producers of trade-off or choices and compromises. They select media examples of and show how they affect choice. They illustrate how competition affects price and report how price affects choices. Students discuss how identified factors shaped the economy of the early colonies.</p>	<p><u>Novice</u></p> <p>Fourth-grade students performing at the novice level in economics recognize examples of consumers and producers of goods. They recognize trade-offs or choices and compromises. They understand that media affects their choices. Students recall and retell the concept of competition affecting price, and they understand that prices differ on selected products. They identify factors that shaped the economy of the early colonies.</p>
<p><u>Fourth grade students performing at the distinguished level in economics:</u></p> <p>debate and evaluate the economic factors that shaped the early American colonies before and after the Revolutionary War</p>	<p><u>Fourth grade students performing at the above mastery level in economics:</u></p> <p>analyze how economic factors shaped the early American colonies before and after the Revolutionary War</p>	<p><u>Fourth grade students performing at mastery level in economics:</u></p> <p>prioritize and summarize the economic factors that shaped the early American colonies before and after the Revolutionary War</p>	<p><u>Fourth grade students performing at the partial mastery level in economics:</u></p> <p>summarize the economic factors that shaped the early American colonies before and after the Revolutionary War</p>	<p><u>Fourth grade students performing at the novice level in economics:</u></p> <p>recognize that economic factors helped shape the early American colonies before and after the Revolutionary War</p>

<p>including slavery and indentured servitude;</p> <p>summarize key economic concepts and factors that impact consumer choices, and defend a budget based on the summary.</p> <p>prioritize the public services which taxes provide and predict future services that may be needed, and</p> <p>select and use the correct graphics needed to interpret data and predict outcomes.</p>	<p>indentured servitude:</p> <p>analyze key economic concepts and factors that impact consumer choices, and develop a budget based on the analysis:</p> <p>analyze how taxes pay for public services; and</p> <p>construct graphics to display data and use the information to draw conclusions.</p>	<p>including slavery and indentured servitude:</p> <p>explain and give examples of key economic concepts and analyze factors that impact consumer choices;</p> <p>relate the concept of taxation to public services; and</p> <p>construct graphics to display data.</p>	<p>slavery and indentured servitude:</p> <p>give examples of key economic concepts and understand that multiple factors impact consumer choices;</p> <p>state that taxes pay for public services; and</p> <p>read graphics and interpret simple data.</p>	<p>slavery and indentured servitude:</p> <p>recognize examples of key economic concepts and state that consumers make choices;</p> <p>define taxes and public services; and</p> <p>identify information in simple graphics.</p>
<p>Objectives Students will</p>				
<p>SS.O.04.03.01</p>	<p>Explain and give examples of the following economic concepts:</p> <ul style="list-style-type: none"> • trade-offs or choices/compromise – opportunity costs (e.g., developing hypothetical budgets in simulated situations) • people as consumers and as producers of goods • effects of competition and supply-demand on prices 			
<p>SS.O.04.03.02</p>	<p>analyze communications techniques that impact consumer choices (e.g., print/nonprint, advertisement, media)</p>			
<p>SS.O.04.03.03</p>	<p>prioritize in order of importance the factors that shaped the economy of the early American colonies and identify the effects of the American Revolution on economic development and economic institutions.</p>			
<p>SS.O.04.03.04</p>	<p>relate the concept of taxation to public services.</p>			
<p>SS.O.04.03.05</p>	<p>summarize how slavery and indentured servitude influenced the early economy of the United States.</p>			
<p>SS.O.04.03.06</p>	<p>construct and use charts, graphs, tables and grids to display data.</p>

level in geography: use maps to analyze the data regarding differences in the physical features of North, South, and Central American countries; anticipate the lifestyle changes of people in North, South and Central American countries before and after the arrival of the Europeans; and predict the effects of geographic factors on future physical, economic, political, and transportation changes.	level in geography: plan and create maps of North, South, and Central American countries, that show detailed physical features; analyze the differences in the lifestyles of the people before and after the arrival of the Europeans; and use maps to make connections between the effect of geographic factors on physical, economic, political, and transportation changes.	level in geography: use maps to locate the physical features of North, South, and Central American countries; and compare the lifestyles of the inhabitants before and after the arrival of the Europeans; and plan and construct maps to analyze the effect of geographic factors on physical, economic, political, and transportation changes.	level in geography: identify North, South, and Central American countries on a map and describe their physical features; discuss the lifestyles of the people before and after the arrival of the Europeans; and construct maps and recognize the effect of geographic factors on physical, economic, political, and transportation changes.	level in geography: name North, South, and Central American countries and describe a physical feature of each; identify the different lifestyles of the people before and after the arrival of the Europeans; and read maps and name an effect of geographic factors on physical, economic, political, and transportation changes.
Objectives	Students will			
SS.O.04.04.01	locate North, South and Central American countries and describe their major physical features (e.g., bodies of water, mountains, rivers, grasslands, oases) using geographic terms.			
SS.O.04.04.02	Analyze and assess the effects of and explain how people adapted to geographic factors (e.g., climate, mountains, bodies of water) on the following: <ul style="list-style-type: none"> • transportation routes • settlement patterns and population density • culture (e.g., jobs, food, clothing, shelter, religion, government) • interactions with others (local, national, global) 			
SS.O.04.04.03	compare and contrast the physical, economic and political changes of America caused by geographic conditions and human intervention (e.g., bridges, canals, state boundaries, transportation).			
SS.O.04.04.04	locate the settlement areas of the Native American nations and explain their lifestyle before the arrival of the Europeans.			
SS.O.04.04.05	plan and construct maps to demonstrate knowledge of map skills (e.g., symbols in a legend/key, lines of demarcation [Equator, Prime Meridian, latitude and longitude, time zones, borders, coast lines], scales, directions [cardinal and intermediate] and geographic barriers).			

Standard: 5	History
SS.S.04.05	<p>Students will</p> <ul style="list-style-type: none"> organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application (Chronology). use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities). use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation). examine political institutions and theories that have developed and changed over time; and research and cite reasons for development and change (Political Institutions).

Performance Descriptors (SS.PD.04.05)	
Distinguished	Above Mastery
<p>Fourth-grade students performing at the distinguished level in history compare and contrast sources of information to reconstruct the past. They chronologically organize selected episodes of Native Americans, explorers, settlers, and colonists and summarize their importance. They analyze data and reconstruct scenarios to predict a variety of possible outcomes. Students prioritize the effects on U.S. colonization by 15th and 16th century European explorers. They evaluate factors influencing the founding of the original colonies, critique major leaders, and sequence events from American colonization through the Revolutionary</p>	<p>Fourth-grade students performing at the above mastery level in history organize sources of information to reconstruct the past. Novice	Fourth-grade students performing at the novice level in history use sources of information to reconstruct the past. They use a timeline to chronologically organize selected episodes of Native Americans, explorers, settlers, and colonists. Students discuss the explorations of 15 th and 16 th Century European explorers and their effect on U.S. colonization. They discuss factors influencing the founding of the original colonies and major leaders and events from American colonization through the Revolutionary War. Students discuss the different areas of early American settlements and territorial expansion and population distribution. They identify ways in which

<p>War. Students compare and contrast the areas and patterns of early American settlements. They research territorial expansion and population distribution. Students justify ways in which explorers and settlers adapted to, used, and changed their environment. They discriminate between family and community life in various regions of Colonial America. Students prioritize the roles and responsibilities of colonial men, women, children, and elderly. They appraise cultural characteristics of the colonists and Native Americans to determine similar interests, responsibilities, and goals. They justify the background similarities and differences, motivations, and occupational skills of people in English, French, and Spanish settlements. Students debate reasons for going to war with England. They classify American leaders according to their reasons for choosing to go or not to go to war.</p> <p>Fourth grade students</p>	<p>colonization through the Revolutionary War. Students research the areas and patterns of early American settlements and compare territorial expansion and population distribution. Students classify ways in which explorers and settlers adapted to, used, and changed their environment. They interpret how and why family and community life differed in various regions of Colonial America. Students categorize the roles and responsibilities of colonial men, women, children, and elderly. They compare/contrast cultures of the colonists and Native Americans, appraising the characteristics of each culture that had the most positive effect on the other. They critique background similarities and differences, motivations, and occupational skills of people in English, French, and Spanish settlements. Students research events that led up to the decision to win independence from England. They compare and contrast American leaders and their reasons for choosing to go to war.</p> <p>Fourth grade students</p>	<p>Students identify areas and patterns of early American settlement and depict territorial expansion and population distribution. Students critique ways in which explorers and settlers adapted to, used, and changed their environment, and compare/contrast how and why family and community life differed in various regions of Colonial America. Students compare the roles and responsibilities of colonial men, women, children, and elderly. They compare/contrast cultures of the colonists and Native Americans and describe the results of their interaction. They explain background similarities and differences, motivations, and occupational skills of people in English, French, and Spanish settlements. Students organize and categorize facts that led to the Revolutionary War. They research the reasons why Americans and their leaders chose war to win independence from England.</p> <p>Fourth grade students</p>	<p>expansion and population distribution. They research ways in which explorers and settlers adapted to, used, and changed their environment. They identify how and why family and community life differed in various regions of Colonial America. Students list the roles and responsibilities of colonial men, women, children, and elderly. They research cultures of the colonists and Native Americans discuss the ways in which they interacted. They list background characteristics, motivations, and occupational skills of people in English, French, and Spanish settlements. Students list facts and events that led to the Revolutionary War. analyze and anticipate patterns of early American settlement and territorial expansion using primary documents, maps, and charts.	research and explain patterns of early American settlement and territorial expansion using primary documents, maps, and charts.	research primary documents, maps and charts and show patterns of early American settlement and territorial expansion.	use primary documents, maps, and charts to show patterns of early American settlement and territorial expansion.	read summaries of primary documents, recognize patterns of early American settlement and territorial expansion from maps, and charts.
Objectives Students will				
SS.O.04.05.01	create timelines to sequence and infer connections between events in major historical periods in U.S. history (e.g., discovery, colonization, revolution)			
SS.O.04.05.02	chronologically organize and explain the influences of individuals and events discussed in the stories of Native Americans, explorers, settlers and colonists in North America through the Revolutionary Period.			
SS.O.04.05.03	research and compare the influence of various factors of the founding of the original colonies (e.g., economic, geographic, political, religious).			
SS.O.04.05.04	identify areas and patterns of early American settlement and depict territorial expansion and population distribution in the United States through maps, charts, pictures and research projects.			
SS.O.04.05.05	list the European explorers of the 15th and 16th centuries, explain their reasons for exploration and the information gained from their journeys and then show how their travels in North America affected both North America and the rest of the world.			
SS.O.04.05.06	Compare and contrast community life and family roles in various regions and social classes of colonial America.			
SS.O.04.05.07	research how and why African Americans came to America and explain the motivation behind the development of slavery.			
SS.O.04.05.08	chronologically organize and categorize the major events leading to and during the Revolutionary War; examine and explain why and how these events influenced choice made by different groups (e.g., Patriots, Loyalists, Native Americans) during this period.			
SS.O.04.05.09	describe language, stories, music, folk tales, and artistic creations as expressions of culture that influenced the behaviors of people in colonial America.			
SS.O.04.05.10	compare and contrast the cultures of the colonists and Native Americans and describe the changes that occurred when they came into contact with one another.			
SS.O.04.05.11	explain the similarities and differences in backgrounds, motivations and occupational skills between people in the English settlements and those in the French and Spanish settlements.			
SS.O. 04.05.12	select, analyze, interpret and use information from various sources for reconstructing the past (e.g., documents, letters, maps, photos, newspaper articles) and prepare short reports that explain who, what, when, where, how and why events occurred as they did.			

Grade 4	Social Studies
Standard: 6	Reading

SS.S.04.06

Students will

- use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre.
- recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events).
- distinguish relationships among people, ideas, and events.
- recognize cause-effect relationships in content passages.
- outline sequences of events.
- summarize events and ideas. Infer main idea or purpose of content.
- draw generalizations and conclusions about people, ideas and events.
- write and edit organized texts of various genres to insure that information is clearly understood.

Refer to policy 2520.1 for specific grade level reading and writing objectives.

Fifth Grade Social Studies Content Standards and Objectives

The fifth grade Social Studies program is a basic overview of the United States beginning with its emergence as a new nation. Students recognize and evaluate the significance of major events of each historical period. Students examine primary source documents relating to the establishment of the nation and the new government. They continue to learn the role of citizenship and social responsibility in the school and community. Students examine the transformation from rural to urban and from agriculture to industry focusing on the economic impact of these moves. Students learn how government decisions impact the economy. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 5 Social Studies		Performance Descriptors (SS.PD.05.1)	
Standard	Citizenship	Above Mastery	Mastery
SS.S.05.01	<p>Students will</p> <ul style="list-style-type: none"> • characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). • model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). • develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). • develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). • recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Fifth-grade students performing at the above mastery level in citizenship clarify the roles of an American citizen in relation to responsibilities, rights, involvement in political processes and decision-making. Students defend the source of governmental power, the belief in common values and principles as defined by our core documents. Students participate in groups or</p>	<p>Fifth-grade students performing at the mastery level in citizenship explain the rights, responsibilities, participation and involvement in political processes and decision-making. justify the steps taken for a bill to become law. recognize the evolution of laws to establish order and manage conflict and argue points of law in a mock trial.	analyze the steps taken for a bill to become law. recognize the evolution of laws to establish order and manage conflict and participate in a mock trial.	outline the steps necessary for a bill to become law. explain the evolution of laws to establish order and manage conflict and participate in a mock trial.	list the steps necessary for a bill to become law. tell how laws evolve to meet the wants and needs of people and participate in a mock trial.	name the steps taken for a bill to become law and take part in a mock trial.
Objectives Students will				
SS.O.05.02.01	Judge whether local, state and national governments do or do not provide for the needs and wants of people, establish order and manage conflict.			
SS.O.05.02.02	assume a role in a mock proceeding to demonstrate the trial by jury process.			
SS.O.05.02.03	examine, analyze and compare these three founding documents of the United States: <ul style="list-style-type: none"> Articles of Confederation Bill of Rights First three articles of the Constitution 			
SS.O.05.02.04	analyze the importance of laws and explain and illustrate how laws are made and how they affect the home, classroom, school, community, state, nation and world.			

Grade 5	Social Studies			
Standard: 3	Economics			
SS.S.05.03	Students will <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies). 			

Performance Descriptors (SS.PD.05.03)

environment to cultural patterns in the United States.	human activities and the environment.	activities and the environment shaped the United States.
Objectives	Students will	
SS.O.05.04.01	interpret and draw conclusions from United States maps (e.g., special purpose maps, graphs, charts, tables, timelines).	
SS.O.05.04.02	measure distances in latitude and longitude using a scale on a variety of maps and globes and then transfer the concept of cardinal and intermediate directions to describe the relative location of countries by hemisphere and proximity to the equator.	
SS.O.05.04.03	locate, identify and compare the major rivers, landforms, natural resources, climate regions, major soil regions and deserts of the United States and use a variety of maps to analyze the frequency or lack of urban areas within these regions	
SS.O.05.04.04	compare and contrast the various regions of the United States, locate each of the fifty United States and correlate them with their regions.	
SS.O.05.04.05	examine the role of geography in the history of the United States expansion by correlating the conditions of the environment to cultural patterns and the westward movement and settlement to the location of natural resources and physical geography conditions.	
SS.O.05.04.06	research how people have changed the environment of the United States, critique their actions and report your findings to the class.	

Grade 5 Social Studies	
Standard: 5	History
SS.S.05.05	Students will <ul style="list-style-type: none"> organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application (Chronology). use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities). use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation). examine political institutions and theories that have developed and changed over time; and research and cite reasons for development and change (Political Institutions).

--	--	---	--	--

Objectives | Students will

SS.O.05.05.01	analyze the events and the historic figures responsible for such documents as the United States Constitution, the Bill of Rights and the Emancipation Proclamation and explain why maintaining such documents, records and landmarks is important to the United States.
SS.O.05.05.02	create a timeline showing the arrival of major immigrant groups and describe their experiences and influence upon American society using primary source documents.
SS.O.05.05.03	describe the development of transportation in the United States and explain its impact on settlement, industry and residential patterns as well as the social and technological changes that occurred through the time of the Industrial Revolution.
SS.O.05.05.04	interpret quotes of famous Americans from various periods of history and explain how songs, symbols and slogans demonstrate freedom of expressions (e.g., patriotism, abolition of slavery, women's suffrage, labor movements, Civil Rights Movement)
SS.O.05.05.05	research important figures and their reactions to events and judge their significance to the history of our democracy (e.g., George Washington, Thomas Jefferson, Abraham Lincoln, Sojourner Truth, Susan B. Anthony, Eleanor Roosevelt and Martin Luther King, Jr.).
SS.O.05.05.06	evaluate the contributions of regional folk heroes and other popular figures and judge the significance of those contributions to the cultural history of the United States (e.g., frontiersmen such as Daniel Boone, cowboys, mountain men such as Jedediah Smith, American Indian Chiefs including Geronimo and outlaws such as Billy the Kid).
SS.O.05.05.07	explain the issues faced by Washington when he became the first United States President.
SS.O.05.05.08	discuss reasons for westward expansion and explain how the government policies affected the inhabitants of the American West (e.g., Native Americans, their nations and their landholdings).
SS.O.05.05.09	analyze the impact of slavery and the Abolitionist Movement upon the development of the United States.
SS.O.05.05.10	identify causes, major events and important people of the Civil War and explain why various reconstruction plans succeeded or failed.
SS.O.05.05.11	summarize the events that led to the United States becoming a world power.
SS.O.05.05.12	Identify the key figures and events, explain the causes and analyze the effects of World War I, the Great Depression, and World War II on the American people and on the policies of the United States government.
SS.O.05.05.13	research significant leaders in the Civil Rights Movement (e.g., John Fitzgerald Kennedy, Martin Luther King, Jr., Rosa Parks, Lyndon Johnson, Susan B. Anthony).

Grade 5	Social Studies
Standard: 6	Reading
SS.S.05.06	<p>Students will</p> <ul style="list-style-type: none"> use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). distinguish relationships among people, ideas, and events. recognize cause-effect relationships in content passages. outline sequences of events. summarize events and ideas. Infer main idea or purpose of content. draw generalizations and conclusions about people, ideas and events.

- | | |
|--|---|
| | <ul style="list-style-type: none">• write and edit organized texts of various genres to insure that information is clearly understood. <p>Refer to policy 2520.1 for specific grade level reading and writing objectives.</p> |

Sixth Grade Social Studies Content Standards and Objectives

Sixth grade Social Studies provides an interdisciplinary examination of selected world regions: North America, South America, Western Europe and the Middle East. Students study historical and current developments, characteristics of places, connections between states and nation-states. Emphasis is placed on how environment, technology and resources have helped to determine economic relations and conflicts between these regions in the past and how these factors will influence the interactions of these four regions of the world throughout the 21st Century. Various economic systems are introduced. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 6 Social Studies		Social Studies	
Standard: 1 Citizenship		Citizenship	
SS.S.06.01	Students will <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life).

<p>research and use data to discover and summarize the</p>	<p>determine the contributions of selected civilizations and</p>	<p>categorize the contributions of selected civilizations and</p>	<p>describe the contributions of selected civilizations and</p>	<p>list the contributions of selected civilizations and</p>

<p>contributions of selected civilizations and explain the positive and negative effects of the contributions on other cultures;</p> <p>create an original graphic connecting the significance of people, places, documents, ideas and events in selected locations;</p> <p>research and compile data to evaluate and critique selected world events and connect their consequences; and</p> <p>choose credible sources to summarize world events and critique the influences on the outcomes of those events as they impacted various world regions in different ways.</p>	<p>evaluate the importance of their influence on other cultures;</p> <p>evaluate the significance of people, places, documents, ideas and events in selected locations;</p> <p>use compiled data to show comparisons of selected world events and their consequences; and</p> <p>research and identify the credible sources required to evaluate the importance of historical events and the impact of and the reaction to those events worldwide.</p>	<p>describe how those contributions influenced other cultures;</p> <p>explain the significance of people, places, documents, ideas and events in selected locations;</p> <p>examine selected world events and relate them to their respective consequences; and</p> <p>use credible sources to examine the causes and effects of historical events and analyze the impact of those events in selected world regions.</p>	<p>and connect them with the cultures they influenced;</p> <p>describe the significance of people, places, documents, ideas and events in selected locations;</p> <p>describe selected world events and identify their consequences; and</p> <p>use credible sources to identify and discuss historical events and the impact of those events.</p>	<p>recall their influence on other cultures;</p> <p>tell the significance of people, places, documents, ideas and events in selected locations;</p> <p>name selected world events and recognize their consequences; and</p> <p>use credible sources to name some of the impacts of historical events.</p>
<p>Objectives Students will</p>				
<p>SS.O.06.05.01</p>	<p>identify and evaluate contributions of past civilizations and show reasons for their rise and fall.</p>			
<p>SS.O.06.05.02</p>	<p>examine the defining characteristics of monotheistic religions and analyze the impact of Arab/Islamic society and Judeo-Christian societies on western civilizations</p>			
<p>SS.O.06.05.03</p>	<p>determine the causes and consequences of the Protestant Reformation.</p>			
<p>SS.O.06.05.04</p>	<p>analyze how Europeans benefited by expansion in the New World in the following:</p> <ul style="list-style-type: none"> • economics • culture • trade • new agricultural products. 			
<p>SS.O.06.05.05</p>	<p>examine the development of slavery and illustrate its impact on the political, economic and social systems throughout the world.</p>			
<p>SS.O.06.05.06</p>	<p>research and describe major historical events in the development of transportation systems (e.g., water, rail, motor vehicles, aviation).</p>			
<p>SS.O.06.05.07</p>	<p>illustrate the influx of ethnic groups into North America by interpreting timelines, charts and tables.</p>			

SS.O.06.05.08	examine the Industrial Revolution and explain the effects it had on the lives of people throughout the world and assume the role of a person who lived in that era.
SS.O.06.05.09	analyze and trace the development of democracy using a variety of credible sources.
SS.O.06.05.10	compare and contrast the worth of the individual in different societies over time and assume the role of one of these individuals.
SS.O.06.05.11	examine the causes and effects of the Great Depression and analyze the political responses of governments to this crisis (e.g., rise of Hitler, Fascism, militarism in Japan, New Deal in the United States).
SS.O.06.05.12	cite the global tensions that led to the outbreak of WW I and WW II and give examples of the impact each war had on selected regions of the world.
SS.O.06.05.13	point out the key figures, philosophies and events in the Civil Rights movements including minority rights and the rights of women (e.g., apartheid, Mandela, Martin Luther King Jr.,).
SS.O.06.05.14	debate the pros and cons of the impact of nuclear power and analyze how it might relates to the issue of atomic weapons.

Grade 6	Social Studies
Standard: 6	Reading
SS.S.06.06	<p>Students will</p> <ul style="list-style-type: none"> • use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. • recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). • distinguish relationships among people, ideas, and events. • recognize cause-effect relationships in content passages. • outline sequences of events. • summarize events and ideas. Infer main idea or purpose of content. • draw generalizations and conclusions about people, ideas and events. • write and edit organized texts of various genres to insure that information is clearly understood. <p>Refer to policy 2520.1 for specific grade level reading and writing objectives.</p>

Seventh Grade Social Studies Content Standards and Objectives

Seventh Grade: World Geography

Seventh grade social studies examines geography through the six essential elements: The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment and Society and Uses of Geography. Students will examine people, places and events of today and analyze the relationships between them (culture, history, environmental concerns, political and economic systems) and their impact on the future of our world. Students will use 21st century technology as well as critical thinking and problem-solving skills to construct and interpret maps, graphs, charts, spreadsheets and other data to evaluate and synthesize global information from a geographical perspective. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 7 Social Studies		Performance Descriptors (SS.PD.07.1)	
Standard: 1	Citizenship	Above Mastery	Mastery
SS.S.07.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Seventh-grade students performing at the above mastery level in citizenship assess the rights of citizens from various world regions and communicate how they relate to those of the United States citizens. 		<p>Partial Mastery</p> <p>Students performing at the partial mastery level in citizenship identify the rights of citizens from various world regions and compare them to those of United States citizens. Students identify an influence that the American democratic system has had on other nations. Students identify an influence another nation has had on American politics</p>	<p>Novice</p> <p>Students performing at the novice level in citizenship identify issues of public concern in the United States and other world areas. Students recognize social responsibility and identify citizen actions. Students define power and authority.</p>

<p>the influences of those nations on American politics and society. Students evaluate and give examples of differences between power and authority.</p> <p>Seventh grade students at the distinguished level in citizenship:</p> <p>research and draw conclusions of how other nations' laws are influenced by American democratic ideals and prove the influence of other nations on American politics and society and distinguish between power and authority.</p> <p>debate and defend how the rights, responsibilities, and participation of citizens in world regions relates to the American democratic system;</p> <p>draw conclusions about citizen actions that influence public policy decisions and develop original solutions for real world political issues at all levels; and</p> <p>formulate and lead civic discussions on a variety of topics consistent with the ideals of a democratic</p>	<p>politics and society. Students explain the rights of citizens and distinguish between power and authority.</p> <p>Seventh grade students at the above mastery level in citizenship:</p> <p>assess how laws of other nations are influenced by American democratic ideals and how other nations influence American politics and society and distinguish between power and authority.</p> <p>communicate how the rights, responsibilities, and participation of citizens in world regions relates to the American democratic system;</p> <p>research, organize and model citizen actions that influence public policy decisions to develop a solution for a real world political issue; and</p> <p>actively participate in formulating civic discussions on a variety of topics consistent with the</p>	<p>world regions and analyze how these actions influence public policy decisions. Students will differentiate between power and authority.</p> <p>Seventh grade students at the mastery level in citizenship:</p> <p>compare and contrast nations laws and differentiate between power and authority;</p> <p>compare and contrast the rights, responsibilities, and participation of citizens in world regions;</p> <p>research, organize and model citizen actions that influence public policy decisions; and</p> <p>apply and practice civic discussion consistent with the ideals of a democratic republic.</p>	<p>and society. Students recognize the differences between power and authority.</p> <p>Seventh grade students at the partial mastery level in citizenship:</p> <p>identify the differences in the laws of nations laws and describe differences between power and authority.</p> <p>identify the rights, responsibilities, and participation of citizens in world regions;</p> <p>describe citizen actions that influence public policy decisions; and</p> <p>practice civic discussion consistent with the ideals of a democratic republic.</p>	<p>Seventh grade students at the novice level in citizenship:</p> <p>recognize the laws of nations and differentiate define power and authority.</p> <p>recognize the rights, responsibilities of citizens in world regions;</p> <p>identify citizen actions that influence public policy decisions; and</p> <p>participate in civic discussion consistent with the ideals of a democratic republic.</p>
---	--	---	--	--

republic that demonstrate good communication skills.	ideals of a democratic republic.	
Objectives Students will		
SS.O.07.01.01	compare and contrast individual rights of citizens in a variety of world regions	
SS.O.07.01.02	model the actions citizens take to influence public policy decisions.	
SS.O.07.01.03	compare and contrast nations' laws that may or may not provide order, predictability and security.	
SS.O.07.01.04	research and organize information about an issue of public concern from multiple points of view.	
SS.O.07.01.05	apply and practice selective forms of civic discussion and participation consistent with the ideas of citizens in a democratic republic.	
SS.O.07.01.06	recognize and differentiate between power and authority.	

Grade 7 Social Studies		
Standard: 2 Civics		
SS.S.07.02	Students will <ul style="list-style-type: none"> examine and analyze the purposes and basic principles of the United States government (Purposes of Government). outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs). 	

Performance Descriptors (SS.PD.07.2)			
Distinguished	Above Mastery	Mastery	Partial Mastery
Students performing at the distinguished level in civics analyze different forms, processes and purposes of governments and their effectiveness. Students hypothetically apply methods of resolution to international conflict and evaluate the effectiveness of those methods. Students create situations of juxtaposition between rule of law and individual freedoms and resolve the conflicts.	Students performing at the Above-Mastery level in civics compare and contrast different forms, processes and purposes of world governments. Students compare and contrast the ways nations interact with one another to resolve conflict and maintain order. Students contrast rule of law with individual rights.	Students performing at the mastery level in civics evaluate forms, processes and purposes of world governments. Students compare and contrast the ways nations interact with one another to resolve problems. Students evaluate the need for rule of law.	Students performing at the novice level in civics identify different forms of government. Students identify a conflict between two countries. Students recognize the need for laws.

<p>Seventh grade students at the distinguished level in citizenship:</p> <p><u>analyze different forms of government to make comparisons and draw conclusions about the effectiveness of lawmaking processes;</u></p> <p><u>communicate effectively to argue the need for limited government and rule of law providing extensive examples and evidence;</u></p> <p><u>analyze the ways nations provide order and protect justice through analysis of current topics and evaluate for effectiveness;</u></p> <p><u>argue and compare the significance of the impact of U.S. influence on other nations and the influence of other nations on the U.S. political process and society; and</u></p> <p><u>apply the methods nations use to interact with one another to develop a solution to a real world issue of conflict.</u></p>	<p>Seventh grade students at the above mastery level in civics:</p> <p><u>compare and contrast different forms of government and analyze their lawmaking processes to make comparisons;</u></p> <p><u>debate the need for limited government and rule of law providing examples and evidence;</u></p> <p><u>compare and contrast the ways nations provide order and protect justice through analysis of current topics;</u></p> <p><u>summarize and discuss the influence the U.S. has on other nations and how other nations influence the U.S. political process and society; and</u></p> <p><u>apply the methods nations use to interact with one another to resolve problems and conflict.</u></p>	<p>Seventh grade students at the mastery level in civics:</p> <p><u>identify differences in forms of government and compare and contrast their lawmaking processes;</u></p> <p><u>identify limited government and rule of law;</u></p> <p><u>explain the ways nations provide order and protect justice;</u></p> <p><u>describe the influence the United States has on other nations and how other nations influence the American political process and society; and</u></p> <p><u>describe the ways nations interact with one another to resolve problems and conflict.</u></p>	<p>Seventh grade students at the novice level in civics:</p> <p><u>define different forms of government and different lawmaking processes</u></p> <p><u>recognize limited government and rule of law;</u></p> <p><u>list ways nations interact with one another to solve problems.</u></p> <p><u>give an example of the influence of the United States on other nations and an example of how other nations influence the United States; and</u></p> <p><u>list ways nations interact with one another to resolve problems and conflict.</u></p>
---	--	--	--

Objectives	Students will
SS.O.07.02.01	examine the different forms of government in various world regions.
SS.O.07.02.02	compare and contrast the lawmaking processes of world governments.
SS.O.07.02.03	analyze the different ways nations provide order and protect justice.
SS.O.07.02.04	debate the importance of limited government and the rule of law.
SS.O.07.02.05	evaluate various methods that nations use to interact with one another to resolve problems and conflicts.
SS.O.07.02.06	recognize and evaluate the influence of the United States on other nations and the influence of other nations on the American political process and society.

Grade 7 Social Studies Economics				
SS.S.07.03	Students will <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies). 			
Performance Descriptors (SS.PD.07.03)				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
Students performing at the distinguished level in economics critique economic systems and interpret how the interdependence of world economies influences price determination, government services, technology changes in agriculture and industrial development, resource use, natural and human events and world trade organizations.	Students performing at the above mastery level in economics compare and contrast economic systems, and their interdependence, and the various social services provided by world governments. Students appraise how technology impacts worldwide economic development, agricultural and industrial development, resource use, natural and human events and world trade organizations.	Students performing at the mastery level in economics compare economic systems, their interdependence, and the various social services provided by world governments. Students evaluate how technology impacts worldwide economic development, agricultural and industrial development, resource use, natural and human events and world trade organizations.	Students performing at the partial mastery level in economics describe the characteristics of economic systems and give examples of how technology impacts worldwide economic development, resource use, natural and human events and world trade organizations.	Students performing at the novice level in economics recognize and describe different economic systems. Students differentiate between the causes of supply and the causes of demand. Students list factors that can influence economic development.
Seventh grade students at	Seventh grade students at	Seventh grade students at	Seventh grade students at	Seventh grade students at

<p><u>the distinguished level in economics:</u></p> <p><u>critique economic systems, interpret the impact of interdependence on world economics, evaluate the social services provided by different governments and debate their effectiveness:</u></p> <p><u>research the impact of competition to develop an economic plan for the future that shows relationships between supply, demand and price; and</u></p> <p><u>predict how physical/human geography as well as future technological developments will impact worldwide economic, agricultural and industrial development.</u></p>	<p><u>the above mastery level in economics:</u></p> <p><u>analyze economic systems, explain the significance of their interdependence, and evaluate the various social services provided by different governments with these systems;</u></p> <p><u>analyze the relationship between supply, demand and price and research the impact of these factors on competition; and</u></p> <p><u>evaluate how physical and human geography and technology impacts worldwide economic, agricultural and industrial development.</u></p>	<p><u>the mastery level in economics:</u></p> <p><u>compare and contrast economic systems, explain their interdependence and the various social services provided by governments with these systems;</u></p> <p><u>illustrate the relationship between supply, demand and price and examine their impact of competition; and</u></p> <p><u>analyze how physical /human geography and technology impacts worldwide economic, agricultural and industrial development.</u></p>	<p><u>the novice level in economics:</u></p> <p><u>describe characteristics of economic systems, explain their interdependence, and identify social services provided by governments with these systems;</u></p> <p><u>explain the connection between supply, demand and competition; and</u></p> <p><u>identify and describe the physical / human geography and technology that influences economic, agricultural and industrial development.</u></p>	<p><u>the novice level in economics:</u></p> <p><u>recognize that there are different economic systems and list some of the social services provided by governments using these systems;</u></p> <p><u>define the terms supply, demand, price and recognize competition; and</u></p> <p><u>recall what the physical /human geography and technology influences are that affect economic, agricultural and industrial development.</u></p>
<p>Objectives Students will</p>				
<p>SS.O.07.03.01</p>	<p>examine how competition among buyers of a product results in higher prices, and illustrate the relationship between supply, demand and the price of that product.</p>			
<p>SS.O.07.03.02</p>	<p>analyze the physical and human geographic factors that influence the economy of a region.</p>			
<p>SS.O.07.03.03</p>	<p>define basic economic terminology and apply it to economic development of world regions.</p>			
<p>SS.O.07.03.04</p>	<p>compare and contrast various social services provided by world governments.</p>			
<p>SS.O.07.03.05</p>	<p>classify and compare different types of economic systems.</p>			
<p>SS.O.07.03.06</p>	<p>describe the impact of technology on agriculture and industry throughout the world.</p>			
<p>SS.O.07.03.07</p>	<p>classify and evaluate the different types of world trade organizations (e.g., trade, military, health).</p>			
<p>SS.O.07.03.08</p>	<p>assess the impact of natural and human events on industry worldwide (e.g., strikes, environmental disasters, war, terrorism).</p>			
<p>SS.O.07.03.09</p>	<p>formulate an explanation as to how countries are economically interdependent.</p>			

Grade 7 Social Studies	
Standard: 4 Geography	
SS.S.07.04	<p>Students will</p> <ul style="list-style-type: none"> interpret, and choose maps, globes and other geographic tools to categorize and organize information about personal directions, people, places and environments (The World in Spatial Terms). examine the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). analyze the physical processes that shape the earth's surface and create, sustain and modify the cultural and natural environment (Physical Systems). analyze and illustrate how the earth is shaped by the movement of people and their activities (Human Systems). analyze the interaction of society with the environment (Environment and Society). point out geographic perspective and the tools and assess techniques available for geographic study (Uses of Geography).
Performance Descriptors (SS.PD.07.04)	
Distinguished	<p>Students performing at the distinguished level in geography analyze spatial data using precise geographic terminology and tools to draw conclusions. Students make predictions about future connections between the geographic regions and cultures of the world and how the physical and human processes interact to shape the environment. Students predict the impact of technology, communication and transportation on the global society. Students research and draw conclusions about new geographic frontiers such as oceans, Antarctica, and airspace.</p>
Above Mastery	<p>Students performing at the above-mastery level in geography analyze spatial data using precise geographic terminology and tools to draw conclusions. Students compare and contrast the geographic regions and cultures of the world and explain the connections between them. Students draw conclusions about how the physical and human processes interact to shape the environment. Students analyze the effects of technology, communication and transportation on the global society. Students research new geographic frontiers such as oceans, Antarctica, and airspace.</p>
Mastery	<p>Students performing at the mastery level in geography analyze spatial data using appropriate geographic terminology and tools. Students describe the geographic regions and cultures of the world and how the physical and human processes interact to shape the environment. Students analyze the effects of technology, communication and transportation on the global society. Students research new geographic frontiers such as oceans, Antarctica, and airspace.</p>
Partial Mastery	<p>Students performing at the partial-mastery level in geography use appropriate geographic terminology and tools. Students describe the geographic regions and cultures of the world and how the physical and human processes interact to shape the environment. Students recognize the effects of technology, communication and transportation on the global society. Students recognize new geographic frontiers such as oceans, Antarctica, and airspace.</p>
Novice	<p>Students performing at the novice level in geography name appropriate geographic terminology and tools. Students identify the geographic regions and cultures of the world and how the physical and human processes interact to shape the environment. Students name the effects of technology, communication and transportation on the global society. Students locate new geographic frontiers such as oceans, Antarctica, and airspace.</p>

<p><u>geography:</u></p> <p>create accurate and relevant spatial data displays to predict the impact of future interactions between geographic regions;</p> <p>research the cultures of the world in select geographic regions and summarize how the physical and human processes interact to shape their environments; and</p> <p>predict the effects of innovations in technology, communication and transportation on the global society.</p>	<p><u>geography:</u></p> <p>use spatial data, precise geographic terminology and best tools to draw conclusions about the future of geographic regions;</p> <p>compare world geographic regions and explain the connections between cultural development and physical/ human processes that shape their environments; and</p> <p>draw conclusions about the effects of technology, communication and transportation on the global society</p>	<p><u>geography:</u></p> <p>analyze spatial data to identify and locate relevant information to draw conclusions about geographic regions;</p> <p>describe the geographic regions and cultures of the world and how the physical and human processes interact to shape their environments; and</p> <p>analyze the effects of technology, communication and transportation on the global society.</p>	<p><u>geography:</u></p> <p>use spatial data and appropriate geographic terminology and tools to find and describe information;</p> <p>identify the geographic regions and cultures of the world and define how the physical and human processes interact to shape their environments; and</p> <p>identify the effects of technology, communication and transportation on the global society.</p>	<p><u>geography:</u></p> <p>identify spatial data and define appropriate geographic terminology to find information;</p> <p>locate the geographic regions and cultures of the world and define the physical and human processes that shape their environments; and</p> <p>name ways technology, communication and transportation effect the global society.</p>
<p>Objectives</p>	<p>Students will</p>			
<p>SS.O.07.04.01</p>	<p>use correct geographic terminology to explain direction, location, time zones, physical features of the earth,</p>			
<p>SS.O.07.04.02</p>	<p>draw conclusions about information presented on special purpose maps and be able to differentiate among map types.</p>			
<p>SS.O.07.04.03</p>	<p>Identify and locate on a variety of maps and give examples of the following:</p> <ul style="list-style-type: none"> • seven continents • bodies of water • landforms • countries • cities • climate regions • transportation routes 			
<p>SS.O.07.04.04</p>	<p>describe and explain the advantages and disadvantages of different map projections and show examples of their uses (e.g., aerial photos, globes, charts, graphs, polar projection).</p>			
<p>SS.O.07.04.05</p>	<p>evaluate the importance of mental maps (perceptions) and illustrate how they affect our judgments about people and places.</p>			
<p>SS.O.07.04.06</p>	<p>analyze the patterns of immigration and examine its effects on the distribution of cultural patterns in a region (e.g., disease, language, religion, customs, diversity).</p>			

SS.O.07.04.07	analyze the growth of tourism and its impact on regional environments and culture.
SS.O.07.04.08	analyze and give examples of the ways in which these factors influence lifestyles regional interconnections: <ul style="list-style-type: none"> • economic • geographic • cultural • religious • political • social
SS.O.07.04.09	evaluate the impact of human processes on the world's physical environment (e.g., pollution, clear-cutting, strip mining).
SS.O.07.04.10	analyze the use and abuse of renewable and nonrenewable resources (e.g., hydroelectric power and fossil fuels), interpret how technology affects the ways in which culture groups perceive and use their resources, and give examples of ways to improve conservation of natural resources around the world.
SS.O.07.04.11	analyze the technological improvements in transportation and communication that have helped create a global society.
SS.O.07.04.12	explain the common geographic factors associated with the development of world urban centers.
SS.O.07.04.13	examine cooperation and conflict over control of the world's resources.
SS.O.07.04.14	create population pyramids to show comparisons of the characteristics of demographic structure in selected regions of the world (e.g., total size, birth rates, age, distribution, doubling time).
SS.O.07.04.15	explain culture in a geographic context (e.g., isolation, core area, movement).
SS.O.07.04.16	investigate and research new geographic frontiers such as the oceans, Antarctica and airspace and describe explorations and discoveries in these realms.

Grade 7	Social Studies
Standard: 5	History
SS.S.07.05	Students will <ul style="list-style-type: none"> • organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application (Chronology). • use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). • examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities). • use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation). and • examine political institutions and theories that have developed and changed over time; and research and cite reasons for development and change (Political Institutions).

situations and decisions.	decisions.	situations and decisions.	social situations and decisions.
Objectives	Students will		
SS.O.07.05.01	analyze the development of early civilizations (e.g., Mesopotamia, Egypt, Greece, China, India).		
SS.O.07.05.02	draw world history conclusions from maps, globes, charts, posters, graphs and timelines.		
SS.O.07.05.03	characterize conditions that have influenced or altered the movement of people throughout the world and time.		
SS.O.07.05.04	examine and chart religious and secular celebrations observed around the world.		
SS.O.07.05.05	research and explain the role of racial and ethnic minorities, women and children in the advancement of civil rights.		
SS.O.07.05.06	compare and contrast the beliefs, religion and mythology of native cultures throughout the world.		
SS.O.07.05.07	anticipate what occurs when people from different regions interact.		
SS.O.07.05.08	interpret the effect of the environment on native cultures (e.g., Native Americans, Australian Aborigines, African Berbers).		
SS.O.07.05.09	use a variety of credible sources to research, reconstruct and interpret the past.		
SS.O.07.05.10	describe the role geo-politics played in historic events.		

Grade 7	Social Studies
Standard: 6	Reading
SS.S.07.06	<p>Students will</p> <ul style="list-style-type: none"> use the dimensions of reading (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). distinguish relationships among people, ideas, and events. recognize cause-effect relationships in content passages. outline sequences of events. summarize events and ideas. Infer main idea or purpose of content. draw generalizations and conclusions about people, ideas and events. write and edit organized texts of various genres to insure that information is clearly understood. <p>Refer to policy 2520.1 for specific grade level reading and writing objectives.</p>

Eighth Grade Social Studies Content Standards and Objectives

Eighth Grade: West Virginia Studies

Eighth grade social studies engages students in the comprehensive study of West Virginia, from the Pre-Columbian period to the present day. Special emphasis is placed on the interdependence of geographic, cultural, political, environmental and economic factors affecting the development and future of the state. Students develop empathy for citizens worldwide as they demonstrate connections and loyalty to homeland. Students are actively engaged citizens of their school and community and develop national and global civic perspective and responsibility. Students become economically literate to understand West Virginia's global connectivity in the market place both as a producer and a consumer of international goods and services. Students synthesize their information to predict the future development and evolution of their state. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 8 Social Studies		Performance Descriptors (SS.PD.08.1)	
Standard 1	Citizenship	Above Mastery	Mastery
SS.S.08.01	Students will <ul style="list-style-type: none"> • characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). • model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). • develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). • develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). • recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	<p>Mastery Eighth-grade students performing at the mastery level in citizenship determine the importance of citizen actions and participation that influence action plans, public opinion and policy. Students evaluate how citizen participation at the local, state, and national levels</p>	<p>Partial Mastery Eighth-grade students performing at the partial mastery level in citizenship identify citizen action plans and public opinion reflecting the common good and core democratic values.</p>
		<p>Above Mastery Eighth-grade students performing at the above mastery level in citizenship evaluate citizen actions at the local, state, and national level. Students analyze and debate the effect of public opinion on the development of public policy and action plans and the effect on the common good and core</p>	<p>Novice Eighth-grade students performing at the novice level in citizenship match policy statements with citizen actions and list ways citizens can participate at the local, state, and national levels.</p>
		<p>Distinguished Eighth-grade students performing at the distinguished level in citizenship evaluate and predict how citizen action and participation influence public policy, action plans and public opinion reflecting the common good and core democratic values.</p>	

<p><u>Eighth grade students performing at the distinguished level in citizenship.</u></p> <p><u>predict how citizen actions will influence public policy, at the local, state and national level.</u></p> <p><u>create and recommend various plans of action outlining processes of expressing opinions, solving problems and seeking assistance; and</u></p> <p><u>compare and contrast models of public opinion turned to action and determine how these action plans affected the common good and core democratic values.</u></p>	<p><u>democratic values.</u></p> <p><u>Eighth grade students performing at the above mastery level in citizenship:</u></p> <p><u>make recommendations for citizen actions at the local, state, and national level;</u></p> <p><u>critique a plan of action outlining a the process of expressing opinions, solving problems and seeking assistance; and</u></p> <p><u>research and debate instances where public opinion affected the common good and preserved core democratic values.</u></p>	<p><u>promotes the common good. Students determine the importance of citizen actions and participation that influence action plans, public opinion and policy. Students examine the purpose of taxation to determine its
Mastery	Partial Mastery
Eighth-grade students performing at the mastery level in civics analyze the structure and function of the West Virginia and United States governments. Students examine constitutional principles including individual rights and responsibilities. Students assess the contributions of individuals to the law-making process.	Eighth-grade students performing at the partial mastery level in civics differentiate between the governments of West Virginia and the United States. Students define taxation and give examples of how government uses tax revenue. Students name significant individuals and their contributions to the law-making process.
Novice	Novice
Eighth-grade students performing at the novice level in civics name major branches of the governments of West Virginia and the United States. Students give an example of taxation and how the government uses tax revenue. Students match significant individuals to their contributions to the law-making process.	Eighth-grade students performing at the novice level in civics name major branches of the governments of West Virginia and the United States. Students give an example of taxation and how the government uses tax revenue. Students match significant individuals to their contributions to the law-making process.

<p><u>sessions and list their impact on the state.</u></p> <p><u>Eighth grade students performing at the distinguished level in civics:</u></p> <p><u>analyze the structure and function of the West Virginia and United States governments:</u></p> <p><u>debate relationship between constitutional principles, individual rights, and responsibilities; and</u></p> <p><u>justify and defend the impact of the contributions of individuals and groups who have influenced the law-making process.</u></p>	<p><u>importance to the function of government:</u></p> <p><u>Eighth grade students performing at the above mastery level in civics:</u></p> <p><u>compare and contrast the structure and function of the West Virginia and United States governments:</u></p> <p><u>critique constitutional principles including individual rights and responsibilities; and</u></p> <p><u>evaluate the impact of the contributions of individuals and groups to the law-making process.</u></p>	<p><u>Eighth grade students performing at the mastery level in civics:</u></p> <p><u>analyze the structure and function of the West Virginia and United States governments:</u></p> <p><u>examine constitutional principles including individual rights and responsibilities; and</u></p> <p><u>assess the impact of individuals, special interest groups, media influence public policy and government.</u></p>	<p><u>Eighth grade students performing at the partial mastery level in civics:</u></p> <p><u>differentiate between the governments of West Virginia and the United States:</u></p> <p><u>list constitutional principles, individual rights, and responsibilities; and</u></p> <p><u>name significant individuals and their contributions to the law-making process.</u></p>	<p><u>Eighth grade students performing at the novice level in civics:</u></p> <p><u>name major branches of the governments of West Virginia and the United States:</u></p> <p><u>Identify basic constitutional principles, individual rights and responsibilities; and</u></p> <p><u>match significant individuals to their contributions to the law-making process.</u></p>
<p>Objectives Students will</p>				
<p>SS.O.08.02.01</p>	<p>analyze the division of powers and responsibilities of the executive, legislative and judicial branches of the United States and West Virginia state government.</p>			
<p>SS.O.08.02.02</p>	<p>cite the elected officials at the national, state and local levels, their requirements, duties and responsibilities (e.g., President, Governors, Senators, Representatives/Delegates, Members of Board of Public Works, County Commissioners, Mayor/City Council).</p>			
<p>SS.O.08.02.03</p>	<p>examine the amendment process of the West Virginia Constitution, give examples of amendments and explain why they occurred.</p>			
<p>SS.O.08.02.04</p>	<p>outline, illustrate and develop a mock bill and assume the roles of lawmakers to accomplish passage of the bill into law (e.g., to promote tourism in West Virginia).</p>			
<p>SS.O.08.02.05</p>	<p>analyze the functions and jurisdictions of the federal, state, local and special courts (e.g., United States Supreme Court, State Supreme Court, circuit courts, magistrate courts, family courts) and explain why a selected case would be heard in a designated court.</p>			
<p>SS.O.08.02.06</p>	<p>examine and explain the various types of elections in West Virginia (e.g., primary/general, state/local, partisan/non-partisan).</p>			
<p>SS.O.08.02.07</p>	<p>research and describe how special interest groups and the media influence government and the law-making process in West Virginia (e.g., West Virginia Education Association, United Mine Workers, Division of Tourism).</p>			
<p>SS.O.08.02.08</p>	<p>explain major principles of American constitutional government (e.g., federalism, separation of powers, the elastic clause, checks and balances, government by consent of the governed, individual rights) and locate these principles in the West Virginia Constitution.</p>			
<p>SS.O.08.02.09</p>	<p>analyze conditions under which constitutional government flourishes.</p>			

SS.O.08.02.10 list and explain the laws passed in a current legislative session and evaluate their impact (e.g., tourism, economy, education, health).

Grade 8 Social Studies Economics	
Standard: 3	Students will
SS.S.08.03	<ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economy (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies).
Performance Descriptors (SS.PD.08.03)	
Distinguished	<p>Above Mastery</p> <p>Eighth-grade students performing at the above mastery level in economics assess economic principles (e.g., choices, institutions, factors of production, competition, global economies) to predict changes for future development of industry, agriculture, human services and tourism. Students participate in designing an economic plan for West Virginia that provides for the future development of infrastructure, industry, agriculture and human services. Students critique how resource use and industrial development affect occupational choices and labor/management relations to predict changes in the 21st century.</p>
Mastery	<p>Mastery</p> <p>Eighth-grade students performing at the mastery level in economics analyze economic principles (e.g., choices, institutions, factors of production, competition, global economies) to explain past policies and suggest changes for future development of industry, agriculture, human services and tourism. Students discriminate how resource use and industrial development affect occupational choices and labor/management relations.</p>
Partial Mastery	<p>Partial Mastery</p> <p>Eighth-grade students performing at the partial mastery level in economics determine the effective of economic principles (e.g., choices, institutions, factors of production, competition, global economies) on employment. Students classify WV industries and explain the importance of each to WV economy.</p>
Novice	<p>Novice</p> <p>Eighth-grade students performing at the novice level in economics identify economic principles (e.g., choices, institutions, factors of production, competition, global economies). Students name the most important industries in WV.</p>

<p><u>Eighth grade students performing at the distinguished level in economics:</u></p> <p><u>summarize the interaction of economic principles as they influence future development and use this information to design an economic plan for West Virginia.</u></p> <p><u>create a product showing the impact and relationship among various factors on the economic development of West Virginia; and</u></p> <p><u>design an economic plan for West Virginia incorporating resource use, industrial development, labor/management relations, tourism changes to the environment, local and state revenue and policy decisions.</u></p>	<p><u>Eighth grade students performing at the above mastery level in economics:</u></p> <p><u>assess economic principles to predict changes for future development of industry, agriculture, human services and tourism;</u></p> <p><u>analyze and discuss the impact and relationship of various factors on the economic development of West Virginia; and</u></p> <p><u>critique the effect of resource use, industrial development, labor/management relations and tourism on occupational choices, changes to the environment, local and state revenue and policy decisions.</u></p>	<p><u>Eighth grade students performing at the mastery level in economics:</u></p> <p><u>analyze economic principles to explain past policies and suggest changes for future development;</u></p> <p><u>evaluate the impact of various factors on the economic development of West Virginia; and</u></p> <p><u>correlate resource use, industrial development, labor/management relations and tourism with occupational choices, changes to the environment, local and state revenue and policy decisions.</u></p>	<p><u>Eighth grade students performing at the partial mastery level in economics:</u></p> <p><u>describe economic principles and their effects on past policies and future development;</u></p> <p><u>explain the impact of various factors on the economic development of West Virginia; and</u></p> <p><u>identify and discuss West Virginia industries and state and local revenues and explain the importance of each to West Virginia economy.</u></p>	<p><u>Eighth grade students performing at the novice level in economics:</u></p> <p><u>identify economic principles, past policies, and future development opportunities;</u></p> <p><u>identify various factors that impact the economic development of West Virginia; and</u></p> <p><u>name the most important industries in West Virginia and the sources and uses of revenue for state and local governments.</u></p>
<p>Objectives</p> <p>SS.O.08.03.01</p> <p>SS.O.08.03.02</p>	<p>Students will</p> <p>correlate West Virginia's economic conditions with possible affects on social conditions (e.g., employment, in/out migration).</p> <p>Evaluate the impact of each of the following on the economic growth of West Virginia:</p> <ul style="list-style-type: none"> • absentee ownership • national and international trade • renewable and nonrenewable natural resources • labor/management strategies • migration • physical geography 			

	<ul style="list-style-type: none"> cultural geography
SS.O.08.03.03	research industries and products (e.g., tourism, coal, glass, recreation, agriculture) that are important to the economy of the four regions of West Virginia and how they relate to occupations.
SS.O.08.03.04	identify major sources and uses of revenue for state and local governments (e.g., property tax, income tax, fees and licenses, excise tax, levies).
SS.O.08.03.05	analyze the effects of national and state governmental actions on West Virginia's economy.
SS.O.08.03.06	anticipate the changes in West Virginia's economy and people due to industrial development and debate the issue of industrialization vs. preserving history and/or the environment.
SS.O.08.03.07	examine the effect of technological changes and cost of living on West Virginia's economy and demographic profile (e.g., in employment, entrepreneurial businesses agriculture, tourism, education, industry).
SS.O.08.03.08	recognize major industries in West Virginia and identify representative jobs under each (e.g., manufacturing, mining, tourism, health care).
SS.O.08.03.09	assess the economic benefit or detriment of changing tourist attractions from seasonal to year round (e.g., Snowshoe).

Grade 8 Social Studies	
Geography	
SS.S.08.04	Students will <ul style="list-style-type: none"> interpret and choose maps, globes and other geographic tools to categorize and organize information about personal directions, people, places and environments (The World in Spatial Terms). examine the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). analyze the physical processes that shape the earth's surface and create, sustain and modify the cultural and natural environment (Physical Systems). analyze and illustrate how the earth is shaped by the movement of people and their activities (Human Systems). analyze the interaction of society with the environment (Environment and Society). point out geographic perspective and the tools and assess techniques available for geographic study (Uses of Geography).

cities, and choose and write a piece of literature to identify locations, cultural development and the impact of climate; and	interpret literature to identify locations, cultural development and the impact of climate; and	development and the impact of climate; and	development and the impact of climate; and
evaluate settlement patterns of West Virginia, anticipate future population trends, and draw conclusions regarding the future effects of technological advances.	research past exploration, settlement patterns and technological advances and relate these to the changes in physical and cultural geographic features.	analyze exploration and settlement patterns and illustrate the relationship between geographic features, cultural geography and technological change.	examine exploration, settlement patterns and technological advances of West Virginia in relation to geographic features over time.
Objectives Students will			
SS.O.08.04.01	provide exact location and relative location to explain West Virginia's position on a variety of maps and globes by using correct geographic vocabulary and graphic displays. (e.g., neighboring states, Tropic of Capricorn, time zones, Equator).		
SS.O.08.04.02	communicate the four major physical geographic regions, major rivers, landforms, borders and points of interest in West Virginia.		
SS.O.08.04.03	analyze and discuss the mental images (mental maps) of West Virginia's geographic and cultural regions that are created through reading descriptive literature.		
SS.O.08.04.04	point out the counties and major cities of West Virginia on a map and correlate the reasons for the development of the major cities within their respective counties.		
SS.O.08.04.05	explain the reasons for the locations and types of transportation systems developed in West Virginia and recommend future systems.		
SS.O.08.04.06	distinguish climate, landforms, resources and population density in West Virginia's regions using special purpose maps. (e.g., topographical, climate, Geographic Information Systems) and evaluate the impact of climate, landforms and resources on people's lives and settlement patterns.		
SS.O.08.04.07	illustrate how the cultural and economic isolation of different areas of the United States and West Virginia have been changed through technological advances (e.g., TV, radio, telephone, computers, highways).		
SS.O.08.04.08	critique the geographic factors that led to development of agriculture, coal, glass, chemical, metallurgical and tourism industries in West Virginia.		
SS.O.08.04.09	research various regional configurations found in West Virginia (e.g., geographic, tourist, health, educational, language patterns, cultural, occupational), and analyze the impact of these factors on the regional mental maps developed by West Virginia students and all other West Virginia citizens, and then present an example using one or more of these factors.		
SS.O.08.04.10	conclude how West Virginia's environment affects tourism.		

Grade 8	Social Studies
Standard: 5	History

<p>SS.S.08.05</p>	<p>Students will</p> <ul style="list-style-type: none"> organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application. (Chronology). use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities). use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation), and examine political institutions and theories that have developed and changed over time; and research and cite reasons for development and change (Political Institutions).

conditions today.	Students will
Objectives	
SS.O.08.05.01	cite reasons for exploration, transportation routes and discoveries by major explorers and explain the sequence of events and incentives for Virginia's expansion west to the Ohio River.
SS.O.08.05.02	compare and contrast the motives, incentives and settlement patterns of the French and English explorers and settlers on the western frontier.
SS.O.08.05.03	point out characteristics of various Native American cultures in West Virginia from the pre-Columbian period to the arrival of Europeans.
SS.O.08.05.04	relate the types of transportation that facilitated the growth of West Virginia and western expansion.
SS.O.08.05.05	evaluate the sequence and analyze the impact of contemporary social, economic and technological developments on people and culture in West Virginia and the United States.
SS.O.08.05.06	analyze the evolution of the labor movement in West Virginia and the United States.
SS.O.08.05.07	research and construct the sequence of events and cite the reasons for and resulting consequences of conflicts and wars that led to the formation of West Virginia as a state. (e.g., French and Indian War, American Revolution, Civil War).
SS.O.08.05.08	interpret facts about West Virginia and other areas from various types of charts, graphs, maps, pictures, models, timelines and primary sources (e.g. letters, journals and publications) and summarize what you have learned.
SS.O.08.05.09	evaluate the cultural conflict between the Europeans and Native Americans as it relates to western Virginia.
SS.O.08.05.10	explain the effect of immigration on the culture of West Virginia from European settlement through the early twentieth century.
SS.O.08.05.11	research and critique the role of ethnic and racial minorities, men, women and children in West Virginia who have made significant contributions to our history in the public and/or private sectors, choose the person you believe contributed most the most significant contribution and explain your choice. (e.g., statehood, abolition, education, industry, literature, government).
SS.O.08.05.12	critique the significance of historical experience and of geographical, social and economic factors that have helped to shape both West Virginian and American society
SS.O.08.05.13	assess the moral, ethical and legal tensions that led to the creation of the new state of West Virginia and how those tensions were resolved.
SS.O.08.05.14	point out and locate places of historical importance in West Virginia that can be visited by tourists.
SS.O.08.05.15	compile lists of fairs and festivals in West Virginia that can be attributed to the influence of various cultural groups who have settled in the state, explain the heritage of the fair or festival and its significance to the preservation of West Virginia history.

Grade 8	Social Studies
Standard. 6	Reading
SS.S.08.06	Students will <ul style="list-style-type: none"> use the dimensions of reading (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). distinguish relationships among people, ideas, and events. recognize cause-effect relationships in content passages. outline sequences of events.

- summarize events and ideas. Infer main idea or purpose of content.
- draw generalizations and conclusions about people, ideas and events.
- write and edit organized texts of various genres to insure that information is clearly understood.

Refer to policy 2520.1 for specific grade level reading and writing objectives.

Ninth Grade Social Studies Content Standards and Objectives

Ninth Grade: World Studies to 1900

The ninth grade social studies course engages students in the study of the development and evolution of the historic, economic, geographic, political, and social structure of the cultural regions of the world from the dawn of civilization to 1900. Special attention is given to the formation and evolution of societies into complex political and economic systems. Students are engaged in critical thinking and problem-solving skills, using maps, spreadsheets, charts, graphs, text and other data from a variety of credible sources. Students synthesize the information to predict events and anticipate outcomes as history evolves through the ages. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 9 Social Studies		Social Studies	
Standard: 1		Citizenship	
SS.S.09.01	Students will <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 		
Performance Descriptors (SS.PD.09.1)			
Distinguished	Above Mastery	Mastery	Partial Mastery
Ninth-grade students performing at the distinguished level in citizenship compare the changing concepts of the role of the citizen across time. They compare how conflicts between nations have been resolved and assess how individuals reacted to them. They organize and lead various activities both in school and	Ninth-grade students performing at the above mastery level in citizenship compare the changing concepts of the role of the citizen across time and cultures. They evaluate how individuals reacted to conflicts between nations. They assume leadership roles in school and community activities.	Ninth-grade students performing at the mastery level in citizenship evaluate the changing concepts of the role of the citizen across time. They analyze conflicts between nations and how individuals reacted to these conflicts. They participate in school and community activities.	Ninth-grade students performing at the partial mastery level in citizenship examine the changing role of the citizen across time. They describe conflicts between nations and how individuals reacted to these conflicts. They participate in community activities.
			Novice
			Ninth-grade students performing at the novice level in citizenship describe the changing role of citizens across time. They identify how citizens have reacted to conflicts between nations. They participate in school activities.

<p><u>community-</u> Ninth grade students performing at the distinguished level in citizenship: <u>debate the influences that have changed the roles of citizens;</u> <u>research conflicts between nations and develop creative resolutions for peace; and</u> <u>create a volunteer project that will meet the needs of the community or school.</u></p>	<p>Ninth grade students performing at the above mastery level in citizenship: <u>compare the changing roles of citizens and assess the impact of the changes on civic involvement;</u> <u>evaluate conflicts between nations and debate resolutions; and</u> <u>assume leadership roles in a volunteer project.</u></p>	<p>Ninth grade students performing at the mastery level in citizenship: <u>describe the changing roles of citizens and assess levels of civic involvement;</u> <u>analyze conflicts between nations and propose resolutions; and</u> <u>explain why you chose to participate in a volunteer project.</u></p>	<p>Ninth grade students performing at the partial mastery level in citizenship: <u>identify the roles of citizens and explain civic involvement;</u> <u>describe conflicts between nations; and</u> <u>choose to participate in a volunteer project.</u></p>	<p>Ninth grade students performing at the novice level in citizenship: <u>name the roles of citizens and recognize civic involvement;</u> <u>name conflicts between nations; and</u> <u>participate in a volunteer project.</u></p>
Objectives				
SS.O.09.01.01	Students will describe the evolution of the roles and responsibilities of individuals and groups leading to the formation of nation states.			
SS.O.09.01.02	assess the nature of civic responsibility in various cultures including the level of involvement of the different stratifications of society.			
SS.O.09.01.03	analyze the causes of conflict and propose resolutions			
SS.O.09.01.04	participate in a project of volunteer service and explain why you chose that particular project or service.			
Grade 9 Social Studies				
Standard: 2 Civics				
SS.S.09.02	Students will <ul style="list-style-type: none"> • examine and analyze the purposes and basic principles of the United States government (Purposes of Government). • outline and evaluate and analyze the origins and meaning of the principles, ideals and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). • examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). • analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs). 			
Performance Descriptors (SS.PD.09.2)				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice

<p>Ninth-grade students performing at the distinguished level in civics research and evaluate which classical civilizations, philosophers and historical events were instrumental to the development of the political process of the United States. They research the differences in constitutional government and assess the influences of the United States on other nations.</p>	<p>Ninth-grade students performing at the above mastery level in civics research which classical civilizations, philosophers and historical events were instrumental to the development of the political process of the United States. They research the differences in constitutional government and assess the influences of the United States on other nations.</p>	<p>Ninth-grade students performing at the mastery level in civics examine the impact of significant political philosophers, classical civilizations and other nations that influence the political process and government. Students debate the differences in constitutional government and assess the influences of the United States on other nations.</p>	<p>Ninth-grade students performing at the partial mastery level in civics explain how classical civilizations and other nations that influenced the development of the United States government. They explain fundamental characteristics of constitutional governments.</p>	<p>Ninth-grade students performing at the novice level in civics identify classical civilizations and other nations that influenced the development of the United States government. They list examples of constitutional governments.</p>
<p>Ninth grade students performing at the distinguished level in civics: <u>research a variety of governments and debate their purposes;</u> <u>research the differences among constitutional government and evaluate and debate the influences that have shaped them; and</u></p>	<p>Ninth grade students performing at the above mastery level in civics: <u>defend the purposes of government and summarize the events that led to representative democracy;</u> <u>research the differences among constitutional governments and compare the influences that have shaped them; and</u></p>	<p>Ninth grade students performing at the mastery level in civics: <u>evaluate the purposes of government and explain the events that led to representative democracy;</u> <u>evaluate the contributions to the development of constitutional democracy and compare its variations; and</u></p>	<p>Ninth grade students performing at the partial mastery level in civics: <u>explain the purposes of government and representative democracy;</u> <u>recognize contributions to the development of constitutional governments and identify its various forms; and</u></p>	<p>Ninth grade students performing at the novice level in civics: <u>identify the purposes of government and representative democracy;</u> <u>name examples of constitutional governments and some influences that contributed to its development;</u></p>
<p>debate the reactions of nations to their influences on one another.</p>	<p>debate the influences of nations on one another.</p>	<p>analyze the influence of nations on one another.</p>	<p>recognize the influence of nations on one another</p>	<p>give an example of the influence of nations on one another</p>
<p>Objectives Students will</p>				
<p>SS.O.09.02.01</p>	<p>evaluate diverse ideas about the purposes of government.</p>			
<p>SS.O.09.02.02</p>	<p>identify and analyze the contributions of the classical civilizations to the development of the United States Constitution. Identify classical civilizations and significant political philosophers and evaluate their contributions to the development of the United States Constitutional Democracy</p>			

SS.O.09.02.03	explain world historical events that affected the development of representative democracy in the United States and other countries.
SS.O.09.02.04	analyze how the United States has influenced other nations and how other nations have influenced the American political process and society.
SS.O.09.02.05	compare, contrast and evaluate alternative ways of organizing constitutional governments.

Grade 9 Social Studies	
Standard 3 Economics	
SS.S.09.03	Students will <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies).

Performance Descriptors (SS.PD.09.03)				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
Ninth-grade students performing at the distinguished level in economics judge cause and effect relationships in economic changes and trace and explain specific changes. They compare and contrast the creation and development of economic systems and trade patterns and the effects worldwide. They evaluate the development and use of fiscal policies in several world societies. They trace and evaluate the effects of the evolution of global economic interdependence at different times prior to 1900.	Ninth-grade students performing at the above mastery level in economics analyze causes and effects in economic change and compare and contrast the development of economic systems and trade patterns. They evaluate the development and use of fiscal policies in several world societies. They trace and evaluate the effects of the evolution of global economic interdependence prior to 1900.	Ninth-grade students performing at the mastery level in economics assess cause/effect relationships in economic change and critique the development of economic systems and trade patterns. They compare and contrast fiscal policies in several world societies and evaluate the effects of the evolution of global economic interdependence prior to 1900.	Ninth-grade students performing at the partial mastery level in economics explain effects in economic change and describe the development of economic systems and trade patterns. They discuss the fiscal policies in several world societies and explain the development of global economic interdependence prior to 1900.	Ninth-grade students performing at the novice level in economics identify what caused economic change and list the types of economic systems. They list the fiscal policies used in several world societies and list the effects of the changes of global economic interdependence prior to 1900.

<p>Ninth grade students performing at the distinguished level in economics:</p> <p><u>judge cause/effect relationships in economic change and trace and explain the connections between specific changes;</u></p> <p><u>create a new fiscal policy for the country of your choice and anticipate the outcome; and</u></p> <p><u>research and summarize the consequences of the evolution of global economic interdependence prior to 1900 and debate outcomes.</u></p>	<p>Ninth grade students performing at the above mastery level in economics:</p> <p><u>evaluate cause/effect relationships in economic change and relate to the development of economic systems and trade patterns;</u></p> <p><u>debate the effects of the fiscal policies in several world societies; and</u></p> <p><u>evaluate the influences and effects of the evolution of global economic interdependence prior to 1900.</u></p>	<p>Ninth grade students performing at the mastery level in economics:</p> <p><u>identify cause/effect relationships in economic change and evaluate the development of economic systems and trade patterns;</u></p> <p><u>compare and contrast fiscal policies in several world societies; and</u></p> <p><u>evaluate the effects of the evolution of global economic interdependence prior to 1900.</u></p>	<p>Ninth grade students performing at the partial mastery level in economics:</p> <p><u>explain effects in economic change and describe the development of economic systems and trade patterns;</u></p> <p><u>recognize fiscal policies in several world societies; and</u></p> <p><u>explain the development of global economic interdependence prior to 1900.</u></p>	<p>Ninth grade students performing at the novice level in economics:</p> <p><u>identify what caused economic change and list the types of economic systems;</u></p> <p><u>list the components of fiscal policy; and</u></p> <p><u>list the effects of the changes of global economic interdependence prior to 1900.</u></p>
<p>Objectives Students will</p>				
<p>SS.O.09.03.01</p>	<p>examine and illustrate the trade patterns of regions of the world across time and explain their significance to the evolution of global economics.</p>			
<p>SS.O.09.03.02</p>	<p>evaluate the role of exchange/trade systems in the development of economic systems in societies worldwide.</p>			
<p>SS.O.09.03.03</p>	<p>compare and contrast fiscal policies of several world societies.</p>			
<p>SS.O.09.03.04</p>	<p>identify the causal relationship of economic changes and their effects on the job market (e.g., supply and demand, technology, industrialization).</p>			
<p>SS.O.09.03.05</p>	<p>examine and evaluate global economic interdependence and competition and explain their influence on national and international policies.</p>			

<p>Grade 9 Standard: 4 SS.S.09.04</p>	<p>Geography Students will</p> <ul style="list-style-type: none"> • interpret, and choose maps, globes and other geographic tools to categorize and organize information about personal directions, people, places and environments (The World in Spatial Terms). • examine the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). • analyze the physical processes that shape the earth's surface and create, sustain and modify the cultural and natural
---	---

<p>environment (Physical Systems).</p> <ul style="list-style-type: none"> analyze and illustrate how the earth is shaped by the movement of people and their activities (Human Systems). analyze the interaction of society with the environment (Environment and Society). point out geographic perspective and the tools and assess techniques available for geographic study (Uses of Geography). 	<p>Performance Descriptors (SS.PD.09.04)</p>			
<p>Distinguished</p>	<p><u>Ninth grade students performing at the distinguished level in geography create geographic tools from primary data to illustrate/interpret spatial information. They collect data and predict effects of geographic features on settlement, movement and the environment. They assess relationships between political boundaries and geo-politics, world resources, and the global economy and infer/recommend future developments.</u></p>	<p><u>Above Mastery</u> <u>Ninth grade students performing at the above mastery level in geography use and create geographic tools to analyze and compare spatial information. They construct models to show the effects of geographic features on settlement, movement, and the environment. They compare and contrast the relationships between political boundaries and geo-politics, world resources, and the global economy.</u></p>	<p><u>Mastery</u> <u>Ninth grade students performing at the mastery level in geography use geographic tools to analyze spatial information. They assess the effects of geographic features on settlement, movement and the environment. They analyze and explain the relationships between political boundaries and geo-politics, world resources, and the global economy.</u></p>	<p><u>Partial Mastery</u> <u>Ninth grade students performing at the partial mastery level in geography use geographic tools to interpret spatial information. They give examples of the effects of geographic features on settlement, movement and the environment. They characterize the relationships between political boundaries and geo-politics, world resources, and the global economy.</u></p>
<p>Novice</p>	<p><u>Ninth grade students performing at the novice level in geography use geographic tools to examine and explain spatial information. They identify and discuss how geographic features influence settlement, movement and the environment. They investigate relationships between political boundaries and geo-politics, world resources, and the global economy</u></p>	<p><u>Ninth grade students performing at the novice level in geography:</u></p>	<p><u>Ninth grade students performing at the novice level in geography:</u></p>	<p><u>locate geographic features and identify information using geographic tools:</u> <u>recognize the connection between world resources and economic development; and</u></p>

create an ideal physical geography system, devise the ideal cultural settlement pattern that could result, and defend your outcomes.	evaluate the importance of physical geography systems in the development of cultural settlement patterns, summarize findings and explore alternative outcomes.	connect cultural settlement patterns with physical geography systems, draw conclusions about your findings and make recommendations.	identify cultural settlement patterns with physical geography systems.	name cultural settlement patterns and list physical geography systems
Objectives Students will				
SS.O.09.04.01	interpret information using maps, graphs, charts and timelines.			
SS.O.09.04.02	locate geographic features of the continents (e.g., plateaus, high points, low points, bodies of water major river valleys).			
SS.O.09.04.03	explain how the location of world resources influenced economic development and the global economy.			
SS.O.09.04.04	evaluate the effect of geographic features, including climate, upon the environment.			
SS.O.09.04.05	examine the development of major political boundaries of the world and relate these to the theme of geo-politics.			
SS.O.09.04.06	connect the cultural settlement patterns resulting from migration in each period of study to the world language patterns as they evolved and are evident today and then assess the role of physical geography in the development of these patterns.			
SS.O.09.04.07	explain geographic reasons for the development of major world cities and trends in urban population growth.			
SS.O.09.04.08	research major world rivers systems and climate regions (e.g., desert, rain forest/tropical, Mediterranean, etc.), correlate the migration/settlement patterns, industry, culture, government, and economic systems with these environments draw conclusions, and recommend a favorable settlement area based on findings.			

Grade 9	Social Studies			
Standard 5	History			
SS.S.09.05	Students will	<ul style="list-style-type: none"> organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application. (Chronology). use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities). use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation). examine political institutions and theories that have developed and changed over time; and research and cite reasons for development and change (Political Institutions).

summarize, write about and create new literature and graphics that connect the thoughts and ideas associated with the periods of study.	summarize and make connections between the variety of literature and graphics associated with the periods of study.	read and interpret a variety of historical literature and graphics associated with the periods of study.	read and explain a variety of historical literature and graphics associated with the periods of study.	read and discuss a variety of forms of historical literature and graphics associated with the periods of study.
Objectives Students will				
SS.O.09.05.01	examine the contributions of art and literature throughout different historical periods.			
SS.O.09.05.02	trace the evolution of the changing status of women and children throughout the world in all historical periods addressed.			
SS.O.09.05.03	read and in interpret historical charts, tables, graphs, narratives, primary source documents, political cartoons and timelines and summarize their information.			
SS.O.09.05.04	explain the effects of significant political developments and trends in the world before 1900.			
SS.O.09.05.05	explain the interaction of early humans with their environment and evaluate their decisions (e.g., hunting, migration, shelter, food, clothing).			
SS.O.09.05.06	compare and contrast the causes and effects of the rise and decline of ancient civilizations (e.g., the river civilizations, classic Greek and Roman).			
SS.O.09.05.07	explain the basic tenets of major world religions and philosophies, their places of origin and the status of those religions today.			
SS.O.09.05.08	describe the location, movement, unique contributions and characteristics of Arab/Islamic society.			
SS.O.09.05.09	explain feudalism and its effects on the development of societies around the world (e.g., Europe, China, Japan).			
SS.O.09.05.10	identify and evaluate the political and economic roles and the cultural contributions of religious institutions in medieval society.			
SS.O.09.05.11	compare and contrast the acceptance of diversity in hierarchical societies.			
SS.O.09.05.12	analyze and assess the concept of nation building (e.g., city states, Rome, rise of European nation states).			
SS.O.09.05.13	relate the w recognize the worth of the individual in society and relate to the growth of the concept of the Renaissance man.			
SS.O.09.05.14	describe how European needs/wants for foreign products contributed to the Age of Exploration.			
SS.O.09.05.15	evaluate the effects of the Enlightenment in European society.			
SS.O.09.05.16	analyze the cause of the Crusades and the effects on regions involved.			
SS.O.09.05.17	analyze the historical developments of the Protestant Reformation including the effects of theology, politics and economics.			
SS.O.09.05.18	describe the Agricultural and Industrial revolutions and decide their impact on the evolution of society.			
SS.O.09.05.19	analyze the causes and effects of political revolutions and determine their impact on the formation of governments and on the citizens of a society (e.g., French, Italian, German, Latin American).			
SS.O.09.05.20	compare and contrast the American and French revolutions and their aftermaths.			
SS.O.09.05.21	explain reasons for and consequences of the breakdown of order among nation states.			
SS.O.09.05.22	examine the legal documents and systems which influenced western civilization and rank them in order of importance.			
SS.O.09.05.23	compare and contrast absolute and constitutional monarchies and identify representative leaders of each.			
SS.O.09.05.24	assess the impact of colonization on both the mother countries and the colonies			

Standard: 6
SS.S.09.06

Reading

Students will

- use the five reading components (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre.
- recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events).
- distinguish relationships among people, ideas, and events.
- recognize cause-effect relationships in content passages.
- outline sequences of events.
- summarize events and ideas. Infer main idea or purpose of content.
- draw generalizations and conclusions about people, ideas and events.
- write and edit organized texts of various genres to insure that information is clearly understood.

Refer to Policy 2520.1 for specific grade level reading and writing objectives.

Tenth Grade Social Studies Content Standards and Objectives

Tenth Grade: United States Studies to 1900

The tenth grade program of study examines the evolution of the Constitution as a living document and the role of participatory democracy in the development of a rapidly changing technological society. This study of the United States is an examination of the formative years from the Pre-Columbian civilizations to its transformation as a dominant political and economic influence in the world. Special emphasis is placed on how the challenges of settling expansive and diverse physical environments were met by a culturally diverse population. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 10 Social Studies		Standard: 1 Citizenship	
SS.S.10.01	Students will <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life). 	Performance Descriptors (SS.PD.10.1)	
Distinguished	Tenth-grade students performing at the distinguished level in citizenship assess the role of government in promoting the common good, balancing liberty and equality, and protecting the rights of the individual, groups and minorities. They analyze how citizens can monitor and influence the government. They compare historical and	Above Mastery	Tenth-grade students performing at the above mastery level in citizenship analyze the roles and duties of a responsible citizen. They debate government actions with regard to protecting individual rights and promoting the common good. They analyze how citizens can monitor and influence the United States government. They explain historical and current
Mastery	Tenth-grade students performing at the mastery level in citizenship examine the roles and duties of a responsible citizen. They compare and contrast government actions with regard to protecting individual rights and promoting the common good. They judge how citizens can monitor and influence the United States government. They research	Partial Mastery	Tenth-grade students performing at the partial mastery level in citizenship summarize the roles and duties of a responsible citizen. <p>Objectives Students will</p>				

SS.O.10.01.01	compare and contrast various citizens' responses to controversial government actions and debate decisions as to what the government should and should not do.
SS.O.10.01.02	appraise the importance of the fundamental democratic values and principles of the United States constitutional democracy upon individuals, communities and nations.
SS.O.10.01.03	explain how the interactions of citizens with one another help monitor and influence government policy.
SS.O.10.01.04	evaluate ways conflicts can be resolved in a cooperative, peaceful manner which respects individual rights and promotes the common good.
SS.O.10.01.05	evaluate, take and defend positions on issues in which fundamental democratic values and principles are in conflict (e.g., liberty and equality, individual rights and the common good, majority rule, minority rights).
SS.O.10.01.06	summarize the characteristics of United States citizenship and evaluate responsibilities, duties, privileges and rights of United States citizens.
SS.O.10.01.07	evaluate, take and defend positions on issues regarding the criteria used for naturalization.
SS.O.10.01.08	evaluate sources of information related to public policy issues.
SS.O.10.01.09	examine, select and participate in a volunteer service or project and explain the reason for your selection.

Grade 10 Social Studies	
Standard. 2 Civics	
SS.S.10.02	Students will <ul style="list-style-type: none"> • examine and analyze the purpose and basic principles of the United States government (Purposes of Government). • outline and evaluate and analyze the origins and meanings of the principles, ideals, and core democratic values expressed in the foundational documents of the United States (Ideals of United States Democracy). • examine and distinguish the structure, function, and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). • analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs).
Performance Descriptors (SS.PD.10.2)	
Distinguished	Above Mastery
Tenth-grade students performing at the Distinguished level in civics critique documents and philosophies that influenced the founding fathers in shaping United States representative democracy. They explain how the ideal of American democracy compares to the reality of American democracy.	Tenth-grade students performing at the above mastery level in civics analyze the documents and philosophies that influenced the founding fathers in shaping United States democracy. They compare the ideal of American democracy to the reality of American democracy. They identify governments
Tenth-grade students performing at the novice level in civics identify documents that are the basis for United States democracy. They identify key ideas of the Constitution. They identify the three branches of the government and how the election process works.	Tenth-grade students performing at the partial mastery level in civics explain documents that are the basis for United States democracy. They explain key Articles and Amendments of the Constitution. They how the three branches of government work. They explain the election process

<p><u>They make connections between governments of the past, to the challenges the United States faced in its founding.</u></p> <p><u>Tenth grade students at the distinguished level in civics:</u></p>	<p><u>of the past that have influenced the United States political development.</u></p> <p><u>Tenth grade students at the above mastery level in civics:</u></p>	<p><u>citizen behaviors reflect or foster the ideals of a democratic republic.</u></p> <p><u>Tenth grade students at the mastery level in civics:</u></p>	<p><u>and how the electoral college works.</u></p> <p><u>Tenth grade students at the partial mastery level in civics:</u></p>	<p><u>Tenth grade students at the novice level in civics:</u></p>
<p><u>analyze sophisticated primary sources to evaluate and compare principles and philosophies found in core documents and evaluate their influence on historical periods and events;</u></p> <p><u>debate and defend the distribution of power in a federalist system and the American Constitution;</u></p>	<p><u>analyze primary sources to explain and compare principles and philosophies found in core documents and draw conclusions about their influence on historical periods and events;</u></p> <p><u>compare the powers in a federalist and an anti-federalist system and the American Constitution; and</u></p>	<p><u>use primary sources to identify and describe principles and compare philosophies found in core documents and relate them to historical periods and events;</u></p> <p><u>analyze government powers in a federalist system and the American Constitution;</u></p>	<p><u>use basic primary sources to identify key principles and philosophies in core documents and relate them to major periods and events;</u></p> <p><u>describe the basic elements of a federalist system and the American Constitution;</u></p>	<p><u>use paraphrases or summaries of primary sources to identify some key principles and philosophies in core documents and relate them to major events;</u></p> <p><u>recognize the basic elements of a federalist system and the American Constitution.;</u></p>
<p><u>research and debate how democratic and non-democratic ideals are reflected in public behaviors; and</u></p> <p><u>investigate positive and negative influences of the American Revolution and George Washington's farewell address on the international perceptions of the United States and summarize results</u></p>	<p><u>differentiate how democratic and non-democratic ideals are reflected in public behaviors.; and</u></p> <p><u>debate the influence of the American Revolution and George Washington's farewell address.</u></p>	<p><u>evaluate how democratic ideals are reflected in public behaviors; and</u></p> <p><u>evaluate the influence of the American Revolution and George Washington's farewell address.</u></p>	<p><u>analyze democratic ideals that are reflected in public behaviors; and</u></p> <p><u>draw conclusions about the influence of the American Revolution and George Washington's farewell address.;</u></p>	<p><u>connect key democratic ideals to public behaviors; and</u></p> <p><u>name some ways the American Revolution and George Washington's farewell address influenced people/ nations.</u></p>
<p>Objectives Students will</p>				
<p>SS.O.10.02.01</p>	<p>identify and describe the fundamental democratic principles and values in the nation's core American documents, relate them to the subsequent periods in U.S. history, and identify the discrepancies between the expressed ideals and realities.</p>			
<p>SS.O.10.02.02</p>	<p>identify fundamental American democratic principles using primary sources and significant political speeches and writings.</p>			

SS.O.10.02.03	explain the purpose of the United States government and analyze how its powers are acquired, used and justified.
SS.O.10.02.04	compare and contrast documents and philosophies that are the basis for representative democracy in the United States (e.g., Greek, Roman, John Locke, Magna Carta, English Bill of Rights).
SS.O.10.02.05	explain the purpose, organization and functions of the legislative, executive and judicial branches, and analyze the separation of powers, checks and balances.
SS.O.10.02.06	summarize the U.S. Constitution and Amendments then justify the steps required to amend the United States Constitution.
SS.O.10.02.07	analyze the presidential election process, the continued use of the Electoral College and the order of presidential succession.
SS.O.10.02.08	evaluate federalism and give examples of shared, delegated, reserved and implied powers.
SS.O.10.02.09	evaluate the degree to which public policies and citizen behaviors reflect or foster the stated ideals of a democratic republican form of government.
SS.O.10.02.10	evaluate, take and defend positions about the functions of political leadership and the importance of public service in American democracy.
SS.O.10.02.11	evaluate and defend how the American Revolution and the establishment of the United States as a constitutional democracy influenced people in other nations and reshaped their image of America.
SS.O.10.02.12	assess the significance of George Washington's farewell address.

Grade 10 Social Studies	
Standard: 3 Economics	
SS.S.10.03	<p>Students will</p> <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). illustrate how the factors of production impact the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies).
Performance Descriptors (SS.PD.10.03)

exceptional skills in discussion, debate, and persuasive writing.	and persuasive writing.	persuasive writing.	persuasive writing.	persuasive writing.
Objectives Students will				
SS.O.10.05.01	relate life in America before the 17 th century to life today.			
SS.O.10.05.02	analyze and explain the contacts that occurred between Native Americans and European settlers during the age of discovery.			
SS.O.10.05.03	trace the roots and evaluate early explorations of America and describe and analyze the attraction of the New World to Europeans (religious, social, political, economic).			
SS.O.10.05.04	Justify how the effects of European empire building led to the American Revolution			
SS.O.10.05.05	prioritize the problems that existed between the British government and the American colonies and defend first the American viewpoint and then the British viewpoint (e.g., sovereignty of Parliament, taxation, trade restrictions).			
SS.O.10.05.06	describe and analyze the content of the Declaration of Independence and explain the factors and events which led to its creation.			
SS.O.10.05.07	analyze, explain and sequence major events and ideas of the Revolutionary War.			
SS.O.10.05.08	analyze and evaluate the United States Constitution and the Bill of Rights; describe and measure the challenges faced by the new United States government.			
SS.O.10.05.09	differentiate then summarize the parts of the Constitution that responded to the political, economic and social conditions that existed after the American Revolution.			
SS.O.10.05.10	explain the major challenges faced by the framers of the Constitution, and describe the compromises reached at the Constitutional Convention.			
SS.O.10.05.11	evaluate the effects of nationalism on the constitutional, political, economic and foreign policy issues faced by the United States in its formative years. (e.g., Monroe Doctrine, Manifest Destiny, Washington's Farewell Address, War of 1812)			
SS.O.10.05.12	identify and explain the impact of United States Supreme Court decisions (e.g., Marbury v. Madison, McCollough v. Maryland, Dred Scott, Plessy v. Ferguson).			
SS.O.10.05.13	identify and explain the factors that led to exploration, settlement and expansion across the United States and analyze how the expansion changed the United States (e.g., Louisiana Purchase, Lewis and Clark Exploration, Erie Canal, Missouri Compromise)			
SS.O.10.05.14	assess the effects of United States policies on Native Americans and recommend alternative actions.			
SS.O.10.05.15	research the institution of slavery and its effect on the political, economic and social development of the United States and summarize their findings.			
SS.O.10.05.16	compare and contrast the political, economic and social conditions in the United States before and after the Civil War.			
SS.O.10.05.17	analyze and sequence the causes and effects of the major events of the Civil War and reconstruction.			
SS.O.10.05.18	outline the effects of technological change on the United States (e.g., agriculture, transportation, industry, labor, society).			
SS.O.10.05.19	critique the goals and actions of reformers and reform movements (e.g., women's rights, minorities, temperance, prison, hospitals, schools, religion) and assume the role of reformer to explain the goals and actions or the movement.			
SS.O.10.05.20	debate the influence and impact of diverse cultures on United States society and explain the process of their assimilation into American life.			
SS.O.10.05.21	explain the development of representative democracy in the United States.			
SS.O.10.05.22	research, analyze and interpret primary sources (e.g., artifacts, diaries, letters, photographs, art, documents, newspapers, major political debates) and compare to contemporary media (e.g., television, movies, computer information systems) to better understand events and life in the United States to 1900.			

SS.O.10.05.23	construct various timelines of American history from pre-Columbian times to 1900 highlighting landmark dates, events, technological changes, major political and military events and major historical figures and connect these to the political, economic and social movements the periods.
SS.O.10.05.24	develop skills in discussion, debate and persuasive writing by analyzing historical situations and events to 1900.
SS.O.10.05.25	analyze and explain the positions of the political parties and their leaders then choose and support a position on the following: <ul style="list-style-type: none"> • economic development • territorial expansion • political participation • individual rights • states' rights • slavery • social reforms.
SS.O.10.05.26	examine the leaders, ideas and events behind the Monroe Doctrine, Manifest Destiny and other movements (i.e., revolutionary movements in the Caribbean and Latin America) and explain the effects of these movements on the United States.

Grade 10	Social Studies
Standard: 6	Reading
SS.S.10.06	Students will <ul style="list-style-type: none"> • use the dimensions of reading (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. • recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). • distinguish relationships among people, ideas, and events. • recognize cause-effect relationships in content passages. • outline sequences of events. • summarize events and ideas. Infer main idea or purpose of content. • draw generalizations and conclusions about people, ideas and events. • write and edit organized texts of various genres to insure that information is clearly understood. Refer to policy 2520.1 for specific grade level reading and writing objectives.

Eleventh Grade Social Studies Content Standards

Eleventh Grade: Twentieth / Twenty-First Centuries Studies

In the eleventh grade social studies course students examine the historical evolution and global interaction of states, nations and nation-states from geographic, political and economic perspectives from 1900 through present day. Students engage in critical thinking and problem-solving skills, using maps, spreadsheets, charts, graphs, primary source documents and text and other data from a variety of credible sources to synthesize historical information, predict events and anticipate outcomes. Students recognize the economic interdependencies of the United States with other countries of the world. Students examine the factors that influence changing political relationships between the United States and its world neighbors. The impact of world events on the individual citizen and the reciprocal impact of an individual citizen's actions on world events will be emphasized. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 11 Social Studies	
Standard: 1	Citizenship
SS.S.11.01	<p>Students will</p> <ul style="list-style-type: none"> characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). model a respect for symbols, ideas and concepts of the United States and analyze the roles of significant individuals (Respect For People, Events, and Symbols). develop and employ the civic skills necessary for effective citizenship by using criteria to make judgments, arrive at and defend positions and evaluate the validity of the positions or data (Evaluation Skills). develop the participatory skills of interacting, monitoring and influencing that are essential for informed, effective and responsible citizenship, including participation in civic life to shape public policy (Participatory Skills). recognize and communicate the responsibilities, privileges and rights of United States citizens (Civic Life).
Performance Descriptors (SS.PD.11.1)	
Distinguished	Above Mastery

---	---	--	--	--

Objectives	Students will
SS.O.11.01.01	demonstrate ways citizens can work cooperatively to resolve personal, local, regional, and world conflicts peacefully.
SS.O.11.01.02	analyze and evaluate the influence of citizen action on public policy and law making.
SS.O.11.01.03	analyze the changing nature of civic responsibility.
SS.O.11.01.04	develop positions and formulate actions on the problems of today and predict challenges of the future (e.g., terrorism, religious conflict, weapons of mass destruction, population growth).
SS.O.11.01.05	evaluate historical and contemporary political communication using such criteria as logical validity, factual accuracy and emotional appeal.
SS.O.11.01.06	participate in a project of volunteer service.
SS.O.11.01.07	research and explain the importance of the personal and political responsibilities, privileges and rights of citizens.
SS.O.11.01.08	explain the concept of civil disobedience, provide examples and evaluate its use.

Grade 11	Social Studies			
Standard: 2	Civics			
SS.S.11.02	Students will <ul style="list-style-type: none"> • outline and analyze the purposes and basic principles of the United States government (Purposes of Government). • the foundational documents of the United States (Ideals of United States Democracy). • examine and distinguish the structure, function and responsibilities of governments and the allocation of power at the local, state and national levels (United States Government and Politics). • analyze how the world is organized politically and compare the role and relationship of the United States to other nations and to world affairs (United States Government and World Affairs). 			
Performance Descriptors (SS.PD.11.2)				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
Eleventh-grade students performing at the distinguished level in civics critique changes to the Constitution and predict future changes. They predict how the global environment in the 21 st Century will impact the three branches of government, at all levels. They compare and judge the impact of media, special interest groups and political parties on various forms of	Eleventh-grade students performing at the above mastery level in civics research changes in the Constitution and evaluate their impact. They analyze what impact the three branches of government in making changes in both the United States and the world. They judge the impact of political parties in various forms of government.	Eleventh-grade students performing at the mastery level in civics judge changes in the Constitution. They examine the roles of the three branches of government in making changes in the United States and the world. They analyze the workings of political parties in various forms of government.	Eleventh-grade students performing at the partial mastery level in civics explain changes in the Constitution. They explain major changes in the three branches of government. They explain how the party system works both in the United States and other nations.	Eleventh-grade students performing at the novice level in civics identify changes in the Constitution. They identify the major responsibilities of the three branches of government. They list the major political parties of the United States and major world nations.

construct models to analyze and evaluate the importance of geographic resources in nation building and to debate possible outcomes in conflict and cooperation. #een-	debate the importance of geographic resources in nation building and in conflict/cooperation.	judge the importance of geographic resources in nation building as well as in conflict and cooperation.	explain how geographic resources influence nation building and conflict/cooperation.	identify geographic resources that influence nation-building and conflict/cooperation.
Objectives	Students will			
SS.O.11.04.01	interpret and transform primary data and various forms of information into maps, graphs, charts, cartoons and timelines.			
SS.O.11.04.02	analyze the significance of the physical and human geographic characteristics and location of places where events occurred in each period of study. (e.g., Why did an event occur where it did? Could the same event have occurred in another place or location?) and explain their analysis.			
SS.O.11.04.03	correlate the importance of geographic factors with social, political, economic and technological change (e.g., point out how West Virginia's geography has influenced laws that impact business, including tourism, as well as the quality of life in the state).			
SS.O.11.04.04	identify United States settlement patterns after 1900 and draw conclusions about causes and effects.			
SS.O.11.04.05	analyze and assess the impact of human decision-making and technology on the environment.			
SS.O.11.04.06	assess the impact of anticipated annual climate change (e.g., monsoon, flooding).			
SS.O.11.04.07	assess the impact of unpredictable environmental changes (e.g., earthquakes, El Nino, drought, flooding).			
SS.O.11.04.08	examine and assess the role that geographic factors/features play in-the development of political, economic and social conditions and/or climates			
SS.O.11.04.09	relate the importance, availability and accessibility of renewable and nonrenewable resources to international conflicts and cooperation since 1900 (e.g., discuss how United States dependence on Middle Eastern oil resulted in geo-political consequences).			
SS.O.11.04.10	explain how language, art, music and other cultural elements can facilitate global understanding.			

Grade 11	Social Studies
Standard. 5	History
SS.S.11.05	<p>Students will</p> <ul style="list-style-type: none"> organize, analyze and compare historical events, distinguish cause-effect relationships, theorize alternative actions and outcomes, and anticipate future application. (Chronology). use the processes and resources of historical inquiry to develop appropriate questions, gather and examine evidence, compare, analyze and interpret historical data (Skills and Application). examine, analyze and synthesize historical knowledge of major events, individuals, cultures and the humanities in West Virginia, the United States and the world (Culture and Humanities).

<ul style="list-style-type: none"> • use historical knowledge to analyze local, state, national and global interdependence (Interpretation and Evaluation). • examine political institutions and theories that have developed and changed over time, and research and cite reasons for development and change (Political Institutions). 				
Performance Descriptors (SS.PD.11.05)				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
<p>Eleventh grade students performing at the distinguished level in history use primary source documents to defend/refute assumptions about key people, places, groups, documents, movements, and events. They evaluate the impact of cultures, economic systems, political systems, and advances in technology, communication and transportation, and propose and assess future developments. They analyze or predict the global effects of regional, national, and international events and policies. Students use analytical writing skills to research. They interpret, and write about literature associated with the periods of study.</p>	<p>Eleventh grade students performing at the above mastery level in history generate theories about and develop methods to assess the impact of key people, places, groups, documents, movements, and events. They compare and contrast cultures, economic systems, and advances in technology, communication, and transportation. They research the global influences on and impact of regional, national, and international events and policies, formulate generalizations, and write about their conclusions. They read, analyze, and discuss literature associated with the periods of study.</p>	<p>Eleventh grade students performing at the mastery level in history critique the impact of key places, groups, documents, movements, and events of the 20th century. They analyze cultures, economic systems, political systems, and advances in technology, communication and transportation. They examine regional, national, and international events and policies, and assess their impact on global affairs.</p>	<p>Eleventh grade students performing at the partial mastery level in history trace the development of the significance of key people, places, groups, documents, movements, and events of the 20th century. <p>Objectives Students will</p>					
<p>SS.O.11.05.01</p>	<p>analyze and explain the response of leaders of the United States and the world to the following developments:</p> <ul style="list-style-type: none"> • industrialization • urbanization • immigration • education • health care • epidemics/pandemic 				
<p>SS.O.11.05.02</p>	<p>assess the impact of United States foreign policy on different world regions (e.g., Open Door Policy, Good Neighbor Policy, Lend-Lease).</p>				
<p>SS.O.11.05.03</p>	<p>critique United States immigration policies and assess the contributions of immigrant groups and individuals.</p>				

SS.O.11.05.04	<p>analyze and explain the political, social and economic causes and consequences of American involvement in these major conflicts and challenges of the 20th and 21st Century:</p> <ul style="list-style-type: none"> • World War I • Great Depression • World War II • Cold War • Korean Conflict • Vietnam • Operation Desert Storm/ Gulf War • Operation Enduring Freedom/Afghanistan military crisis • Operation Iraqi Freedom/War in Iraq
SS.O.11.05.05	summarize the major goals and analyze the impact of the New Deal.
SS.O.11.05.06	explain and assess the economic, social and political transformation of the United States since World War II.
SS.O.11.05.07	analyze and explain United States and world foreign policy since World War II.
SS.O.11.05.08	trace the development of the world labor movement, describe its political, social and economic effects, and explain its effect on the U.S. labor movement and the demands for labor reform legislation
SS.O.11.05.09	examine concerns, issues and conflicts categorized as universal human rights (e.g., Holocaust, diversity, tolerance, genocide).
SS.O.11.05.10	compare and contrast worldwide de-colonization and independence movements in the twentieth century (e.g., Israel, India, Indo-China, third world countries), and explain how emerging nations influence world events.
SS.O.11.05.11	Research, compare and contrast the progress of civil rights in the United States with civil rights in other regions of the world and conclude what the contributions were of significant civil rights leaders.
SS.o.11.05.12	research the origins and rise of Communism, connect its implications to the nuclear age and Cold War, and then describe its current status worldwide, including the breakup of the Soviet Union.
SS.O.11.05.13	examine and analyze the causes and consequences of regional conflicts (e.g., Middle East, Latin America, Africa, Europe), assess their influence on the rise of terrorism/extremist groups, and anticipate the future effects of the conflicts and the extremist groups.
SS.O.11.05.14	describe the effect of technology and its impact in creating a global community (e.g., computers, space exploration, medicine).
SS.O.11.05.15	compare and evaluate the impact of stereotyping, conformity, acts of altruism and other behaviors on individuals and groups.
SS.O.11.05.16	evaluate the role of technology in communications, transportation, information processing, weapons development and other areas as it contributes to or helps resolve conflicts.
SS.O.11.05.17	evaluate, take and defend positions on foreign policy issues in light of American national interests, values and principles.
SS.O.11.05.18	compare and contrast Fascism, Nazism and Communism.
SS.O.11.05.19	analyze the goals and actions of reformers and reform movements (e.g., social, economic, political).
SS.O.11.05.20	develop skills in discussion, debate and persuasive writing by evaluating different assessments of the causes, costs and benefits of major events in the twentieth century.
SS.O.11.05.21	interpret facts about contemporary America from various charts, graphs, maps, pictures, models, timelines and other primary sources.

<p>Standard 6 SS.S.11.06</p>	<p>Reading</p> <p>Students will</p> <ul style="list-style-type: none"> • use the dimensions of reading (phonemic awareness, phonics, background knowledge/vocabulary, high frequency word/fluency, comprehension, and writing) in their acquisition of social studies knowledge, insuring a foundation of college readiness in this genre. • recognize main ideas and supporting details to locate basic facts (e.g. names, dates, events). • distinguish relationships among people, ideas, and events. • recognize cause-effect relationships in content passages. • outline sequences of events. • summarize events and ideas. Infer main idea or purpose of content. • draw generalizations and conclusions about people, ideas and events. • write and edit organized texts of various genres to insure that information is clearly understood. <p>Refer to policy 2520.1 for specific grade level reading and writing objectives.</p>
----------------------------------	---

Twelfth Grade Social Studies Content Standards

Twelfth Grade: Civics for the 21st Century

Responsible participatory citizenship, an understanding of the workings of our government, sound financial literacy and global awareness are essential to the preservation and improvement of American Constitutional Democracy. Civics for the 21st Century is the capstone social studies course combining civics, economics and geography to prepare students as 21st Century citizens. Students engage 21st century tools to expand upon their critical thinking and problem-solving skills allowing them to become financially literate, to develop civic efficacy, and to acquire the geographic knowledge necessary to understand the physical and human systems of the world. Students become informed decision makers as they work collaboratively and develop a correct awareness of their place in a global society. Students engage in communication skills to acquire and convey their knowledge appropriately. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

Grade 12 Social Studies		Mastery		Partial Mastery		Novice			
Standard: 1 Citizenship		Above Mastery		Mastery		Partial Mastery		Novice	
SS.S.12.01	Students will <ul style="list-style-type: none"> recognize and evaluate civic dispositions or traits that are important to the preservation and improvement of American democracy (e.g. individual responsibility, civility, patriotism, respect for the rights of others and for the law, honesty, open mindedness, critical mindedness, compromise). (Social Responsibility and Respect) characterize and model good citizenship by building social networks of reciprocity and trustworthiness (Civic Dispositions). develop civic judgments on past and current issues, support positions, and evaluate the validity of opposing viewpoints. demonstrate participatory skills characteristic of involved citizens; research and analyze public policy, monitor arguments and developments; and devise methods to influence public policy decisions. <p>Objectives Students will</p>			
<p>SS.C.O.12.02.01</p>	<p>Examine and analyze the contributing factors of the drafting of the Declaration of Independence and the U.S. Constitution:</p> <ul style="list-style-type: none"> • Leaders and Philosophers (e.g., John Locke, Benjamin Franklin, Thomas Jefferson) • Events (e.g., Glorious Revolution, Reformation, Enlightenment) • Documents (e.g., English Bill of Rights, Act of Succession, Magna Carta) • Classical periods (e.g., eras of Greece and Rome) 		
<p>SS.C.O.12.02.02</p>	<p>outline the characteristics of the political, religious, and economic climates that brought about the American Revolution.</p>		
<p>SS.C.O.12.02.03</p>	<p>evaluate, take and defend the political, religious, or economic climate as the most powerful influence on a nation's decision to go to war.</p>		

SS.C.O.12.02.04	interpret and evaluate the Preamble, Seven Articles, and Amendments (especially the Bill of Rights), of the Constitution of the United States and debate whether or not their objectives are relative today.
SS.C.O.12.02.05	evaluate, take and defend a position either on the Federalist or the Anti-Federalist papers and explain the ultimate resolutions and compromises that evolved from these. (Great Compromise, checks and balances, reserved powers.)
SS.C.O.12.02.06	analyze the Great Debate and evaluate its contribution to the Civil War.
SS.C.O.12.02.07	differentiate between the rights, privileges, responsibilities, and duties granted U.S. citizens under the Constitution of the United States and describe the role of citizens in a constitutional democracy.
SS.C.O.12.02.08	demonstrate an understanding of the purposes that constitutions serve, and the conditions that contribute to the establishment of the rule of law, and evaluate how limited government and rule of law protect individual rights under the Constitution.
SS.C.O.12.02.09	explain and assess the development and evolution of documents that display the core democratic values of the United States government as impacted by the economic, social, and political climates during different time periods in American history.
SS.C.O.12.02.10	trace and examine the history of the Constitutional Amendments and laws grounded in those Amendments illustrating relevance to the students' own lives today and in the future.
SS.C.O.12.02.11	compare and contrast the roles and responsibilities of the local, state and national judicial systems.
SS.C.O.12.02.12	examine and compare Supreme Court cases and the Justices' interpretations of the Constitution, especially cases regarding the Bill of Rights. and apply knowledge to relevant situations occurring today.
SS.C.O.12.02.13	analyze the Bill of Rights (1 st Ten Amendments) and examine the conflicts that arise between individual freedom as opposed to the common good concerning economic and civic conditions in today's society. evaluate changes in these freedoms and summarize your conclusions.
SS.C.O.12.02.14	examine and defend the values, ideals and principles that are the foundation of U.S. constitutional government, and demonstrate evidence of their existence in contemporary governments worldwide.
SS.C.O.12.02.15	Differentiate between nations possessing a constitution and those with a constitutional government and correlate the Amendments of the U.S. Constitution as they evolved as evidence that the United States has a constitutional government.
SS.C.O.12.02.16	analyze how the Constitution defines and outlines a structure for the U.S. Federal System and how the Constitution provides checks and balances for a limited government.
SS.C.O.12.02.17	recognize the changes in responsibilities and powers of the three branches of federal government from the time of their inception through today and cite examples that illustrate the changes.
SS.C.O.12.02.18	examine the existing two-party system of the U.S. government and predict the impact of a 3 rd party on the political process.
SS.C.O.12.02.19	assess the influence of the media on public opinion and on the decisions of government officials.
SS.C.O.12.02.20	examine the impact of special interest groups on the shaping of public policy and relate similar influences to a current initiative.
SS.C.O.12.02.21	analyze the impact of freedom of speech and press in a democratic society and give examples of how these freedoms allow citizens to express their views, shape public policy and monitor government actions.
SS.C.O.12.02.22	assess the connections between campaign financing, the media and the electoral process, and then formulate a proposal for campaign reform and predict the outcome.
SS.C.O.12.02.23	identify the demographic factors that influence voter behavior and prepare a summary of your findings regarding citizen participation in the electoral process.
SS.C.O.12.02.24	identify and research "terrorist states" that house terrorist organizations and condone their activities, and recognize the perspectives of policymakers worldwide and how they are influenced by these states and their activities.
SS.C.O.12.02.25	examine environmental abuses worldwide and create solutions for the economic vs. environmental conflicts that prevail.

SS.C.O.12.02.26	identify and examine international treaties and other agreements concerning such issues as environmental protection, arms control, space exploration and trade. then formulate an opinion as to the agendas of those involved in each treaty. and formulate an opinion as to the agendas of those who refuse to participate in the treaties.
SS.C.O.12.02.27	analyze the interaction among nation states for problem solving and partnership building through both governmental and nongovernmental approaches.
SS.C.O.12.02.28	examine, debate and use intellectual and participatory skills essential for informed, effective, and responsible citizenship that enable individuals to learn and apply civic knowledge to work with others and clearly articulate ideas and interests to monitor and influence public policy, build coalitions, seek consensus, negotiate compromise, and manage conflict.
SS.C.O.12.02.29	develop and explain civic dispositions (habits of the heart) that pervade all aspects of citizenship and personal traits of private and public character essential to the preservation and improvement of American constitutional democracy, relate how American constitutional democracy cannot accomplish its purposes unless its citizens actively participate in public policy and civic life.

Grade 12	Social Studies
Standard: 3	Personal Finance
SS.S.12.03	<p>Students will</p> <ul style="list-style-type: none"> research applicable information (i.e. interest rates, costs, credit scores) and formulate plans to demonstrate informed decision-making as it is reflected in responsible financial decisions (as in major purchases, college funding, retirement planning, etc.).(Spending, Saving and Investing) interpret the language and ideas of financial literacy (Vocabulary) analyze the reasons people borrow money, compare the costs of credit versus cash, and summarize the effects of credit on personal finance and the global economy. (Credit) explain financial risks and evaluate available consumer protection against financial loss. (Risk Management) analyze how the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange, competition and trade-offs impact production and consumption worldwide. (Choices, Scarcity) research, critique and evaluate the roles of private and public institutions in the economy (Financial Institutions) examine and evaluate various economic systems and the interdependence of global economies. (Global Economic Systems)

Performance Descriptors (SS.PD.12.03)

<p>Objectives Students will</p> <p>SS.C.O.12.03.01 compile and prioritize lists of wants and needs and defend your decisions, then analyze the opportunity costs when choosing between wants and needs.</p>				

SS.C.O.12.03.02	create a rubric to evaluate career choices as realistic factors influencing income and lifestyle
SS.C.O.12.03.03	differentiate between gross and net income and cite the factors affecting the difference. (e.g., taxes, insurance, pension plans)
SS.C.O.12.03.04	research the role of benefits packages, unions, and professional organizations.
SS.C.O.12.03.05	calculate income and expenses, construct, analyze and monitor a personal budget, recognize the personal, local, national and global causes and implications of bankruptcy, and formulate a personal plan to prevent it.
SS.C.O.12.03.06	research the functions of banking services (checking, savings, ATM, check cards, debit cards, Certificates of Deposit, loans, investments, etc.) and recognize and compare relationships among economic institutions worldwide(e.g., households, businesses, banks, government agencies and labor unions).
SS.C.O.12.03.07	create a chart to compare interest rates on borrowed money and show the cost, then choose the best option and defend your decision. (e.g., personal loans, international loans between countries, corporate loans, entrepreneurial loans)
SS.C.O.12.03.08	explain the advantages and disadvantages of credit, -discuss appropriate uses of credit, calculate and outline the hidden costs of credit and create a plan to reduce credit. (e.g., personal line of credit, credit cards, national debt)
SS.C.O.12.03.09	differentiate between saving and investing, construct a chart to identify investment options and formulate an investment plan to meet long and short term financial goals.
SS.C.O.12.03.10	explain identity theft, how to guard against it, and the consequences to the victim and to society.
SS.C.O.12.03.11	categorize types of insurance policies and analyze the costs and benefits
SS.C.O.12.03.12	identify, categorize and explain all types taxes, compare the different collection processes, and infer how taxation, income and lifestyle affect society on personal, state, national and global scales.
SS.C.O.12.03.13	compute personal income tax short form and complete simulated real estate and personal property tax forms
SS.C.O.12.03.14	examine fraud, draw conclusions and summarize information regarding: <ul style="list-style-type: none"> • consumer rights, responsibilities, protection and legal resources • supplier rights, responsibilities, protection and legal resources • informed consumer decision-making skills • fraudulent practices • impact on the individual, community, nation and world
SS.C.O.12.03.15	evaluate an individual's need for investment, saving, spending, and insurance then design a long term plan to meet those needs throughout the life cycle. e.g., defined benefit , {pension, Social Security} defined contribution {401k, IRA, 403b, etc}, investment diversity and suitability)

Grade 12	
Social Studies	
Standard: 4	
Geography	
SS.S.12.04	<p>Students will</p> <ul style="list-style-type: none"> • interpret, use and construct maps, globes and other geographic tools to locate and derive information about personal directions, people, places and environments (The World in Spatial Terms). • describe the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). • describe and explain the physical processes that shape the earth's surface and create, sustain and modify the cultural and natural environment (Physical Systems).

<p><u>Objectives</u></p>	<p>Students will</p>			
<p>SS.C.O.12.04.01</p>	<p>map and analyze spatial data from public records and share results with the community.</p>			
<p>SS.C.O.12.04.02</p>	<p>debate the negative and positive aspects of zoning and annexation, evaluate the proposed land uses in your community and anticipate the outcomes.</p>			
<p>SS.C.O.12.04.03</p>	<p>conduct research using demographic data to interpret, debate and evaluate the geopolitical implications of a variety of global issues:</p> <ul style="list-style-type: none"> • Political and cultural boundaries • Differing rates of women's suffrage • Cultural diversity and assimilation with regards to migration • Indicators of standards of living • Impact of the movement of religion 			
<p>SS.C.O.12.04.04</p>	<p>evaluate and interpret the characteristics of migrants and the role of mental mapping in their destination decisions.</p>			
<p>SS.C.O.12.04.05</p>	<p>examine the impact of sprawl (rural and urban) on society and the environment. (e.g., globalization of agriculture, energy dependency, water/soil, green houses emissions, parking lots)</p>			
<p>SS.C.O.12.04.06</p>	<p>analyze sustainable development in the lives of 21st Century citizens.</p>			
<p>SS.C.O.12.04.07</p>	<p>debate the roles of cultural diversity and assimilation in the More Developed Countries (MDC) versus those roles in Less Developed Countries (LDC)</p>			
<p>SS.C.O.12.04.08</p>	<p>recognize the difference between political states and nation-states.</p>			
<p>SS.C.O.12.04.09</p>	<p>compare the statistical measurements that differentiate LDCs from MDCs</p>			
<p>SS.C.O.12.04.10</p>	<p>evaluate why development differs among countries and the causes and implications of these differences.</p>			
<p>SS.C.O.12.04.11</p>	<p>evaluate the changing view of resource use on a local/global scale.</p>			
<p>SS.C.O.12.04.12</p>	<p>point out the potential impacts of environmental change. (e.g. Changing areas of food production, shrinking human habitats, dense</p>			

	settlements)
SS.C.O.12.04.13	examine the role of special interest groups in defining ethical use of the environment and environmental protection.
SS.C.O.12.04.14	examine the reasons that may influence an industry's move from an MDC to an LDC. (e.g., environmental regulations, government control, wages.)

ECONOMICS (ELECTIVE)

Understanding economics is essential for all students to enable them to reason logically about key economic issues that affect their lives as workers, consumers, and citizens. A better understanding of economics enables students to understand the forces that affect them every day and helps them identify and evaluate the consequences of personal decisions. As resources become scarce, as the economic environment changes, and as the economic impact of decisions becomes more immediate, students must course will emphasize the need to make sense of the array of economic concepts, facts, events, observations and issues in everyday life and the ability to make effective decisions about economic issues. The West Virginia Standards for 21st Century Learning include the following components: 21st Century Content Standards and Objectives and 21st Century Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology tools and content standards and objectives.

** It is recommended that this class be taught as a one-semester class.

Grade 12	Social Studies
Standard: 3	Economics Elective
SS.E.S.12.03	Students will <ul style="list-style-type: none"> analyze the role of economic choices in scarcity, supply and demand, resource allocation, decision-making, voluntary exchange and trade-offs (Choices). research, critique and evaluate the roles of private and public institutions in the economy (Institutions). compare and contrast various economic systems and analyze their impact on individual citizens (Economic Systems). describe and demonstrate how the factors of production apply to the United States economic system (Factors of Production). analyze the elements of competition and how they impact the economy (Competition). examine and evaluate the interdependence of global economies (Global Economies).
Objectives	Students will
SS.E.O.12.03.01	explain and give examples showing how scarcity of goods and services forces people to make choices about needs and wants.
SS.E.O.12.03.02	analyze how the scarcity of natural, technological, capital, and human resources requires economic systems to make choices about the distribution of goods and services.
SS.E.O.12.03.03	explain the role supply and demand, prices, incentives and profits play in determining what is produced and distributed in a free enterprise system.
SS.E.O.12.03.04	explain and give examples of opportunity costs (trade-offs) and scarcity, and analyze how these concepts are the basis of other concepts in economics.
SS.E.O.12.03.05	compare and contrast examples of private and public goods and services.
SS.E.O.12.03.06	evaluate the costs and benefits of allocating goods and services through public and private means.
SS.E.O.12.03.07	describe and compare relationships among economic institutions (e.g., households, businesses, banks, government agencies and labor unions).
SS.E.O.12.03.08	explain how specialization and division of labor in economic systems increase productivity.
SS.E.O.12.03.09	describe the role of money and other forms of exchange in the economic process.
SS.E.O.12.03.10	compare and analyze how values and beliefs influence economic decisions in different economic systems.

SS.E.O.12.03.11	evaluate economic systems according to how laws, rules and procedures deal with demand, supply and prices.
SS.E.O.12.03.12	evaluate historical and current social developments and issues from an economic perspective.
SS.E.O.12.03.13	explain historical and current developments and issues in local, national and global contexts from an economic perspective.
SS.E.O.12.03.14	define inflation and explain its effects on economic systems.
SS.E.O.12.03.15	define and analyze the use of fiscal and monetary policy in the national economic system.
SS.E.O.12.03.16	explain the process of international trade from an economic perspective.
SS.E.O.12.03.17	analyze and evaluate growth and stability in different economic systems.
SS.E.O.12.03.18	analyze a public issue from an economic perspective and propose a socially desirable solution.
SS.E.O.12.03.19	evaluate the role of the factors of production in a market economy.
SS.E.O.12.03.20	compare, contrast and evaluate different types of economies (traditional, command, market, mixed).
SS.E.O.12.03.21	explain how and why people who start new businesses take risks to provide goods and services.
SS.E.O.12.03.22	identify, define and explain basic economic concepts (e.g., opportunity costs, scarcity, supply, demand, production, exchange, and consumption, labor, wages, and capital, inflation and deflation, market economy and command economy, public and private goods and services).
SS.E.O.12.03.23	describe and explain the role of money, banking, savings and budgeting in everyday life.
SS.E.O.12.03.24	distinguish between private goods and services (e.g., the family car or a local restaurant) and public goods and services (e.g., the interstate highway system or the United States Postal Service).
SS.E.O.12.03.25	compare and contrast how values and beliefs, such as economic freedom, economic efficiency, equity, full employment, price stability, security and growth influence decisions in different economic situations.
SS.E.O.12.03.26	explain the basic characteristics of international trade, including absolute and comparative advantage, barriers to trade, exchange rates, and balance of trade.
SS.E.O.12.03.27	describe and explain global economic interdependence and competition, using examples to illustrate their influence on national and international policies.
SS.E.O.12.03.28	evaluate long term and short term cost in relationship to long and short-term benefits.
SS.E.O.12.03.29	identify different economic goals and the tradeoffs that must be made between economic and social goals.
SS.E.O.12.03.30	describe the aims of government fiscal policies (taxation, borrowing, spending) and their influence on production, employment and price levels.
SS.E.O.12.03.31	explain the basic principles of the U.S. free enterprise system (e.g., opportunity costs, scarcity, profit motive, voluntary exchange, private property rights, and competition).
SS.E.O.12.03.32	explain the characteristics, advantages and disadvantages of sole proprietorships, partnerships and corporations.
SS.E.O.12.03.33	describe characteristics and give examples of pure competition, monopolistic competition and oligopolistic competition.
SS.E.O.12.03.34	analyze the factors involved in the process of acquiring consumer goods and services including credit, interest and insurance.

GEOGRAPHY (ELECTIVE)

The power and beauty of geography allows all students to see, understand, and appreciate the web of relationships between people, places, and environments. Geography provides knowledge of Earth's physical and human systems and of the interdependency of living things and physical environments. This geography course is based on the six essential elements of geography and stresses the contemporary world and the role of the U.S. in the global community. Students will use geographic perspectives and technology to interpret culture, environment and the connection between them. Students will use the geographic skills of asking geographic questions, acquiring geographic information, organizing geographic information, analyzing geographic information and answering geographic questions.

** It is recommended that this class be taught as a one-semester class.

Grade 12	
Social Studies	
Geography Elective	
Standard: 4	Students will
SS.G.S.04	interpret, use and construct maps, globes and other geographic tools to locate and derive information about personal directions, people, places and environments (The World in Spatial Terms). describe the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). describe and explain the physical processes that shape the earth's surface and create, sustain and modify the cultural and natural environment (Physical Systems). identify, explain and analyze how the earth is shaped by the movement of people and their activities (Human Systems). analyze the interaction of society with the environment (Environment and Society). explain geographic perspective and the tools and techniques available for geographic study (Uses of Geography).
Objectives	
SS.G.O.12.04.01	Students will acquire geographic information and classify it using the six essential elements of geography: the world in spatial terms, places and regions, physical systems, human systems, environment and society, and uses of geography.
SS.G.O.12.04.02	use maps, charts and graphs to analyze the world, to account for consequences of human/environment interaction, and to depict the geographic implications of world events.
SS.G.O.12.04.03	explain components of the Earth's physical systems and the interrelationships between them, and describe the ways in which Earth's physical processes are dynamic and interactive.
SS.G.O.12.04.04	explain how physical and human processes shape places and regions.
SS.G.O.12.04.05	identify human and physical changes in places and regions, and explain the factors that contribute to those changes.
SS.G.O.12.04.06	analyze and explain the interdependence and linkages between places and regions.
SS.G.O.12.04.07	identify the world's physical and cultural regions, the criteria used to define them, the political and historical characteristics of the regions, and analyze the interdependence of regions in regard to trade, services, migration, and cultural values.
SS.G.O.12.04.08	analyze populations with regard to life expectancy, infant mortality rates, population pyramids, migration, birth rates and death rates.
SS.G.O.12.04.09	evaluate the impact of human migration on physical and human systems (e.g., demand for housing, schools, water supply, sewer systems, welfare systems, political systems and food production).
SS.G.O.12.04.10	analyze growth, decline, and development of cities over time.

SS.G.O.12.04.11	explain the impact of the global economic community from the standpoint of power, cooperation and conflict, and discuss the important of control of Earth's surface and resources.
SS.G.O.12.04.12	discuss global geographical situations (economic, social, and political) and their implications (e.g., global warming, endangered species, terrorism, air pollution, habitat destruction, floods, resource distribution).
SS.G.O.12.04.13	analyze the role of physical and human geographic factors on economic patterns.
SS.G.O.12.04.14	explain world patterns of resource distribution and sustainability of these resources.
SS.G.O.12.04.15	discuss societal impacts on the environment and the affects of environment on societies.
SS.G.O.12.04.16	analyze on-going convergence and divergence of regional cultures in a global society (e.g., getting stronger, maintaining, or getting weaker).
SS.G.O.12.04.17	analyze the influence of geographical features on the evolution of significant historic events and movements.
SS.G.O.12.04.18	analyze the impact of technology on environments and societies over time and space.
SS.G.O.12.04.19	analyze connections between physical geography and isolation from the world community, which result in culture and geo-political instability (e.g., Afghanistan, Philippines, Somalia and the former Yugoslavia).
SS.G.O.12.04.20	identify causes and draw conclusions about landless cultures (e.g., Kurds, Basques, Palestinians, Jews, Northern Irish) and their desires for an independent homeland.
SS.G.O.12.04.21	acquire and organize geographic information (e.g., by reading and writing, using the Internet, studying maps, graphs, timelines, spreadsheets, climographs and cartograms).
SS.G.O.12.04.22	organize and analyze geographic information to answer geographic questions.

FISCAL NOTE FOR PROPOSED RULES

Rule Title: **W. Va. 126CSSR44D, Policy 2520.4 Social Studies Content Standards and Objectives for West Virginia Schools**

Type of Rule: Legislative Interpretive Procedural

Agency: West Virginia Department of Education

Address: Capitol Building 6, Room 608
 1900 Kanawha Boulevard, East
 Charleston, WV 25305

Phone Number: 304.558.5325 Email: cljwilli@access.k12.wv.us

Fiscal Note Summary

Summarize in a clear and concise manner what impact this measure will have on costs and revenues of state government.

Fiscal Note Detail

Show over-all effect in Item 1 and 2 and, in Item 3, give an explanation of Breakdown by fiscal year, including long-range effect.
