WEST VIRGINIA  
SECRETARY OF STATE

NOTICE OF AGENCY ADOPTION OF A PROCEDURAL OR INTERPRETIVE RULE  
OR A LEGISLATIVE RULE EXEMPT FROM LEGISLATIVE REVIEW

AGENCY: West Virginia Board of Education TITLE NUMBER: 126

CITE AUTHORITY: W. Va. Constitution, Article XII, §2, W. Va. Code §§18-2-5, 18-6-1 et seq., and  
18-9A-22

RULE TYPE: PROCEDURAL \_\_\_\_\_ INTERPRETIVE \_\_\_\_\_

EXEMPT LEGISLATIVE RULE X

CITE STATUTE(S) GRANTING EXEMPTION FROM LEGISLATIVE REVIEW

W. Va. Code §§29A-3B-1, et seq.; W. Va. Board of Education  
v. Hechler, 180 W.Va. 451; 376 S.E.2d 839 (1988).

AMENDMENT TO AN EXISTING RULE: YES X NO \_\_\_\_\_

IF YES, SERIES NUMBER OF RULE BEING AMENDED: 44H

TITLE OF RULE BEING AMENDED: Next Generation Driver Education Content  
Standards and Objectives for West Virginia Schools (2520.8)

IF NO, SERIES NUMBER OF NEW RULE BEING PROPOSED: \_\_\_\_\_

TITLE OF RULE BEING PROPOSED: \_\_\_\_\_

THE ABOVE RULE IS HEREBY ADOPTED AND FILED WITH THE SECRETARY OF STATE. THE  
EFFECTIVE DATE OF THIS RULE IS September 12, 2011.

Charles K. Heinlein  
Deputy State Superintendent of Schools

## **EXECUTIVE SUMMARY**

### **WEST VIRGINIA DEPARTMENT OF EDUCATION**

---

#### **Policy 2520.8 – Next Generation Driver Education Content Standards and Objectives for West Virginia Schools**

**Background:** Policies 2520 define the content standards and objectives for the programs of study required by Policy 2510 and establish a standardized format for such. Policy 2520.8 defines the content standards and objectives for driver education. The original effective date of Policy 2520.8: *Next Generation Driver Education Content Standards and Objectives for West Virginia Schools* was July 13, 2003. Policy 2520.8 underwent revisions in order to make the standard objectives more “rigorous”. The effective date that these revisions became effective was July 1, 2008.

**Proposals:** During the West Virginia Safety and Driver Education Conference held March 23-26, 2011, the attending driver education teachers worked on revising Policy 2520.8-Driver Education Content Standards and Objectives. The main reason for this revision work was to include distractive driving objectives. The use of cell phones, GPS, and other technologies while driving has made distractive driving an issue soon to surpass driving under the influence as the major cause of car crashes by adolescents. This has necessitated adding specific objectives to Policy 2520.8 to address this risky behavior. The driver education teachers also took the opportunity to add more specification and rigor to selected objectives.

#### **Impact:**

- By including distractive driving objectives to Policy 2520.8, educators will place a greater emphasis on this risky behavior. Thus, producing safer drivers and saving lives.
- The desired outcome of adding more specification and rigor to Policy 2520.8 is to have educators improve their driver education curricular design. Thus, producing safer drivers and saving lives.

#### **Response to Comments:**

One comment was submitted, but it required no change to the proposed policy.

**Policy 2520.8 – Next Generation Driver Education Content Standards and Objectives**  
**Revision**  
**Stakeholders**

Betty Newsome	Tygarts Valley High School	Randolph County
Rick Vass	Independence High School	Raleigh County
Catharine Wolfe	Braxton County High School	Braxton County
Kay Wiley	Pocahontas County High School	Pocahontas County
Kim Batten	Calhoun County High School	Calhoun County

**TITLE 126  
LEGISLATIVE RULE  
BOARD OF EDUCATION**

WEST VIRGINIA  
SECRETARY OF STATE

**SERIES 44H  
NEXT GENERATION DRIVER EDUCATION CONTENT STANDARDS AND OBJECTIVES  
FOR WEST VIRGINIA SCHOOLS (2520.8)**

**§126-44H-1. General.**

1.1. Scope. -- W. Va. §126CSR42, West Virginia Board of Education Policy 2510, Assuring the Quality of Education, Regulations for Educations for Education Programs, provides a definition of a delivery system for, and an assessment and accountability system for, a thorough and efficient education for West Virginia public school students. Policy 2520.8 defines the content standards (or instructional goals) and objectives for driver education as required by Policy 2510 and Policy 2422.2.

1.2. Authority. -- W. Va. Constitution, Article XII, §2, W. Va. Code §§18-2-5, 18-6-1, et seq., and 18-9A-22.

1.3. Filing Date. -- August 11, 2011

1.4. Effective Date. -- September 12, 2011

1.5. Repeal of a Former Rule. This legislative rule repeals and replaces W. Va. 126CSR44H, West Virginia Board of Education Policy 2520.8, "Driver Education Content Standards and Objectives for West Virginia Schools" filed March 19, 2007 and effective July 1, 2008.

**§126-44H-2. Purpose.**

2.1. This policy defines the content standards (or instructional goals) and objectives for the program of study required by Policy 2510 and W. Va. §126CSR22, West Virginia Board of Education Policy 2422.2, Driver Education Regulations.

**§126-44H-3. Incorporation by Reference.**

3.1. A copy of Next Generation Driver Education Content Standards and Objectives for West Virginia Schools is attached and incorporated by reference into this policy. Copies may be obtained in the Office of the Secretary of State and in the West Virginia Department of Education, Office of Healthy Schools.

**§126-44H-4. Summary of the Content Standards and Objectives.**

4.1. The West Virginia Board of Education has the responsibility for establishing high quality standards pertaining to all educational standards (W. Va. Code §18-9A-22). The content standards and objectives provide a focus for teachers to teach and students to learn those skills and competencies essential for future success in the workplace and further education. The document includes content standards for driver education, an explanation of terms; objectives that reflect a rigorous and challenging curriculum; and performance descriptors.

## Explanation of Terms

**Content Standards** are broad descriptions of what students should know and be able to do in a content area. Content standards describe what students' knowledge and skills should be at the end of a sequence of study.

**Objectives** are incremental steps toward accomplishment of content standards. Objectives are listed by grade level and are organized around the content standards. Objectives build across grade levels as students advance in their knowledge and skills.

**Performance Descriptors** describe in narrative format how students demonstrate achievement of the content standards. Five performance levels have been proposed for West Virginia: distinguished, above mastery, mastery, partial mastery and novice. Performance Descriptors serve two functions. Instructionally, they give teachers more information about the level of knowledge and skills they are building in their students. Performance levels and descriptors are also used to categorize and explain student performance on statewide assessment instruments.

### Numbering of Standards

The number for each content standard is composed of three parts, each part separated by a period:

- The content area code (e.g., DE for Driver Education);
- The letter S, for Standard; and
- The standard number.

Illustration: DE.S.1 refers to Driver Education content standard #1

### Numbering of Objectives

The number of each objective is composed of four parts, each part separated by a period:

- The content area code or course code;
- The grade level (an exception is driver education, which uses no grade level since it offered only in high school). The number of the content standard addressed; and
- The objective number.

Illustration: DE.2.3 refers to a Driver Education objective that addresses standard #2 in Driver Education and that is the third objective listed under that standard.

### Numbering of Performance Descriptors

The number for each group of five performance descriptors is composed of four parts, each part separated by a period:

- The content area or course code;
- The letters PD, for Performance Descriptors;
- The grade level (See exceptions noted above for grade level under numbering of objectives); and
- The standard number.

Illustration: DE.PD.2 refers to Driver Education performance descriptors for, content standard 2.

### **Unique Electronic Numbers (UENs)**

Unique Electronic Numbers (or UENs) are numbers that help to electronically identify, categorize and link specific bits of information. Once Policy 2520.8 is available on the Web, each standard, each objective, and each group of five performance descriptors will have a Unique Electronic Number (UEN) that will always remain the same.

The codes printed in Policy 2520.8 form the basis of the UENs. The only additional set of numbers that will be added to each code to formulate its UEN will be a prefix that indicates the year and month that a particular version of Policy 2520.8 is approved by the State Board of Education. The prefix for the UENs for each content area in Policy 2520.8 is noted at the top of each page containing standards, objectives and performance descriptors. As sections of 2520.8 are revised, UENs will be changed to reflect the new approval date.

UENs (Unique Electronic Numbers) are unique numbers that facilitate implementation of WV Standards into Electronic formats such as Databases and XML Files. The WV Department of Education encourages everyone who is going to use the WV Content Standards in any kind of electronic distribution, alignment, or software development to use the UENs so that all efforts can be cross-referenced and there is consistency across initiatives.

Illustration: The UEN for performance descriptors for secondary driver education, standard #2 will be "200602.DE.2".

## Abbreviations

<b>Content Area</b>	DE	Driver Education
<b>Other Abbreviations</b>	PD S	Performance Descriptors Standard (Content Standard)

## **DRIVER EDUCATION – POLICY 2520.8**

The goals of the Driver Education Program of Study are to provide students with the knowledge and skills to safely and efficiently operate a motor vehicle on our nation's streets and highways, to equip students with the knowledge to enable them to make wise decisions as drivers, and to assist students to become responsible users of the highway transportation system. West Virginia's vision for education includes the integration of technology throughout the curriculum so that all West Virginia students have the opportunity to develop technology skills that support learning. Successful learning environments provide opportunities for students to use education technology interwoven with relevant curriculum content. West Virginia teachers are responsible for integrating technology appropriately in the students' learning environment.

### **Standard 1: Vehicle Familiarization (DE.S.1)**

The vehicles we drive are complex machines made up of many systems and parts. All vehicles need preventive maintenance and periodic repairs to help reduce operating costs. This standard provides students an understanding of the systems and the basic operation of a vehicle; and use safety equipment while operating a vehicle.

### **Standard 2: Basic Vehicle Maneuvers (DE.S.2)**

Lane changing, passing, following, entering and exiting traffic, driving in cities/towns, rural and urban roads and freeways are some of many of the basic maneuvers needed for driving. Physical, as well as psychomotor skills, are required for basic control of the vehicle.

### **Standard 3: Driver Fitness Tasks (DE.S.3)**

Students need to demonstrate knowledge of physical, psychological, and emotional factors and their relationship to the safe operation of a vehicle; and explain how emotional state, level of maturity, and use of alcohol and/or drugs affect driver performance, decision-making, and overall safe operation of a vehicle.

### **Standard 4: Intermediate and Advanced Control Tasks (DE.S.4)**

Extreme situations will raise many questions on how to drive safely. Skills required for the safe and efficient operation of a vehicle as well as the relationship of driver actions to environmental factors are necessary for efficient operation of a motor vehicle. Natural laws, road and weather conditions, vehicle characteristics, and the safe operation of a vehicle are included in this standard.

### **Standard 5: Legal (DE.S.5)**

This standard introduces students to driving and the responsibilities that go along with it, including the use of the highway transportation system, legal requirements for licensing and owning a vehicle, traffic laws, and ordinances regulating the operation of a vehicle on the nation's streets and highways. The respect for the rights and responsibilities of other roadway users is emphasized.

### **Standard 6: The Vehicle (DE.S.6)**

The various aspects of owning and operating a vehicle includes identifying procedures for the purchase, ownership, and use of a vehicle. Preventive maintenance checks for the safe and efficient operation of the vehicle; and strategies for trip planning, map reading, and budgeting of money for vehicular-related costs are included.

## Driver Education Content Standards and Objectives

The program of study includes cognitive development relating to traffic laws and ordinances, traffic signs, signals and markers, natural laws, fuel conservation and vehicle restraint systems. Also included are the physical, psychological, and legal aspects, effects, and consequences of the use of alcohol and drugs as related to the driving of a motorized vehicle. Instruction is provided to develop the perceptual and psychomotor skills required for basic control of the vehicle, lane changing, passing, following, entering and exiting from traffic, driving in cities/towns, on rural and urban roads and freeways, responding to emergencies, various road and weather conditions, defensive driving techniques, and interaction with other highway users including motorcycles, ATVs, and trucks. The program emphasizes strategies to develop the behavior patterns known as the S.I.P.D.E. Concept (Search, Identify, Predict, Decide, and Execute). The West Virginia Standards for Next Generation Learning include the following components: Next Generation Content Standards and Objectives and Next Generation Learning Skills and Technology Tools. All West Virginia teachers are responsible for classroom instruction that integrates learning skills, technology and objectives.

Driver Education				
Standard:1 (DE.S.1)				
Vehicle Familiarization (DE.S.1)				
Students will: develop an understanding of the systems and the basic operation of a vehicle; and perform pre- and post-driving checks, perform basic procedures for operating a vehicle, and use safety equipment while operating a vehicle.				
Performance Descriptors DE.S.1				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
Students performing at the distinguished level will serve as a model for others while: performing procedures for pre- and post-driving checks; starting the engine under normal and abnormal conditions; smoothly accelerating, maintaining control, and stopping the vehicle with conventional and anti-lock braking systems; utilizing the safety equipment and restraint devices; identifying and explaining the instruments and control devices within the vehicle.	Students performing at the above mastery level will demonstrate, analyze and explain procedures for: pre- and post-driving checks; procedures for starting the engine under normal and abnormal conditions; smoothly accelerating, maintaining control, and stopping the vehicle with conventional and anti-lock braking systems; the use of safety equipment and restraint devices; and use of instruments and control devices within the vehicle.	Students performing at the mastery level will demonstrate procedures for: pre- and post-driving checks; starting the engine under normal and abnormal conditions; smoothly accelerating, maintaining control, and stopping the vehicle with conventional and anti-lock braking systems; the use of safety equipment and restraint devices; and use of instruments and control devices within the vehicle.	Students performing at the partial mastery level will need encouragement to: demonstrate procedures for pre- and post-driving checks; starting the engine under normal and abnormal conditions; smoothly accelerating, maintaining control, and stopping the vehicle with conventional and anti-lock braking systems; the use of safety equipment and restraint devices; and use of instruments and control devices within the vehicle.	Students performing at the novice level will need assistance to: demonstrate procedures for pre- and post-driving checks; starting the engine under normal and abnormal conditions; smoothly accelerating, maintaining control, and stopping the vehicle with conventional and anti-lock braking systems; the use of safety equipment and restraint devices; and use of instruments and control devices within the vehicle.

Objectives	Students will
DE.01.01	demonstrate and explain procedures for pre- and post-driving checks.
DE.01.02	demonstrate and evaluate the procedures for starting the engine under normal and abnormal conditions.
DE.01.03	demonstrate the ability to smoothly accelerate, maintain control, and stop the vehicle with conventional and anti-lock braking systems.
DE.01.04	utilize and explain the safety equipment and restraint devices within the vehicle.
DE.01.05	identify and explain functions of instruments and control devices within the vehicle.

Driver Education	
Standard:2 (DE.S.2)	Basic Vehicle Maneuvers Students will demonstrate psychomotor skills required for basic control of the vehicle, lane changing, passing, following, entering and exiting traffic, driving in cities/towns, rural and urban roads and freeways.

Performance Descriptors DE.S.2				
Distinguished	Above Mastery	Mastery	Partial Mastery	Novice
Students performing at the distinguished level will serve as model for others while: identifying the relationship of the human, environmental, and vehicular aspects of the highway transportation system; executing steering adjustments and controlling vehicles speed while driving along straight and curved paths of travel; controlling speed and direction while backing the vehicle along straight and curved paths; stopping and securing the vehicle on level and hilly terrain; performing the driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments; demonstrating skills necessary to safely enter and exit from the flow of traffic; performing driving techniques that will	Students performing at the above mastery level will demonstrate, analyze, and explain: the relationship of human, environmental, and vehicular aspects of the highway transportation system; steering adjustments and control of vehicle speed while driving along straight and curved paths of travel; control of speed and direction while backing the vehicle along straight and curved paths; stopping and securing the vehicle on level and hilly terrain; driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments; skills necessary to safely enter and exit from the flow of traffic; driving techniques that will maintain a safe separation/space around the vehicle; skills needed to	Students performing at the mastery level will identify and/or demonstrate: the relationship of human, environmental, and vehicular aspects of the highway transportation system; steering adjustments and control of vehicle speed while driving along straight and curved paths of travel; control of speed and direction while backing the vehicle along straight and curved paths; stopping and securing the vehicle on level and hilly terrain; driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments; skills necessary to safely enter and exit from the flow of traffic; driving techniques that will maintain a safe separation/space around the vehicle; skills needed to	Students performing at the partial mastery level will need encouragement to identify and/or demonstrate: the relationship of human, environmental, and vehicular aspects of the highway transportation system; steering adjustments and control of vehicle speed while driving along straight and curved paths of travel; control of speed and direction while backing the vehicle along straight and curved paths; stopping and securing the vehicle on level and hilly terrain; driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments; skills necessary to safely enter and exit from the flow of traffic; driving techniques that will maintain a safe separation/space around	Students performing at the novice level will need assistance to identify and/or demonstrate: the relationship of human, environmental, and vehicular aspects of the highway transportation system; steering adjustments and control of vehicle speed while driving along straight and curved paths of travel; control of speed and direction while backing the vehicle along straight and curved paths; stopping and securing the vehicle on level and hilly terrain; driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments; skills necessary to safely enter and exit from the flow of traffic; driving techniques that will maintain a safe separation/space around the

maintain a safe separation/space around the vehicle; demonstrating skills needed to safely perform lane-changing maneuvers; demonstrating skills necessary for safely overtaking and passing other vehicles; safe lane usage under varying traffic conditions; intersection-turning maneuvers legally, safely, and efficiently; turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction; and driving techniques that result in increased fuel/energy.	safely perform lane-changing maneuvers; skills necessary for safely overtaking and passing other vehicles; safe lane usage under varying traffic conditions; intersection-turning maneuvers legally, safely, and efficiently; turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction; and driving techniques that result in increased fuel/energy.	safely perform lane-changing maneuvers; skills necessary for safely overtaking and passing other vehicles; safe lane usage under varying traffic conditions; intersection-turning maneuvers legally, safely, and efficiently; turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction; and driving techniques that result in increased fuel/energy.	the vehicle; skills needed to safely perform lane-changing maneuvers; skills necessary for safely overtaking and passing other vehicles; safe lane usage under varying traffic conditions; intersection-turning maneuvers legally, safely, and efficiently; turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction; and driving techniques that result in increased fuel/energy.	vehicle; skills needed to safely perform lane-changing maneuvers; skills necessary for safely overtaking and passing other vehicles; safe lane usage under varying traffic conditions; intersection-turning maneuvers legally, safely, and efficiently; turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction; and driving techniques that result in increased fuel/energy.
<b>Students will</b>				
DE.02.01	identify the relationship of the human, environmental, and vehicular aspects of the highway transportation system.			
DE.02.02	execute steering adjustments and control vehicles speed while driving along straight and curved paths of travel.			
DE.02.03	control speed and direction while backing the vehicle along straight and curved paths.			
DE.02.04	stop and secure the vehicle on level and hilly terrain.			
DE.02.05	perform the driving skills necessary to interact with other highway users in rural, urban, residential, limited access, and general highway environments.			
DE.02.06	demonstrate and explain skills necessary to safely enter and exit from the flow of traffic.			
DE.02.07	perform driving techniques that will maintain a safe separation/space around the vehicle.			
DE.02.08	demonstrate and explain skills needed to safely perform lane-changing maneuvers.			
DE.02.09	demonstrate and explain skills necessary for safely overtaking and passing other vehicles.			
DE.02.10	demonstrate and explain safe lane usage under varying traffic conditions.			
DE.02.11	perform intersection-turning maneuvers legally, safely, and efficiently.			
DE.02.12	perform turnabout maneuvers, which will allow the vehicle to safely proceed in the opposite direction.			
DE.02.13	recognize and apply driving techniques that result in increased fuel/energy.			

<b>Driver Education</b>	
Standard:3	Driver Fitness Tasks (DE.S.3)

(DE.S.3)	Students will demonstrate knowledge of physical, psychological, and emotional factors and their relationship to the safe operation of a vehicle; and explain how emotional state, level of maturity, and use of alcohol and/or drugs affect driver performance, decision-making, and overall safe operation of a vehicle.						
Performance Descriptors DE.S.3							
Distinguished	Students performing at the distinguished level will serve as a model for others while: describing methods utilized by drivers to counteract drowsiness, fatigue, and exposure to carbon monoxide poisoning; describing the impact of emotions on driving performance; describing the need/importance for correcting and/or compensating for driver disabilities; identifying and explaining the magnitude of alcohol-related traffic collisions involving motor vehicle operators and pedestrians at the local, state, and national levels; describing and explaining the effects of alcohol and/or drugs on the individual in relation to driving task; identifying state laws and consequences of driving under the influence of alcohol and/or drugs; identifying state laws dealing with driving under the influence of alcohol and/or weight, quantity and type of food, rest, and amount of alcohol consumed may affect one's driving ability in different ways at different times; characteristics of a courteous driver.	Above Mastery	Students performing at the mastery level will identify: methods utilized by drivers to counteract drowsiness, fatigue, and exposure to carbon monoxide poisoning; the impact of emotions on driving performance; the need/importance for correcting and/or compensating for driver disabilities; the magnitude of alcohol-related traffic collisions involving motor vehicle operators and pedestrians at the local, state, and national levels the effects of alcohol and/or drugs on the individual in relation to driving task; state laws dealing with driving under the influence of alcohol and/or drugs; how body weight, quantity and type of food, rest, and amount of alcohol consumed may affect one's driving ability in different ways at different times; characteristics of a courteous driver.	Mastery	Students performing at the partial mastery level will need encouragement to identify: methods utilized by drivers to counteract drowsiness, fatigue, and exposure to carbon monoxide poisoning; the impact of emotions on driving performance; the need/importance for correcting and/or compensating for driver disabilities; the magnitude of alcohol-related traffic collisions involving motor vehicle operators and pedestrians at the local, state, and national levels the effects of alcohol and/or drugs on the individual in relation to driving task; state laws dealing with driving under the influence of alcohol and/or drugs; how body weight, quantity and type of food, rest, and amount of alcohol consumed may affect one's driving ability in different ways at different times; characteristics of a courteous driver.	Novice	Students performing at the novice level will need assistance to identify: methods utilized by drivers to counteract drowsiness, fatigue, and exposure to carbon monoxide poisoning; the impact of emotions on driving performance; the need/importance for correcting and/or compensating for driver disabilities; the magnitude of alcohol-related traffic collisions involving motor vehicle operators and pedestrians at the local, state, and national levels the effects of alcohol and/or drugs on the individual in relation to driving task; state laws dealing with driving under the influence of alcohol and/or drugs; how body weight, quantity and type of food, rest, and amount of alcohol consumed may affect one's driving ability in different ways at different times; characteristics of a courteous driver.

alcohol consumed may affect one's driving ability in different ways at different times; list characteristics of a courteous driver.				
---	--	--	--	--

Objectives	Students will
DE.03.01	describe and assess methods utilized by drivers to counteract drowsiness, fatigue, and exposure to carbon monoxide poisoning.
DE.03.02	describe and assess the impact of emotions on driving performance.
DE.03.03	describe and assess the need/importance for correcting and/or compensation for driver disabilities.
DE.03.04	identify and explain the magnitude of alcohol-related traffic collisions involving motor vehicle operators and pedestrians at the local state, and national levels..
DE.03.05	describe and explain the effects of alcohol and/or drugs on the individual in relation to driving task.
DE.03.06	identify state laws and consequences of driving under the influence of alcohol and/or drugs.
DE.03.07	explain how body weight, quantity and type of food, rest, and amount of alcohol consumed may affect one's driving ability in different ways at different times..
DE.03.08	explain and perform characteristics of a courteous driver..

Standard:4 (DE.S.4)	Driver Education Intermediate and Advanced Control Tasks (DE.S.4)
Students will demonstrate intermediate and advanced skills required for the safe and efficient operation of a vehicle; and identify the relationship of driver actions to: environmental factors, natural laws, road and weather conditions, vehicle characteristics, and the safe operation of a vehicle.	

Performance Descriptors DE.S.4	Above Mastery	Mastery	Partial Mastery	Novice
<b>Distinguished</b> Students performing at the distinguished level will serve as a model for others when: describing the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids; demonstrating skills required for city, urban, rural, and limited access	Students performing at the above mastery level will identify, analyze and explain: the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids; skills required for city, urban, rural, and limited access highways;	Students performing at the mastery level will demonstrate and/or identify: the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids; skills required for city, urban, rural, and limited access highways;	Students performing at the partial mastery level will need encouragement to demonstrate and /or identify: the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids; skills required for city, urban, rural, and limited access highways;	Students performing at the novice level will need assistance to demonstrate and /or identify: the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids; skills required for city, urban, rural, and limited access highways;

highways, executing angle, parallel, and perpendicular parking; demonstrating the driving adjustments needed to cope with various road surface conditions and roadway obstructions; identifying safe driving practices at railroad crossings; operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness; identifying the natural laws of physics as they apply to safe and efficient driving; procedures for coping with emergency driving situations; identifying the principles and procedures for safely towing a trailer and/or other vehicles; and driving in a mindful and observant fashion.	skills needed to angle, parallel, and perpendicular parking; driving adjustments needed to cope with various road surface conditions and roadway obstructions; safe driving practices at railroad crossings; safe practices for operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness; the natural laws of physics as they apply to safe and efficient driving; procedures for coping with emergency driving situations; and the principles and procedures for safely towing a trailer and/or other vehicles; and the consequences of distracted driving.	limited access highways; skills needed to angle, parallel, and perpendicular parking; driving adjustments needed to cope with various road surface conditions and roadway obstructions; safe driving practices at railroad crossings; safe practices for operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness; the natural laws of physics as they apply to safe and efficient driving; procedures for coping with emergency driving situations; the principles and procedures for safely towing a trailer and/or other vehicles; and the consequences of distracted driving.	skills needed to angle, parallel, and perpendicular parking; driving adjustments needed to cope with various road surface conditions and roadway obstructions; safe driving practices at railroad crossings; safe practices for operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness; the natural laws of physics as they apply to safe and efficient driving; procedures for coping with emergency driving situations; and the principles and procedures for safely towing a trailer and/or other vehicles; and the consequences of distracted driving.	skills needed to angle, parallel, and perpendicular parking; driving adjustments needed to cope with various road surface conditions and roadway obstructions; safe driving practices at railroad crossings; safe practices for operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness; the natural laws of physics as they apply to safe and efficient driving; procedures for coping with emergency driving situations; and the principles and procedures for safely towing a trailer and/or other vehicles; and the consequences of distracted driving.
---	---	--	---	---

Objectives	Students will
DE.04.01	explain the relationship between driver actions, environmental factors, vehicle characteristics, and roadway conditions through all three types of skids.
DE.04.02	Demonstrate and/or explain skills required for city, urban, rural, and limited access highways.
DE.04.03	execute angle, parallel, and perpendicular parking.
DE.04.04	identify and describe the driving adjustments needed to cope with various road surface conditions and roadway obstructions.
DE.04.05	Identify and explain safe driving practices at railroad crossings.
DE.04.06	identify and explain safe driving practices for operating a vehicle under adverse conditions such as snow, rain, ice, fog, and darkness.
DE.04.07	identify and explain the natural laws of physics as they apply to safe and efficient driving.
DE.04.08	identify and explain procedures for coping with emergency driving situations.
DE.04.09	identify and justify the principles and procedures for safely towing a trailer and/or other vehicles.
DE.04.10	Identify and explain driving behaviors that are distracting to the driver and the consequences.

<b>Driver Education</b>				
<b>Standard: 5</b> <b>(DE.S.5)</b>	<b>Legal (DE.S.5)</b>			
Students will identify characteristics for responsible use of the highway transportation system; list: the legal requirements for licensing and owning a vehicle; traffic laws; and ordinances regulating the operation of a vehicle on the nation's streets and highways; and demonstrate respect for of the rights and responsibilities of other roadway users (e.g., trucks, pedestrians, bicyclists, and motorcyclists) while operating a vehicle.				
<b>Performance Descriptors DE.S.5</b>				
<b>Distinguished</b>	<b>Above Mastery</b>	<b>Mastery</b>	<b>Partial Mastery</b>	<b>Novice</b>

Comments for section 126-44H-4 Driver Education Content Standards and  
Objective Performance Descriptors

-----  
It doesn't really matter what kind of language it contains if students can't  
take the class. My son went to Cabell Midland and tried for three years to  
get into the class and never could, when asked they sent us a form detailing  
how we could pay a company to do the same thing. I think it was 7 or 8  
hundred dollars. If the schools are going to offer it, they should create  
enough classes to cover the demand, it's ridiculous. Thats a big discount on  
your insurance too.
