SECRETARY'S OFFICE

I wish to request the repeal of policy 6100, series 171, entitled Energy Problem. The emphasis on energy conservation that spurred this policy in 1982 has diminished greatly with the present availability of fuels. Therefore, there is little or no apparent reason to maintain on file a policy requiring county Boards of Education to conserve energy "to the maximum degree consistent with the offerings of a thorough and efficient educational program" and to require energy conservation be taught in the schools of West Virginia. Even with this policy on record, there appears to be no way to evaluate whether or not compliance has been met.
