#### **BRIEF SUMMARY**

The proposed rule is to establish standards and procedures for reporting cancer cases to the West Virginia Cancer Registry, maintaining the confidentiality of information in its cancer registry and disclosing information from the cancer registry. This data can provide information relative to the presence of risk factors that place patients at risk for developing cancer. The value of this data can allow researchers under confidential measures to analyze the cancer registry data for purposes of cancer prevention, control and research.

#### **STATEMENT OF CIRCUMSTANCES**

West Virginia has had a cancer registry in place since 1993 but currently does not allow for full reimbursement of cancer record abstracting from all facilities in West Virginia. With expansion of the Joint Committee on Cancer requirements for collaborative staging of cancer diagnoses, it is labor intensive and there needs to be equality in setting fees and treating all facilities the same that is shall be based upon the fair market value of the services.
