

The figure consists of two side-by-side scatter plots. Both plots have 'Number of children born' on the x-axis and 'Number of children surviving to age 10' on the y-axis. The left plot is labeled '1970-1980' and shows a positive linear trend with a regression line. The right plot is labeled '1980-1990' and also shows a positive linear trend with a regression line, which appears slightly steeper than the one in the left plot.
